

DWS Investment GmbH

DWS WellCare

Sales Prospectus including Terms and Conditions of Investment

21. May 2025

Investors for a new now

Country Supplement Additional Information for Unitholders in Ireland

This Supplement contains specific information for Unitholders in Ireland investing in DWS WellCare (the UCI), an open-ended fund constituted as a UCITS Compliant Investment Fund governed by the laws of Germany and authorised by the Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin) of Germany as a UCITS pursuant to the Regulations.

This Supplement forms part of and should be read in conjunction with the general description of the UCI contained in the Prospectus dated 21/05/2025.

The Directors of the Management Company, whose names appear in the Management and Administration section of the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Dated February 1, 2024

An OGAW which intends to market its units in the State shall make available in the State facilities to perform a number of tasks as set out in legislation.

Facilities

The institutions or persons listed below will provide the facilities to Irish investors.

Issue and Redemption of Shares, Subscription and Payment Procedure

1. Process subscriptions, repurchase and redemption orders and make other payments to unit-holders relating to the units of the OGAW:

The facilities to Shareholders shall be provided by State Street Bank International GmbH at Solmsstr. 83, Frankfurt am Main, Germany and DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Tel: +49 (0) 69 910 - 12371, info@dws.com

2. Provide investors with information on how orders can be made and how repurchase and redemption proceeds are paid:

The facilities to Shareholders shall be provided by DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Tel: +49 (0) 69 910 - 12371, info@dws.com

3. Facilitate the handling of information and access to procedures and arrangements referred to in Article 15 of Directive 2009/65/EC relating to investors' exercise of their rights arising from their investment in the OGAW in the Member State where the OGAW is marketed:

The facilities to Shareholders shall be provided by DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Tel: +49 (0) 69 910 - 12371, info@dws.com

4. Make the information and documents required pursuant to Chapter IX of Directive 2009/65/EC available to investors in the English language to be inspected free of charge and copies to be obtained free of charge:
 - i) the current Prospectus, supplements or key investor information document, as applicable, and any addenda or amendments thereto of the Company;

- ii) the annual and half-yearly reports of the Company most recently prepared and published; and
- iii) any other documents required to be made available in accordance with applicable laws and regulations of Ireland:

The facilities to Shareholders shall be provided by DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Tel: +49 (0) 69 910 - 12371, info@dws.com

5. Provide investors with information relevant to the tasks that the facilities perform in a durable medium:

The facilities to Shareholders shall be provided by DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Tel: +49 (0) 69 910 - 12371, info@dws.com

6. Act as a contact point for communicating with the competent authorities:

The facilities to Shareholders shall be provided by DWS Investment GmbH at Mainzer Landstraße 11-17, 60329 Frankfurt am Main, Germany, ldm.mutualfunds@db.com

Marketing in Ireland

It is the current intention of the Management Company on behalf of the UCI to market its units to institutional clients such as asset managers, private banks, family offices, stockbrokers, wealth managers and advisers. At present, it is not intended to market directly to retail investors, however retail investors may invest through the brokers or wealth advisers.

Publications

The Management Company on behalf of the UCI may arrange for the publication of the Net Asset Value per Unit on the following website: www.dws.de.

Irish Taxation

The following information is based on the law in force in Ireland as of the date of this Supplement. This summary deals only with Units held as capital assets by Irish resident Unitholders and does not address special classes of Unitholders such as dealers in securities or persons that may be exempt from tax such as Irish pension funds and charities. This summary is not exhaustive and Unitholders are advised to consult their own tax advisors with respect to the taxation consequences of the ownership or disposition of Units.

The UCI

It is the intention of the Directors to conduct the affairs of the UCI so that it is neither resident in Ireland for tax purposes nor carrying on a trade in Ireland through a branch or agency. Accordingly, the UCI will not be subject to Irish corporation tax.

Irish Unitholders

(a) Tax generally

Units in the UCI are likely to constitute a “material interest” in an offshore fund for the purposes of Chapter 4 of Part 27 of the Taxes Consolidation Act 1997.

(b) Reporting of acquisition

An Irish resident or ordinarily resident person acquiring Units in the UCI is required to disclose details of the acquisition in his annual tax return. Where an intermediary in the course of carrying on a business in Ireland acquires Units in the UCI it must report details of the acquisition to the Irish Revenue Commissioners.

