The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve the highest possible appreciation of capital. In order to achieve this, the fund invests in first-rate bonds with short to medium terms to maturity, in dividend-right certificates (Genussscheine) and predominantly in blue chips from European

issuers. Derivative financial instruments may be acquired for both investment and hedging purposes. In this context, the selection of individual investments is the responsibility of the fund management. The fund distributes annually. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified

in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The following risks could be of particular significance for the fund: The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
