DWS Invest (IE) ICAV

GENERAL INFORMATION

Background to the ICAV

DWS Invest (IE) ICAV (the “ICAV”) is an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Funds with registration number C194848. The ICAV was incorporated under an Instrument of Incorporation, pursuant to the Irish Collective Asset management Vehicles Acts 2015 to 2021 (together, the “Acts”), and was registered with the Central Bank of Ireland (the “Central Bank”) on 12 July 2019. The ICAV has been authorised by the Central Bank as an undertaking for collective investment in transferable securities (“UCITS”) pursuant to the provisions of the European Communities (undertakings for collective investment in transferable securities) Regulations, 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (undertakings for collective investment in transferable securities) Regulations 2019 (together the “Central Bank UCITS Regulations”). References to statutes, regulations and laws shall include any amendments thereto. All capitalised terms used but not defined herein shall have the meaning ascribed hereto in the ICAV’s prospectus dated 1 December 2023 (the “Prospectus”).

Schedule of Sub-Funds

As at 30 June 2024, the ICAV has established nine sub-funds namely DWS Qi Global AC Equity Fund, which launched on 23 October 2019, DWS Noor Precious Metals Securities Fund, which launched as a result of a merger on 28 May 2021, Xtrackers Global Aggregate Corporate Bond 1-10 Index Fund, which launched on 1 March 2023, DWS Customised Global Investment Grade Bond Fund, which launched on 19 April 2024 (together the “Funds” and individually “sub-fund” or “Fund”), Xtrackers MSCI World UCITS Fund, Xtrackers MSCI China A UCITS Fund, Xtrackers MSCI ACWI UCITS Fund, Xtrackers MSCI USA UCITS Fund and Xtrackers S&P 500 UCITS Fund, which are approved but not launched as at 30 June 2024 and as such no information for these Funds has been presented in the financial statements.

The manager of the ICAV is DWS Investment S.A. (the “Manager”), which in turn has appointed DWS Investment GmbH as investment manager (the “Investment Manager”) of the Funds. The Investment Manager has appointed DWS International GmbH as sub-investment manager of the DWS Qi Global AC Equity Fund and DWS Investment Management Americas Inc. as the sub-investment manager of the DWS Noor Precious Metals Securities Fund (DWS International GmbH and DWS Investment Management Americas Inc. each a Sub-Investment Manager and together being, the “Sub-Investment Managers”).

Shares representing interests in different Funds of the ICAV may be issued from time to time by the Directors. Within each Fund, the Directors may issue Shares of more than one Class. All Shares of each Class will rank *pari passu* save as provided for in the relevant Supplement. A separate portfolio of assets will be maintained for each Fund (and accordingly not for each Class of Shares) and will be invested in accordance with the investment objective and strategies applicable to the particular Fund. As the ICAV has segregated liability between its Funds, any liability incurred on behalf of or attributable to any Fund shall be discharged solely out of the assets of that Fund.

Investment objective and policy

DWS Qi Global AC Equity Fund

The investment objective of the Fund is to achieve long-term capital appreciation in excess of the MSCI ACWI Index (the “Benchmark”). In order to achieve the investment objective, the Fund will primarily invest in equities of large and mid-cap companies which are either listed and/or domiciled in, or have meaningful economic exposure to both developed markets and emerging markets. With the exception of permitted investments in unlisted securities, the Fund’s investments will be listed on Regulated Markets, and may be selected without restrictions to geographical, industrial or sectoral exposure. Such investments may include China A-Shares, which the Fund may invest in directly through Stock Connect as further described in the Prospectus. Individual stocks are selected by the Sub-Investment Manager of the Fund, using a proprietary and dynamic multi-factor allocation strategy designed by the DWS Quantitative investments (Qi) group within the Sub-Investment Manager. The strategy seeks to select and weight investments according to criteria typical of fundamental analysis and technical analysis taking into account a balance between opportunity and risk. Fundamental analysis involves analysis of companies’ balance sheet data and valuation metrics, whereas technical analysis involves forecasting the direction of stock prices by analysing historical market price data.