(c) Income and capital gains

An Irish resident corporate Unitholder will be liable to corporation tax at 25% on income distributions received from the UCI, except where the corporate Unitholder holds the Units as part its trading activities in which case the rate of corporation tax applicable will be that applicable to trading income.

An Irish resident corporate Unitholder which disposes of Units in the UCI will be liable for corporation tax at a rate of 25% on the amount of any gain arising, except where the corporate Unitholder holds the Units as part its trading activities in which case the rate of corporation tax applicable will be that applicable to trading income. It should be noted that no indexation allowance is available in respect of the gain.

Where an Irish resident or ordinarily resident person who is not a company holds Units in the UCI and receives an income distribution from the UCI, that Unitholder will be liable to Irish tax at 41%, on the amount of such distribution.

Where an Irish resident or ordinarily resident person who is not a company disposes of a Unit, a liability to Irish tax at the 41% will arise on the amount of the gain. No indexation allowance is available and the death of a Unitholder would constitute a deemed disposal of a Unit.

There is a deemed disposal and reacquisition at market value for the purposes of Irish tax of Units held by an Irish resident or ordinarily resident investor on a rolling eight year basis where the Units are acquired on or after January 1, 2001. This deemed disposal takes place at market value so that Irish resident or ordinarily resident Unitholders will be subject to tax at the rate of 41% for individuals or 25% for a corporate Unitholder on the increase in value of their Units at eight year intervals commencing on the 8th anniversary of the date of acquisition of the Units.

To the extent that any tax arises on such a deemed disposal such tax will be taken into account to ensure that any tax payable on the subsequent encashment, redemption, cancellation or transfer of the relevant Units does not exceed the tax that would have arisen had the deemed disposal not occurred.

Anti-avoidance provision

There is an anti-avoidance provision imposing higher rates of tax on Irish resident investors in “personal portfolio investment undertakings” (PPIU). A PPIU is a fund in which the investor, or a person connected with the investor, has a right under the terms of the fund or any other agreement, to influence the selection of the assets of the fund. If a fund is treated as a PPIU the Irish resident investor can suffer tax at rates of up to 60% on

amounts received from the fund where an income tax return has been filed (or 80% where no income tax return is filed), or on the rolling eight year deemed disposal.

Specific exemptions apply where the ability to select the property invested in has been clearly identified in the offshore fund's marketing and promotional literature and the investment is widely marketed to the public.

Withholding obligation on paying agents

If any dividend is paid through an encashment agent established in Ireland such an agent would be obliged to deduct tax from such dividend at the rate of 25% and account for this to the Revenue Commissioners. The recipient of the dividend would be entitled to claim a credit for the sum deducted by the paying agent against his tax liability for the relevant year.

Stamp duty

Transfers for cash of Units in the UCI will not be subject to Irish stamp duty.

Gift and inheritance tax

A gift or inheritance of Units in the UCI received from a person who is resident or ordinarily resident in Ireland or received by such a person will be within the charge to Irish capital acquisitions tax. Capital acquisitions tax is charged at a rate of 33% above a tax free threshold which is determined by the amount of the benefit and of previous benefits within the charge to capital acquisitions tax, and the relationship between the person treated as disposing of such Units and the successor or donee. Tax chargeable on a gain arising on a deemed disposal by an individual on their death shall be treated as an amount paid in respect of capital gains tax for the purposes of crediting such amount paid against gift or inheritance tax arising on such death.

Transfers between Sub-Funds (for umbrella funds only)

The Directors have been advised that in the Republic of Ireland the exchange of Units in one Sub-Fund for Units in another Sub-Fund of an umbrella scheme will not in itself constitute a disposal of such Units and will not give rise to a charge to tax.

FATCA/CRS

To the extent that the UCI may be a financial institution for the purposes of FATCA and/or CRS it may require unitholders to provide information to the UCI (or Management Company on behalf of UCI) to comply with its obligations under those automatic exchange of information regimes. (Further information on FATCA and CRS can be found in the Prospectus).

DWS Investment GmbH currently manages the following investment undertakings (as of: May 21, 2025):

Investment undertakings compliant with the UCITS Directive

AL GlobalDynamik	DWS ESG Qi LowVol Europe	DWS Qi Extra Bond Total Return

Sales Prospectus – General Section

Notice regarding the Sales Prospectus

The purchase and sale of units of investment funds discussed in this Sales Prospectus takes place on the basis of the respective applicable versions of the Sales Prospectus, the Key Information Document and the General Terms and Conditions of Investment in conjunction with the Special Terms and Conditions of Investment. The General Terms and Conditions of Investment and the Special Terms and Conditions of Investment are annexed to this Sales Prospectus.

