

### Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS TRC Top Asien

ISIN: DE000DWS08Q4, Security code: DWS08Q, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

### Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to generate a return in euro. In order to achieve this, the fund invests at least 85% of its assets in shares of DWS Top Asien (the master fund). The objective of the investment policy of DWS Top Asien is to achieve sustained capital appreciation that exceeds the benchmark (50% MSCI AC Far East (RI), 50% MSCI AC Far East ex Japan (RI)). In order to achieve this, the fund invests primarily in high-quality equities of companies having their registered office or their principal business activity in Asia and that derive their revenues mainly from this region. In doing so, the following aspects shall be considered when selecting the equities: strong market position, sound financial ratios, better-than-average corporate management, strategic orientation of the company and shareholder-centered information policies. Besides the investment in the master fund, DWS TRC Top Asien can invest in bank balances and derivatives for hedging purposes. In addition, a

combination of suitable investment instruments can be used to partially hedge the equity market risk of the master fund. Up to 80% of the equity market risk of the master fund can be hedged in this way. The equity market risk is calculated at regular intervals. The level of hedging is determined using market risk and market rate of return indicators that are calculated daily and it is adjusted if defined threshold values are exceeded. This approach seeks to obtain the highest possible participation in the performance of the master fund in the case of a positive market assessment whereas, in the case of a negative market assessment (based on the results of the market risk and market rate of return indicators), the intention is to limit the influence of market movements and accordingly hedge the equity market risk. The performance of the fund can therefore differ to the performance of the master fund. The currency of the master fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore

relatively high. The following risks could be of particular significance for the fund: The fund invests a large proportion of its assets in another fund, the master fund. However, the risk/return profiles of the two funds differ significantly from one another because the fund strives to partially hedge the market risk of the master fund by using derivatives. The fund can return shares in the master fund on each valuation date and thereby create sufficient liquidity to also redeem its own shares on each valuation date and to pay the investors. The master fund can, however, suspend redemption under exceptional circumstances where this appears necessary in the interests of the investors. The fund may then also be forced to suspend redemption.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

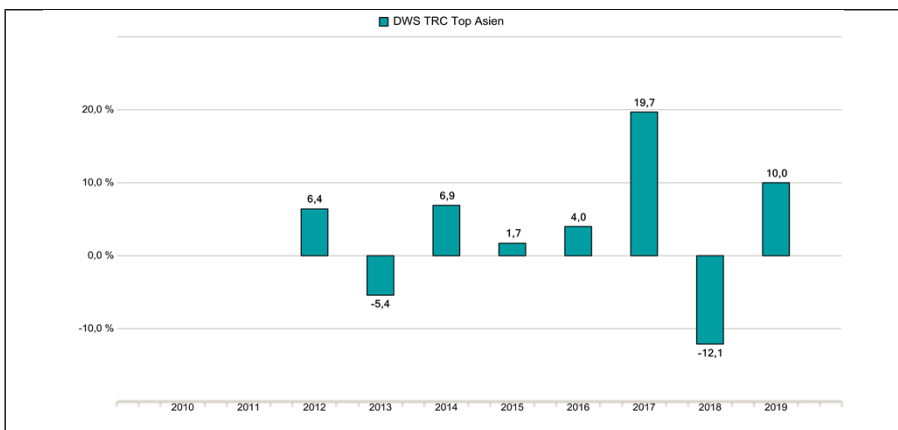

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4.00 %
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	1.50 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor. The ongoing charges figure is based on expenses for the fiscal year ending 30.09.2020. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any. Additional information on costs can be found in the cost section(s) of the prospectus.

### Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from DWS TRC Top Asien were deducted during the calculation. Entry and exit charges were not taken into account. DWS TRC Top Asien was launched in 2011.
