DWS Vermögensbildungsfonds I

Share class: TFC, ISIN: DE000DWS2NM1, Security code: DWS2NM, Currency: EUR

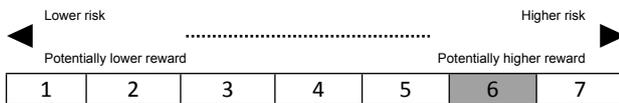

The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (MSCI World TR Net). In order to achieve this, the fund mainly invests in equities of domestic and foreign issuers. These equities shall primarily be those issued by large companies from a variety of different industrial sectors and by medium-sized and smaller companies that offer favorable growth and earnings prospects over a longer term on the basis of their configuration and structure. In this context, the selection of individual investments is the responsibility of the fund management. The majority of the fund's securities or their issuers are expected to be components of the benchmark. The fund management will use its discretion to invest in securities and sectors that are not included in the benchmark in

order to take advantages of specific investment opportunities. The strategy provides investors with access to the market for global issuers. The fund's positioning may deviate substantially from the benchmark (e.g., due to a positioning outside of the benchmark or considerable underweighting or overweighting). Due to the fund strategy characteristics already mentioned, the portfolio's deviation from the benchmark is generally relatively high. Despite the fact that the fund aims to outperform the benchmark, the potential outperformance might be limited depending on the prevailing market environment (e.g. less volatile market environment) and actual positioning versus the benchmark. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a

fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