The Sales Prospectus, together with the most recently published annual report and any semiannual report published after the annual report, must be provided free of charge upon request to persons interested in purchasing a unit of this investment fund as well as to each investor in the investment fund. In addition, the Key Information Document must be provided free of charge to the interested persons in good time before entering into any agreement.

Information or statements other than those contained in the Sales Prospectus must not be provided. Any purchase and sale of units on the basis of information or statements not contained in the Sales Prospectus or in the Key Information Document shall be at the exclusive risk of the purchaser. The Sales Prospectus is supplemented by the most recent annual report and by any semiannual report published after the annual report.

This Sales Prospectus consists of a general section and a special section. The general section contains general regulations on the type of investment fund discussed in this Sales Prospectus. Special, partly restrictive and specific regulations for the relevant investment fund are set forth in the special section.

Investment restrictions

The units of this investment fund that have been issued may be offered for sale or sold to the public only in countries where such an offer or such a sale is permissible. Unless DWS Investment GmbH (the "Company"), or a third party authorized by it, has obtained permission to do so from the local regulatory authorities, this Sales Prospectus does not constitute a solicitation to purchase investment fund units, nor may this Sales Prospectus be used for the purpose of soliciting the purchase of investment fund units.

This Sales Prospectus may be used for sales purposes only by persons who have express written authorization from the Company (granted directly or indirectly via authorized sales agents) to do so.

The Company continuously examines the requirements that statutory regulations – including

those of other states – impose on it. It may therefore be necessary for investors to produce the required documents as evidence, especially with regard to money laundering or tax residency.

Investment restrictions for U.S. persons

The units hereby offered were not approved by the United States Securities and Exchange Commission ("SEC") or by another government authority of the United States of America, and neither the SEC nor another authority of the United States of America has checked the accuracy or the suitability of this Sales Prospectus. The units are offered and sold outside of the United States of America in compliance with Regulation S of the United States Securities Act of 1933, as amended (the Securities Act). Any person that is a U.S. person (in accordance with the definition of the term "U.S. person" according to Regulation S of the Securities Act) is not entitled to invest in the fund. The Company was not and will not be registered as an investment company according to the United States Investment Company Act of 1940 as amended ("Investment Company Act") and is therefore not subject to the provisions of the Investment Company Act, which is designed to protect investors in registered investment companies.

The units may not be sold, assigned, transferred, pledged or transferred as collateral to U.S. persons, attributed to U.S. persons, encumbered with rights of U.S. persons or exchanged with U.S. persons, and derivative contracts, swaps, structured notes or other agreements may not grant U.S. persons rights to units directly, indirectly or synthetically, or subject U.S. persons to the provisions of such agreements in relation to the units (each referred to as "transfer"). Any such transfer to a U.S. person is null and void.

Most important legal implications of the contractual relationship

By purchasing units, the investor becomes a joint owner, on a fractional basis, of the assets held by this fund. The investor has no control over the assets. Subject to the information in the special section, there are no voting rights associated with the units.

All publications and advertising documentation are prepared in German or accompanied by a translation into German. The Company may declare translations of the Sales Prospectus into the languages of those countries where units of the fund may be offered for sale to the public to be binding. Otherwise, in the event of discrepancies between the German version of the Sales Prospectus and any translation, the German version shall always prevail. Moreover, the Company will conduct the entire communication with its investors in German, in the language of the country in which the investment fund is authorized for public distribution, or in English.

Enforcement of rights

The legal relationship between the Company and the investor as well as contractual relationships are governed by German law. The location of the registered office of the Company shall be the place of jurisdiction for any legal claims on the part of the investor against the Company arising from this contractual relationship. Investors who are consumers (see definition below) and who reside in another EU country may also bring a legal claim before a competent court in their country of residence.

Consumers are natural persons who invest in the fund for a purpose that is primarily related to neither their commercial activity nor their independent professional activity, meaning that they trade for private purposes.

To enforce their rights, investors may seek recourse from the ordinary courts or, if available, initiate proceedings for alternative dispute resolution.

The Company has undertaken to participate in dispute resolution proceedings of a consumer arbitration office.

In the case of disputes, consumers may contact the investment funds ombudsman's office ("Ombudsstelle für Investmentfonds") at BVI Bundesverband Investment und Asset Management e.V. as the competent consumer arbitration office. The Company participates in dispute resolution proceedings before this arbitration office.

