

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Nomura Japan Growth

Share class: TFCH (P), ISIN: DE000DWS2SK4, Security code: DWS2SK, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to generate a return in euro. To achieve this, the fund invests at least 85% of its assets in shares of the JPY MFC share class of the DWS Invest Nomura Japan Growth (master fund). In addition, derivatives are used for currency hedging purposes. The objective of the investment policy of DWS Invest Nomura Japan Growth ("master fund") is to achieve the highest possible appreciation. To

achieve this, the fund invests mainly in equities of large-cap and mid-cap companies that have their registered office in Japan and that profit from structural change in Japan. In this context, the fund management is responsible for selecting the individual investments. The currency of the master fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund invests a large proportion of its assets in another fund, the

master fund. Nonetheless, the performance of the two funds can vary, as the fund itself can invest up to 15% in cash at bank. The fund can return shares in the master fund on each valuation date and thereby create sufficient liquidity to also redeem its own shares on each valuation date and to pay the investors. The master fund can, however, suspend redemption under exceptional circumstances where this appears necessary in the interests of the investors. The fund may then also be forced to suspend redemption. The master fund invests its assets in selected regions or sectors. This increases the risk that the master fund may be negatively influenced by the economic and political conditions in the respective regions or sectors. The master fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.83 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2020. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the TFCH (P) share class of DWS Nomura Japan Growth were deducted during the calculation. The TFCH (P) share class of DWS Nomura Japan Growth was launched in 2018.
