Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve sustainable capital growth. To achieve this, the fund invests in equities, interest-bearing securities, convertible debentures, warrant-linked bonds, warrants, dividend-right certificates (Genussscheine) and index certificates of domestic and foreign issuers. At least 51% of the fund comprises mortgage bonds, municipal bonds or other bearer bonds issued in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area. In addition to financial

strength, there is also a focus on environmental, social and corporate governance factors ("ESG criteria") when selecting investments. The selection of the individual investments is at the discretion of the fund management. The currency of the fund is EUR. The fund distributes annually. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified

in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund uses derivatives on underlyings so as to participate in their increases in value or to bet on their losses in value. The increased opportunities associated with this are accompanied by increased risk of loss. Furthermore, derivative transactions may be used to hedge the fund's assets. The use of derivative transactions for hedging purposes may reduce the fund's upside opportunities. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