The Ombudsstelle für Investmentfonds can be contacted at:

Büro der Ombudsstelle (Office of the Ombudsman) of BVI Bundesverband Investment und Asset Management e.V.
Unter den Linden 42
10117 Berlin, Germany
Tel.: +49 (0)30 - 6449046-0
Fax: +49 (0)30 - 6449046-29
E-mail: info@ombudsstelle-investmentfonds.de
www.ombudsstelle-investmentfonds.de

In the case of disputes relating to sales contracts or service contracts concluded by electronic means, consumers may also contact the EU's online dispute resolution platform (www.ec.europa.eu/consumers/odr). The following e-mail can be used as the contact address for the Company: info@dws.com. The platform itself is not a dispute resolution office, but instead merely puts the parties into contact with a competent national arbitration office.

The right of recourse to the courts shall not be affected by dispute resolution proceedings.

General principles

The investment fund (the feeder fund)

This investment fund (hereinafter “fund” or “feeder fund”) is a collective investment undertaking (“investment undertaking”), which collects capital from a number of investors in order to invest it according to a defined investment policy for the benefit of those investors. The fund is a feeder fund pursuant to European Directive 2009/65/EC as amended (“UCITS”), as defined by the German Investment Code (“KAGB”). It is managed by the Company. The Company invests the capital deposited with it in its own name for the collective account of the investors in the form of investment funds pursuant to the principle of risk spreading in assets permitted under the KAGB, but separate from its own assets. The fund is a UCITS-compliant feeder fund as defined by article 1 (19), no. 11, KAGB. The master fund within the meaning of article 1 (19), no. 12, KAGB is DWS Invest WellCare (“master fund”), which is managed by DWS Investment S.A. and is a sub-fund of DWS Invest, an investment company with variable capital (“SICAV”) that is organized under Luxembourg law. Because it is a feeder fund, the fund permanently invests at least 85% of its assets in shares of the master fund. The feeder fund is not part of the Company’s insolvency assets.

The business objective of the feeder fund is limited to the investment of capital according to a defined investment strategy in a collective asset management structure using the funds deposited with it; all operating activities and active commercial usage of the assets held are excluded.

The assets in which the Company may invest investor monies, and the provisions to be complied with when so doing, are stated in the KAGB and associated regulations, as well as in the German Investment Tax Act (“InvStG”) and in the Terms and Conditions of Investment, which govern the legal relationship between the investors and the Company. The Terms and Conditions of Investment contain a general section and a special section (“General Terms and Conditions of Investment” and “Special Terms and Conditions of Investment”).

Sales documents and disclosure of information on risk management

The Sales Prospectus, the Key Information Document and the Terms and Conditions of Investment, as well as the most recent annual and semiannual reports of the feeder fund, are available free of charge on the Company’s website www.dws.com.

Additional information on risk management investment limitation for the fund, risk management methods and the latest developments concerning risks and returns of the most important categories of assets, as well as on the composition of the portfolio structure, are

available from the Company in electronic or written form.

If the Company provides additional information on the composition of the fund portfolio or its performance to individual investors, it will simultaneously make this information available to all investors in the fund free of charge.

Disclosure of sales information in accordance with MiFID 2

Investors may obtain additional information on the target market and on product costs resulting from the implementation of the provisions of Directive 2014/65/EU of the European Parliament and of the Council on markets and financial instruments and the amendment of Directives 2002/92/EC and 2011/61/EU (hereinafter referred to as “MiFID 2 Directive” or “MiFID 2”), which the Company makes available to distributors.

The Company provides additional information to distribution agents and distribution partners concerning the profile of a typical investor or the target client group for this financial product. If the investor is advised on the acquisition of units by distribution agents or distribution partners, or if such agents or partners act as intermediaries for the purchase of units, they may therefore present additional information to the investor that also relates to the profile of a typical investor.

Terms and Conditions of Investment and amendments thereto

The text of the Terms and Conditions of Investment is annexed to this Sales Prospectus in this document. The Terms and Conditions of Investment may be amended by the Company. Amendments to the Terms and Conditions of Investment require the approval of the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, “BaFin”). Amendments to the fund’s investment principles are only permitted on the condition that the Company makes an offer to investors either to redeem their units at no additional cost prior to the amendments taking effect or to exchange their units, free of charge, for units of investment undertakings having comparable investment principles, provided such investment undertakings are managed by the Company or by another entity belonging to its group of companies.