Investment objective and policy (continued)

DWS Noor Precious Metals Securities Fund

The investment objective of the Fund is to achieve capital appreciation in the medium to long term by investing in a portfolio of Sharia compliant equity and equity-related securities of companies engaged in activities (exploration, mining and processing) related to gold, silver, platinum or other precious metals or minerals. The Fund is actively managed and in order to achieve the investment objective, the Fund will invest in a portfolio of Sharia compliant equity and equity related securities (including, without limitation, depositary receipts such as Sharia-compliant global depositary receipts (GDR) and American depositary receipts (ADR), but excluding preferred shares and bonds) listed or traded on a Regulated Market (as set out in Appendix 1 of the Prospectus), of companies engaged in activities (exploration, mining and processing) related to gold, silver, platinum or other precious metals or minerals. The Fund will not invest directly in physical gold or silver bullion or in securities where the underlying investment is in such commodities.

Xtrackers Global Aggregate Corporate Bond 1-10 Index Fund

The investment objective of the Fund is to track the performance before fees and expenses of an index that provides exposure to the global investment grade fixed-rate debt markets, denominated in Euro and US Dollars across developed market countries. In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy to gain exposure to the Global Agg Corp 1-10 Year OECD Senior 1bn 50% USD 50% EUR Select Index (the Benchmark Index).

DWS Customised Global Investment Grade Bond Fund

The investment objective of the Fund is to achieve a return above that of the benchmark, ICE BoA 1-5 Year Global Corporate Index (GVBC), USD hedged (the Benchmark). In order to achieve the investment objective, the Fund will invest globally in debt securities that have an investment grade status, as defined as BBB- and above, at the time of acquisition. In the case of a split rating involving three rating agencies, the second best will prevail. If a security is rated by only two agencies, the lower of the two ratings will be used for the rating classification. If a security only has one rating, the single rating will be used. If there is no official rating, an internal rating will be applied in accordance with DWS internal guidelines. Up to 5% of the Fund's net assets may be held in debt securities that have a below investment grade rating, as defined as BB+ and below, due to ratings downgrade after initial date of acquisition. If the 5% below investment grade exposure threshold is exceeded, the Fund will have 90 calendar days to rectify.

Sharia Investment Guidelines - DWS Noor Precious Metals Securities Fund

DWS Noor Precious Metals Securities Fund undertakes its investment activities in accordance with the Sharia Investment Guidelines. As a consequence, this may mean that the Fund may under-perform, when compared to other investment funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria (for example the inability to invest in interest bearing investment securities and the amount of any donations to charities made up of cash dividends which have been cleansed). The Sharia Investment Guidelines may require the Fund to dispose of investments in circumstances that are less advantageous than might otherwise be the case. In particular, DWS Investment GmbH (the "Investment Manager") will receive the Sharia Supervisory Board's instructions through Khalij Islamic (BVI) Limited (the "Sharia Advisor"), as set out in the Sharia Advisory Agreement executed between the Fund, the Investment Manager and the Sharia Advisor.

Pursuant to such instructions by the Sharia Advisor, the Investment Manager and DWS Investment Management Americas Inc., the Sub-Investment Manager of the Fund, will, for instance, not be allowed to invest in securities and other financial instruments which, in the opinion of the Sharia Supervisory Board of the Sharia Advisor, are not or are no longer, in compliance with the Sharia Investment Guidelines. Similarly, cash balances held by the Fund from time to time may be deposited on terms which shall grant no return on the sum deposited to the benefit of the sub-fund.

Although the Fund intends to observe the Sharia Investment Guidelines at all times, no absolute assurance can be given, as there may be occasions when the Fund's investments do not fully comply with such criteria for factors outside the control of the Fund. The Depositary shall not be responsible for monitoring compliance with the Sharia Investment Guidelines.

