This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified

in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
