DWS Aktien Strategie Deutschland

Share class: ID, ISIN: DE000DWS2EC1, Security code: DWS2EC, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (HDAX (RI)). In order to achieve this, the fund mainly invests in equities of German issuers. Investments focus on blue-chips and on equities of fast-growing small and medium-sized enterprises. In addition, up to 25% of the fund volume may be invested in equities of foreign issuers. In this context, the selection of individual investments is the responsibility of the fund management. The majority of the fund's securities or their issuers are expected to be components of the benchmark. The fund management will use its discretion to invest in securities and sectors that are not included in the benchmark in order to take advantages of specific investment opportunities. It is expected that the portfolio will not necessarily have a similar

weighting to the benchmark. The positioning of the fund can deviate substantially from the benchmark (e.g., by holding positions that are not contained in the benchmark, as well as by a substantial underweighting or overweighting). The actual leeway in this respect is normally relatively high. In general, a deviation reflects the fund manager's assessment of the particular market situation. This may lead to a more defensive and narrower positioning or to a more active and broader positioning relative to the benchmark. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. The fund distributes annually. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not

represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund invests its assets in selected regions or sectors. This increases the risk that the fund may be negatively influenced by the economic and political conditions in the respective regions or sectors. The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