Purification of Income - DWS Noor Precious Metals Securities Fund

It is obligatory to purify dividends from prohibited income (e.g. interest earnings, income generated by other impermissible activities, etc).

The Fund may invest only in companies that satisfy the Sharia criteria stated in the Prospectus. Where the Fund invests in a company which satisfies the Sharia Investment Guidelines set out in the Prospectus but which still derives a portion of its revenue from prohibited activities, then the Fund must cleanse, where appropriate, all dividend and income receipts from such a company by donating a certain portion of such dividend receipts to charity.

In order to purify the income received from prohibited activities, an amount equivalent to 5% of all cash dividends received within the Fund will be donated to a charity. The Administrator shall provide a schedule on a semi-annual basis showing the amount to be paid to charities in respect of the prohibited income received from investments of the Fund.

During the course of each financial period, when the Fund receives any dividend, 5% of the dividend will be deducted from the Net Asset Value of the sub-fund and accrued separately.

The Directors shall determine which charities shall benefit from donations (with no direct or indirect benefit accruing to the Sharia Advisor, Sharia Supervisory Committee of the Sharia Advisor, the ICAV, its Funds or any of its investors) and the Fund shall make any donations to such charitable organisations within a reasonable time after such determination in good faith. Such donations will be deducted directly from the assets of the Fund by the Fund. Donations shall be made to charitable institutions as the Directors shall determine from time to time in consultation with the Investment Manager and Sharia Advisor.

It is not permitted to conclude futures or options contracts or other forms of derivative instruments on the Fund's assets without the explicit approval from the Sharia Advisor.

It is not permissible to undertake trading in the shares of a corporation, when the assets of such corporations are exclusively comprised of cash.

The Fund may acquire foreign currency by way of spot currency contracts for the purpose of purchasing listed equity and equity-related transferable securities as well as non-listed securities, for the day-to-day operations of the Fund (subject always to the further restrictions as set out herein i.e. not for the purposes of hedging or entering into short positions) and may sell such foreign currencies by way of spot currency contracts where such foreign currencies are the proceeds of sale of listed or non-listed transferable equity and equity-related transferable securities.

Purification of Income - DWS Noor Precious Metals Securities Fund (continued)

The Fund may purchase units or shares of one or several UCITS provided they are not prohibited under the restrictions specified under investment restrictions as set out in the section of the Prospectus entitled Investment Restrictions, provided that such UCITS shall comply with the Sharia Investment Guidelines.

Subject to the UCITS Regulations and the requirements of the Central Bank, the Sharia Investment Guidelines as set out in the Fund's Supplement shall continue to be complied with. The Sharia Investment Guidelines may be modified from time to time by the Sharia Advisor as deemed appropriate.

Equity Strategy

The fund aims to generate long-term capital appreciation for investors seeking exposure to global equities. To achieve a relative outperformance versus the MSCI All Country World Index, the fund uses a systematic multi-factor strategy and considers risk forecasts as well as transaction cost estimates.

Market Review

Global equities posted strong results in the first half of 2024 ("1H24") with the MSCI ACWI Index gaining 11.30% in USD terms. Developed Markets, led by the U.S., outperformed EM by a significant margin. Emerging Markets ended the 1H24 with + 7.48%, as gains in Taiwan and India were offset by a weak performance in Latin America.

For the financial period ended 30 June 2024

DWS Qi Global AC Equity Fund (continued)

Investment Manager's report for the financial period ended 30 June 2024 (continued)

Market Review (continued)

In quarter 1 2024 ("1Q24"), equity markets rallied to new highs, largely fueled by better-than-expected U.S. economic data, rate cut expectations and continued euphoria over Artificial Intelligence ("AI") related products. The S&P 500 rose by slightly more than 10%, its first double-digit quarterly gain in more than a decade. In Japan, the Nikkei posted its strongest performance since the second quarter of 2009 and finally surpassed its previous record high, set in 1989. The earnings season for quarter 4 2023 ("Q423") showed a majority of positive surprises, especially some of the Mega Caps in the U.S. and in Europe reported better than expected. The so-called Magnificent Seven have driven the U.S. growth rally in equities, despite diverging fundamentals. In addition, European growth stocks, led by firms such as Novo Nordisk A/S and SAP, have outperformed.

