## DWS Euro Bond Fund

**Share class: LD, ISIN: DE0008476516, Security code: 847651, Currency: EUR**

The management company is DWS Investment GmbH, a member of the DWS Group.

### Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (iBoxx Euro Overall (RI)). To achieve this, the fund invests in government bonds that are denominated in euro, bonds of near-government issuers and covered bonds. Near-government issuers include central banks, government authorities, regional authorities and supra-national institutions. Corporate bonds may be added in. The selection of the individual investments is at the discretion of the fund management. The majority of the fund's securities or their issuers are expected to be components of the benchmark. The fund management will use its discretion to invest in e.g. securities, sectors, ratings that are not included in the benchmark in order to

take advantage of specific investment opportunities. It is expected that the portfolio will have a similar weighting to the benchmark. The positioning of the fund can deviate from the benchmark to a limited extent (e.g., by holding positions that are not contained in the benchmark, as well as by an underweighting or overweighting). The actual leeway in this respect is normally relatively low. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. The fund distributes annually. You may request the redemption of shares generally on a daily basis.

### Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not

represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The following risks could be of particular significance for the fund: The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse effect on the value of the bond.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
