The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Champions Select Balance

Share class: VC, ISIN: DE000DWS2W30, Security code: DWS2W3, Currency: EUR

The management company is DWS Investment GmbH, a member of the DWS Group.

Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to generate the highest possible appreciation in the long term. To achieve this, the fund invests especially in other funds, but also in equities, interest-bearing securities, money market instruments and derivatives. Suitable investment fund units are selected using the principle of risk diversification and with a focus on particularly attractive characteristics ("champions"), i.e. taking into account qualitative and quantitative criteria such as long-term investment performance, consistent investment process and external fund ratings. An emphasis is placed not only on investments with a high

appreciation potential but also on investments with a less high appreciation potential that are typically subject to only limited fluctuations in value. In that context, the fund management is responsible for selecting the individual investments. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis. The Company may, however, suspend or restrict the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not

represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund invests substantially in other funds. When investments are made in other funds, it must be taken into consideration that multiple target funds may pursue the same or mutually opposing investment strategies. This may result in lower diversification effects.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