However, Interest rate expectations have moved dramatically, with six U.S. Federal Reserve ("Fed") cuts reverting to fewer than three. Resilient US economic data, and expectations of stickier inflation have fueled the 'higher for longer' debate by the end of the quarter. Despite disappointing inflation numbers from the US which cooled down the optimism for a large amount of rate cuts for this year by the Fed, equity markets continued their gains in March.

The rise in global equities continued in quarter 2 2024 ("2Q24"), as emerging markets outperformed developed in USD terms, led by China's rebound over 2Q24. However, both 2Q24 and June were mixed for financial assets. Sovereign yields remained elevated and stock market indices advanced mainly because of the Information Technology sector. On the stock markets, the split between the large U.S. tech stocks and the rest continued in 2Q24. Also, country-level equity returns reverted as compared to 1Q24 with Chinese stocks rallying, while Japanese stocks pulled back.

Politics also moved more into the forefront. The direct confrontation between Iran and Israel at the beginning of the quarter briefly shocked the markets. The ongoing trade disputes between the U.S., Europe and China, elections in India, Mexico and South Africa, and the election campaign in the U.S. affected market sentiment. In June, the European Union ("EU") Parliament elections also proved grounds for disruption, triggering a snap election. The European Central Bank ("ECB") made its first interest rate cut since 2016 whereas the Fed is expected not to cut rates before November.

Through the factor lens, the 1H24 showed a continuation of the dominating trends of the previous year with outperformance of Growth and Quality. Remarkably, global equity markets were marked by regional differences in style performance. In the U.S. and European markets, Growth and Quality were the superior factors again which also increasingly dominated outperforming Momentum. Only in March, strong economic data helped cyclical Value to recover. Differently, Value stocks have led Japan's rally.

In the sector breakdown, Information Technology and Communication sectors led the market performance with +24.80% resp. +20.39%, followed by Financials and Industrials. Real Estate and Utilities lagged the market with -3.8% resp. -1.36%.

Performance Summary

In 1H24, DWS Qi Global AC Equity Fund gained 14.12% (NAV base). In relative terms, the portfolio outperformed its benchmark by 2.82%. Since inception, the fund has been up 71.11% outperforming the benchmark by 6.78% (NAV based), as of 28.06.2024.

The continuation of the dominating trends of the previous year with outperformance of Growth, Quality and Momentum supported the predictive power of our model. YTD, the portfolio exposures to all factor groups have been rewarded. The largest attribution effect came from the strategy exposure to Growth which was successful especially in February, when Tech stocks like Nvidia delivered strong reports. Additionally, Analyst Sentiment factors in combination with the exposure to Financial Strength factors like profitability supported the outperformance. In March, factor trends partially reversed and especially Financial Strength indicators dragged the performance but were compensated by the success of our Value factors in the environment of fading interest rate cut optimism and rising commodity prices. The Technical Indicators have been successful in both 1Q24 and 2Q24 supported by strong performance of momentum factor in 1H24.

Performance Summary (continued)

Regionally, Developed Markets delivered the dominant attribution effect driven by the stock selection. Within Developed Markets, strategy's active positioning was successful in all three regions, led by the strongest stock selection effect in the U.S. market. In terms of the sectoral breakdown, six of eleven sectors exhibited positive attribution effects. Security selection worked particularly well in Information Technology (OW in Dell, Nvidia, Broadcom), Financials (e.g. OW 3i Group and Unicredit) and Health Care (e.g. OW NovoNordisk) whereas it was most challenging in Materials (e.g. OW Nucor).