Any proposed amendments shall be announced in the Bundesanzeiger (Federal Gazette) and on the Internet at www.dws.com. If the amendments relate to fees and expense reimbursements that may be charged to the feeder fund, or if they involve a change of the master fund, or any other investment principles of the feeder fund, or significant investor rights, investors shall additionally be informed of this through the institutions maintaining their custody accounts. This shall be done by means of a medium on which information for one of the information purposes can, for an adequate period of time, be stored, viewed and reproduced without modification, such as on paper or in electronic

format (“durable medium”). This information shall include the material content of the proposed amendments and their background, the rights of investors in connection with the amendments, as well as a notice indicating where and how more information can be obtained.

In the event of a change of the master fund, investors shall also receive the following information and documentation:

- a statement that BaFin has approved the investment in the new master fund,
- the new Key Information Document of this feeder fund and of the new master fund,
- the date from which the vast majority of the feeder fund will be invested in shares of the new master fund, and
- a statement indicating that investors have the right to request the redemption of their units for at least 30 days before this date without any charges except, where applicable, any charges incurred to cover redemption costs.

The earliest date on which amendments shall come into force is on the day following their publication. Amendments to the provisions concerning fees and reimbursement of expenses shall come into force no earlier than four weeks after their publication unless an earlier date has been specified with the consent of BaFin. A change of master fund or other changes to the current investment principles of the feeder fund shall also come into force no earlier than four weeks after their publication.

Management Company

Company name, legal form and registered office

The Company is an asset management company as defined by the KAGB founded on May 22, 1956, in the legal form of a company with limited liability (Gesellschaft mit beschränkter Haftung; GmbH). The name of the Company is DWS Investment GmbH. The Company has its registered office at Mainzer Landstraße 11–17, 60329 Frankfurt/Main, Germany, and is registered in Part B of the Commercial Register of the Frankfurt/Main Local Court under the number HRB 9135.

The Company has an authorization as a UCITS asset management company and as an AIF asset management company under the KAGB. The Company is authorized to manage UCITS according to article 1 (2) in conjunction with articles 192 et seq. KAGB, “Mixed” investment undertakings according to articles 218 et seq. KAGB, “Other” investment undertakings according to articles 220 et seq. KAGB and retirement investment funds according to article 347 KAGB in conjunction with article 87 of the Investment Act in the version applicable until July 21, 2013, as well as open-ended domestic institutional AIFs with fixed terms and conditions of investment according to article 284 KAGB that invest in the assets named in article 284 (1) and (2) KAGB with the exception

of the assets named in article 284 (2) (e) and (f) KAGB. In addition, the Company is authorized to manage EU investment undertakings or foreign AIFs whose permissible assets correspond to those for domestic investment undertakings.

Management and supervisory board

For further information on the management of the Company and the composition of its supervisory board, please consult the final section of this Sales Prospectus.

Equity capital and additional own funds

The Company has capital stock in the amount of EUR 115 million (as of December 31, 2020). The liable equity capital of the Company is EUR 398.4 million (as of December 31, 2020).

The Company has accounted for the professional liability risks that arise from the management of investment undertakings that do not comply with the UCITS Directive, Alternative Investment Funds ("AIF"), and which are due to professional negligence by its governing bodies or employees, with own funds in the amount of at least 0.01% of the value of all AIF portfolios under management; this amount shall be reviewed and adjusted annually. These own funds are included in the paid in capital.

Custodian

Identity of the custodian

The credit institution State Street Bank International GmbH, whose registered office is

located at Brienner Straße 59, 80333 Munich, Germany, has assumed the function of custodian for the feeder fund. The custodian is a credit institution under German law.

Functions of the custodian

The KAGB provides for a separation of the duties of management and custody for investment funds. The custodian keeps the fund's assets in blocked custody and cash accounts. For assets that cannot be held in custody, the custodian checks whether the Company has acquired ownership of these assets. The custodian monitors whether the Company's use of the assets is in compliance with the provisions of the KAGB and the Terms and Conditions of Investment. The investment in bank balances at another credit institution, as well as the use of such bank balances, are permissible only with the consent of the custodian. The custodian must grant its consent if such investment or use of assets is consistent with the Terms and Conditions of Investment and the provisions of the KAGB.

