The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Top Dividende

Share class LC Security code: DWS1U9 ISIN: DE000DWS1U90

Management Company: DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation in the medium to long term. In order to achieve this, the fund invests primarily in equities of domestic and foreign companies from which an above-average dividend yield is expected. When selecting equities, the following criteria shall be of decisive importance: dividend yield above the market average, sustainability of dividend yield and growth, historical and future earnings growth; price/earnings ratio. However, the dividend yields do not necessarily have to be above the market average. In this context, the selection of individual investments is the responsibility of the fund management. The currency of the fund is EUR, the currency of the share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund seeks to generate income from dividends, i.e. from expected distributions per equity. If a company distributes a smaller dividend than expected or no dividend at all, this can have a negative impact on the value of equities or derivatives. The fund may also invest in assets that are not denominated in euro. This can result in your investment falling in value if the euro exchange rate against these currencies increases. A more detailed description of risks and other general information can be found under "Risk warnings" in the sales prospectus.