Market Review

For the first half of 2024 precious metals commodities posted positive performance, except for palladium. After struggling with performance for January and February gold and silver prices moved to the positive side of the ledger beginning in March. Platinum prices struggled throughout the period before ending in positive territory.

Gold traded in a narrow range during January, staying above the \$2,000/oz level for the duration of the month and closing the month out at ~\$2,040/oz. This small dip ended the streak of three straight months of positive price performance as Gold dipped in sympathy with a small rise in U.S. 10-year Treasury yields and a U.S. Dollar that strengthened against most major currencies. Silver, which typically exhibits more volatility than Gold, fared slightly worse. consecutive year. Meanwhile, Platinum and Palladium, saw more pronounced selling in January. They witnessed the same interest rate and currency concerns as Gold and Silver, along with the rising belief that the Fed may hold off cutting rates until much later than investors initially expected.

Market Review (continued)

Gold started February by moving higher, but quickly pulled back and fell below the \$2,000/oz level for a few days before recovering and ending February at a slightly higher price. Silver was also affected by higher Treasury yields and a strong Dollar, but also by slowing economic growth given its industrial uses. Platinum and Palladium saw greater losses in February. Both metals continue to have elevated levels of short interest, around the same level seen ahead of their December rally. Reports showed some market participants taking off long positions after strong runs for both Platinum and Palladium as they escaped the newest rounds of sanctions on Russia.

In March, Gold's price moved materially higher early in the month, then found a plateau for the middle part of the month but started to climb again into month's end. Gold started the month around the \$2,040/oz level and closed March out at ~\$2,230/oz, making new all-time highs in the process and setting a new record for end of the month pricing. Silver made a slightly larger move higher, also assisted by the Fed's dovish remarks and updated forecasts. Silver also likely benefited from its industrial uses as economic growth in the U.S. continues to exceed expectations and as signs of green shoots in China's manufacturing activity arose. Platinum and Palladium also saw price gains in March.

Gold's price made moves higher for the first few weeks of April before pulling back, but it still ended the month higher, making new all-time highs in the middle of the month and again setting a new record for end-of-month pricing. Silver made a larger move higher during April. Silver followed a similar pattern as Gold, rising quickly higher early in the month, possibly driven by speculators, but with its price fading over the last several trading days of April. Platinum and Palladium saw their performance diverge during April. Platinum continued to rise as supplies are expected to remain in deficit when compared to overall demand this year, while Palladium fell as it remains abundantly available and continues to trade at a premium to Platinum.

Gold's price continued to climb higher in the month of May, although at a slower pace than previous months. Gold ended May around the ~\$2,327/oz level. The U.S. Dollar (as measured by the DXY Index) took its first monthly breather in performance by weakening -1.46% in May as inflation eased, providing potential room for the Fed to possibly cut short-term rates during the year. Silver made a larger move higher during May, following a strong April. Silver followed a similar pattern as Gold. Silver continues to be in supply deficit. Platinum and Palladium again saw their performance diverge during May. Platinum continued to rise as supplies are expected to remain in deficit when compared to overall demand this year, while Palladium fell as it remains abundantly available.

Gold price held steady (-0.02%) despite recovering ETF demand in June. China's PBOC held its gold reserves steady for the 2nd month in a row. Macro factors were mixed for gold as US 10y yields fell 10bps, but the Dollar strengthened (+1.13%). Silver pulled back (-4.34%) on decreased speculative positioning after rallying strongly from February to May. Palladium prices rose (6.17%) perhaps as a result of short covering and an improved outlook for automobile manufacturing. Platinum prices fell (-4.23%) as South Africa's ANC party lost ground in the May 29 elections and formed a coalition including 6 other parties, namely the pro-business DA party. Platinum and the SA Rand experienced high volatility in June as the ANC worked to form the coalition throughout the month.

