

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DWS Eurozone Bonds Flexible

Share class: TFC, ISIN: DE000DWS2NP4, Security code: DWS2NP, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation. To achieve this, the fund invests primarily in government bonds, bonds of near-government issuers and covered bonds that are invested by issuers from the euro area. Corporate bonds, bonds of issuers from the emerging

markets, subordinated securities, asset-backed securities and convertible bonds may be added in. The selection of the individual investments is at the discretion of the fund management. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively

low. The following risks could be of particular significance for the fund: The fund invests in financial instruments that are basically sufficiently liquid but which may be illiquid under certain circumstances. This means that regular trade may be temporarily disrupted or impossible. The fund concludes transactions with various contractual partners. If the contracting partner becomes insolvent, for example, this can lead to payment defaults. The fund acquires securities of various issuers. In addition to general trends on capital markets, the particular developments at the respective issuer affect the price of a security. The risk of a decline in the assets of issuers cannot be entirely eliminated even through careful selection of securities.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
