

### Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Global Hybrid Bond Fund

Share class: FD, ISIN: DE000DWS1U58, Security code: DWS1U5, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

### Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation. To achieve this, the fund invests predominantly in hybrid bonds. Hybrid bonds are equity-like, subordinated corporate bonds with very long maturities or without a maturity date; they can be terminated by the issuer as of a previously defined date. In terms of their characteristics, they lie between equities and fixed rate securities. The selection of the individual investments is at the discretion of the fund management.

The fund promotes environmental and social characteristics or a combination of these characteristics without pursuing an explicit ESG and/or sustainable investment strategy. The currency of the fund is EUR. The fund distributes annually. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

### Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The

fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of a payment default may also fluctuate among issuers. The fund invests in financial instruments that are basically sufficiently liquid but which may be illiquid under certain circumstances. This means that regular trade may be temporarily disrupted or impossible. The fund invests in contingent convertible bonds. Compared to traditional bonds, this type of bond may be more likely to result in partial or complete loss of value. An investment in this special type of bond may result in substantial losses for the portfolio due to certain trigger events. Bonds of this type can also be converted into equities of the issuing company, which may also suffer a loss in value.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

### Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	1.73 %
Charges taken from the fund under certain specific conditions	
Performance fee	None
Securities lending fees	0.01 %

The ongoing charges figure is based on expenses for the fiscal year ending 30.09.2021. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

### Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the FD share class of DWS Global Hybrid Bond Fund were deducted during the calculation. The FD share class of DWS Global Hybrid Bond Fund was launched in 2014.