Market Commentary

Fixed Income

United States ("US")

U.S. Treasury yields rose significantly in the first half of the year, as the heightened expectations that the Fed would cut rates in the first half of the year moderated substantially. The 10-year yield rose from 3.87% at the end of 2023 to 4.21% at the end of the first quarter. Yields continued to rise in the second quarter as well, with macroeconomic data presenting a resilient picture of the U.S. economy, characterized by meaningful growth and low unemployment. However, towards the end of the second quarter, the economy appeared to be cooling somewhat, and labour markets were softer too. While the Fed made it clear that it would wait for strong evidence of the inflation having been tamed, expectations of a rate cut by the end of this year helped arrest the rise in Treasury yields, moderating it to 15bps during 2Q24.

Eurozone

The key highlight of 2Q24 in the eurozone fixed-income market was a 25bps rate cut by the ECB, bringing its policy rate to 3.75%. However, towards the end of the quarter, politics became the main driver of interest rates in the region, following the victory of right-leaning French parties in the European parliament elections and the subsequent announcement of snap polls for the French parliament by the French President. This led to a sharp sell-off in French government bonds and their spreads over German Bunds rose sharply. Further rate cuts by the ECB may be difficult, as it may decide to wait for strong evidence of inflation falling in the euro zone.

United Kingdom

The picture in the U.K. was similar to that in the U.S., as Gilt yields rose to 4.37% at the end of 2Q24, up from 3.94 at the end of 1Q24. The Bank of England ("BoE") has kept interest rates on hold so far this year and hopes of a rate cut have been dampened by persistently high inflation. The BoE has emphasized that a rate cut would come only when inflation has been controlled.

Japan

If the key event in the eurozone during 1H24 was a rate cut, it was just the opposite in Japan where the Bank of Japan raised its policy rate to 0.1% from -0.1%, finally abandoning its 17 year old negative interest rate policy as well as its yield curve control mechanism. The second quarter was characterized by a sharp depreciation of the JPY against the USD, as the BoJ announced lowering its purchase of Japanese Government Bonds, while persistently higher rates in the U.S. supported the USD. As a result, the JPY exceeded the 161 level against the USD for the first time since 1986.

Emerging Markets Including Asia

Overall, emerging markets performed better than their developed market counterparts in 1H24, in the fixed income space. However, given the diversity in the group of countries falling in this category, there was a large divergence across geographies. This was further accentuated by idiosyncratic factors such as elections in some countries. The strongest performers included Taiwan, India, South Africa, Mexico and Singapore while Indonesia, Philippines and Thailand were the main laggards.

Portfolio Strategy

The fund aims to generate long-term capital appreciation for investors seeking exposure to global corporate bond markets in the short to mid-term range of 1-5years. The current duration of the mandate is around 2.9 years. To achieve a relative outperformance versus the ICE BofA 1-5y Global Corporate USD hedged Index, the fund engages in active positioning against the benchmark sectors to generate value by bond selection (alpha) and overall risk positioning against the benchmark (beta). All non USD FX exposure is hedged back into the portfolio currency USD.

Investment Manager's report for the financial period ended 30 June 2024 (continued)

Performance Review

We ramped up the mandate on April 18th 2024, with the initial funding amount of 75 million USD. Execution on that day went very smooth, by executing two so called "portfolio trades", one for the EUR denominated bonds and one for the USD denominated bonds, and a couple of single name trades for the CAD and GBP denominated bonds. All FX exposure was hedged back into the portfolio currency USD. Valuation of the first day was around 10c below the initial volume, so this can be an approximated measure of the initial trading costs, which seemed rather low and good for us. The initial positioning of this short term global corporate portfolio is "risk overweight" against its benchmark and a bit longer in duration, to express our constructive view on corporate credit and to participate in the rate cuts by central banks we still expect throughout the year. May was again dominated by volatile rates swings, as markets pushed the probability of rate cuts further out into the year by remarks of the Fed and also the ECB. We both benefitted from our pronounced credit risk positioning throughout the month, and also the duration of round about 2.8 years contributed positively. Finalizing up the first half year of 2024, the month of June was spilt in two parts as credit markets widened in the middle of the month, when the market was spooked by the announcement of the French snap elections. While the total return for the fund holds up quite well at +60bp, it underperformed slightly (by around 7bp) against its benchmark on wider credit levels. While we suffered in the second half of the month from our overweight credit risk positioning, our slightly long duration and curve positioning damped that and contributed positively. New issue activity has been again quite active, we invested in new issues of Enel, Takeda Pharmaceutical, Royalty Pharma, and JPMorgan among others. Names we lighted up in were also JPMorgan, Volkswagen, Werfenlife, or Bankinter among others. We expect the summer month of July still to be a benign credit month, so we keep our overall risk positioning remaining overweight.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

For the financial period ended 30 June 2024

1. Statement of compliance

These unaudited condensed financial statements have been prepared in accordance with IAS 34, "Interim Financial Reporting". These condensed financial statements do not contain all of the information and disclosures required in annual audited financial statements and should be read in conjunction with the ICAV's audited financial statements for the financial year ended 31 December 2023, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union (the "EU"), the Acts and the Central Bank UCITS Regulations.

2. Summary of material accounting policies

a) Basis of preparation

The condensed financial statements have been prepared on a going concern basis and under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

b) Standards and interpretations applicable to future reporting periods

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a material impact on the ICAV.

c) Estimates policy

The preparation of these condensed financial statements requires the Directors of the ICAV to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, contingent assets or liabilities, income and expenses. The estimates and associated assumptions are based on various factors that are believed to be reasonable under the circumstances, the results of which forms the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources.

Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

There were no contingent assets or liabilities during the period.

3. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a 'chargeable event'. A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV, or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations;
- certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed statutory declarations; and
- certain transfer of shares between spouses or civil partners.

DWS Invest (IE) ICAV

NOTES TO THE CONDENSED FINANCIAL STATEMENTS (continued)

For the financial period ended 30 June 2024

3. Taxation (continued)

Dividends, interest and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the ICAV or its shareholders.

4. Fees

The Funds may apply particular arrangements as regards the allocation and payment of the fees and expenses relating to the relevant Fund, namely that a Fund may operate on the basis of either a:

- (i) Platform Fee arrangement or
- (ii) All-in Fee arrangement, (each as described below).

Where such an arrangement is contemplated this will be disclosed in the Supplement for the relevant Fund. If such a fee arrangement is not in place the details of the fees of the Manager, Administrator, Depositary, Investment Manager, Sub-Portfolio Manager and/or relevant Sub-Investment Manager (as applicable), will be set out in the Supplement.

Platform Fee

The ICAV may in respect of each Fund (as specified in the relevant Supplement) enter into an arrangement with a member of the DWS Group (the Platform Fee Arranger), where the Platform Fee Arranger will, in exchange for a Platform Fee (as defined in the relevant Supplement), pay the Platform Costs from time to time of the relevant Fund. For the avoidance of doubt, and as disclosed below, the Manager Fee is charged separately to and is not covered under the Platform Fee. Where applicable, the Platform Fee is calculated on the daily Net Asset Value per Fund or per Class of Shares or the Initial Issue Price (as will be indicated in the Supplement) and is accrued daily and payable monthly.

The Platform Costs are (i) fees and expenses payable to the Depositary and the Administrator and (ii) other Administrative Expenses (as more fully described in the section of the Prospectus entitled Fees and Expenses). The Platform Costs do not include the following fees, expenses and costs:

- (i) the Manager Fee;
- (ii) any taxes or fiscal charges which the Funds may be required to pay, if it should be payable, any value added tax or similar sales or services tax payable by the Funds (VAT) (all such taxes or fiscal charges), unless otherwise specified in the relevant Supplement;
- (iii) expenses arising out of any advertising or promotional activities in connection with the Funds; nor
- (iv) any costs and expenses incurred outside of the Funds' ordinary course of business such as legal fees incurred in prosecuting or defending, a claim or allegation, by or against, the Funds.

Currently only Xtrackers Global Aggregate Corporate Bond 1-10 Index Fund operates a Platform Fee arrangement.

All-in Fee

The ICAV may in respect of each Fund (as specified in the Supplement) charge an All-in Fee to cover the costs and expenses from time to time of the relevant Fund. Such All-in Fee shall be inclusive of and cover the following fees, expenses and costs:

- (i) the fees and expenses of the Depositary;
- (ii) the fees and expenses of the Administrator;

4. Fees (continued)

All-in Fee (continued)

(iii) the Manager Fee; and

(iv) all the other charges and expenses which may be charged against the relevant Fund which are described above as Administrative Expenses.

The All-in Fee does not include any costs and expenses incurred outside of the Funds' ordinary course of business such as legal fees incurred in prosecuting or defending a claim or allegation, by or against, the Funds. Transaction costs are payable by the ICAV.

DWS Qi Global AC Equity Fund and DWS Customised Global Investment Grade Bond Fund operate an All-in Fee arrangement with regards to its respective share classes as outlined in the Fund's Supplement and detailed below.

The total annual charges and expenses of the relevant Fund can differ for the various Classes. The total annual charges and expenses per annum of each of the Classes of the Fund are represented by the respective All-in Fee, outlined in the table below for the relevant Share Class Classification, and calculated per annum by reference to the NAV of the relevant Fund attributable to that class. The All-in Fee accrues daily and shall be paid monthly in arrears.

Manager Fee and Expenses

DWS Noor Precious Metals Securities Fund operates neither a Platform Fee arrangement nor an All-in Fee arrangement as detailed in the section of the Prospectus entitled Fee Structures. Instead the Fund operates with a Manager Fee paid to the Manager (the "Manager Fee") for the management of the Fund. In addition to the Manager Fee, fees and expenses of the Administrator and Depositary and other Administrative Expenses are payable by the DWS Noor Precious Metals Securities Fund as further described below.

The Manager receives a fee of 1.50% per annum of the Net Asset Value in respect of the Class USD LC and Class SGD LC Shares and 0.75% per annum of the Net Asset Value attributable to the Class USD IC Shares as specified in the table below. The Manager Fee will accrue daily and be payable quarterly in arrears. The Manager pays the fees of the Investment Manager and DWS Investment Management Americas Inc., the Sub-Investment Manager of the DWS Noor Precious Metals Securities Fund.

6. Financial instruments and associated risks

The ICAV's financial risk management objectives and policies are consistent with those disclosed in the ICAV's audited financial statements as at 31 December 2023.

7. Fair Value Hierarchy

The Funds are required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - Quoted market price in an active market for an identical instrument.
- Level 2 - Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 - Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. The determination of what constitutes 'observable' requires significant judgement by the Investment Manager. The Investment Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

The Funds recognise transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred. There were no transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the financial period ended 30 June 2024 and financial year ended 31 December 2023.

DWS Invest (IE) ICAV

NOTES TO THE CONDENSED FINANCIAL STATEMENTS (continued)

For the financial period ended 30 June 2024

7. Fair Value Hierarchy (continued)

As at 30 June 2024 and 31 December 2023 all financial assets and liabilities held at fair value through profit or loss investments were classified as Level 1, with the exception of corporate bonds and forward foreign currency exchange contracts which were Level 2 and one equity position Alrosa PJSC held by DWS Noor Precious Metals Securities Fund which is priced at nil and classified as Level 3 as at 30 June 2024 and 31 December 2023.

The carrying value of all the assets and liabilities measured at amortised cost approximates their fair value and are classified as Level 2 in the fair value hierarchy.

8. Related party disclosures