The custodian additionally has the following duties, in particular:

- Issuing and redeeming units of the feeder fund;
- Ensuring that the issue and redemption of units, as well as the determination of the net asset value per unit, comply with the provisions of the KAGB and the Terms and Conditions of Investment of the feeder fund;
- Ensuring that, for transactions conducted for the collective account of the investors,

custody of the equivalent value is taken within the customary time limits;

- Ensuring that the income of the feeder fund is used as provided for by the KAGB and Terms and Conditions of Investment;
- Monitoring borrowing by the Company for the account of the feeder fund and, where required, consenting to such borrowing;
- Ensuring that collateral for securities loans has been provided in a legally valid manner and is available at all times.

Sub-custody

The Company has received the functions and information outlined in this section "Sub-custody" from the custodian and thus relies on the timely provision of complete and correct data and information by the custodian.

The custodian has appointed State Street Bank & Trust Company, with its registered office at One Congress Street, Suite 1, Boston, Massachusetts 02114-2016, USA, as its global custodian ("Global custodian") to hold foreign assets in custody. The Global custodian in turn has delegated the custodial duties to various sub-custodians domiciled in the countries listed below so that the foreign assets may be held in custody in the respective countries.

In the countries below, the Global custodian has delegated the custody of the assets to the sub-custodians listed:

* Variant 1: No conflicts of interest are identified. Potential conflicts of interest would be mitigated by the configuration of the custodian/sub-custodian contract.

Variant 2: The sub-custodian is a company affiliated with the Management Company.

Additional information

The list of sub-custodians is current as of the date indicated on the title page of this Sales Prospectus. Upon request, the Company will provide investors with the most up-to-date information on the custodian and its obligations, as well as on the sub-custodians and on any possible and actual conflicts of interest in connection with the activity of the custodian or the sub-custodians. An updated list of sub-custodians can also be found on the Internet at <https://www.dws.com/en-lu/footer/Legal-Resources>.

In addition to keeping actual custody of foreign assets at the foreign sub-custodian according to the laws and customs of the respective country of custody, the foreign sub-custodian additionally provides for the redemption of interest, dividend and income coupons, and for the redemption of securities repayable at maturity. Furthermore, the sub-custodian forwards information on corporate actions relating to the foreign securities held in custody.

According to the custodian, actual and potential conflicts of interest arising in relation to the Global custodian at the first sub-custodian level are handled in conformity with the law. For more information, refer to the explanations below.

The custodian has informed the Company that it handles conflicts of interest as summarized below:

The custodian's Compliance department is tasked with the function of the "independent bodies" required in accordance with article 70 (2), sentence 4, KAGB or article 85 (2), sentence 4, KAGB.

The schedule of responsibilities and the organizational structure of the custodian comply with the statutory and regulatory requirements according to information provided to the Company and, in particular, satisfy the requirement for preventing conflicts of interest. The division that initiates lending transactions and has a vote in lending decisions ("Front Office") and the "Trading" division up to and including the management level are therefore kept separate from the division that has an additional vote in lending decisions ("Back Office"). This separation also applies to the functions that monitor and communicate risks ("Risk Controlling") and the functions responsible for settlement and control of lending transactions and settlement and control of trading transactions. According to information disclosed to the Company, custodial operations are also completely separate from the business units that provide services associated with collateral management, for example for securities lending transactions ("Collateral Management Services"), and carrying out fund administration insourcing activities ("KVG Backoffice Insourcing"). In cases where the duties of the asset management company are insourced, the "division solution" as defined in BaFin Circular 05/2020 (WA) on the Tasks and Duties of the custodian or BaFin Circular 01/2017 (WA) on the Minimum Requirements on Risk Management for Investment Companies (KAMaRisk) has been implemented

with regard to spatial and personnel as well as functional and hierarchical separation, according to the custodian.

As per information provided to the Company, the custodian's Conflict of Interest Policy covers the full range of conflict of interest issues from both the WpHG perspective and the custodian perspective, and prescribes the use of various methods to prevent conflicts of interest. A short summary of these is provided below:

1. Control of information flow:
 - Guidelines for Chinese Walls and their management
 - Transfer of information within the company on a strict "need to know" basis.
 - Access rights to information and physical access rights to company departments. For instance, the technical systems in place currently ensure that the provision of fund administration insourcing services is completely separate from custodial services.
 - Guidelines on wall crossing
2. Separate monitoring of relevant persons.
3. No harmful dependencies in the compensation system.
4. No detrimental influence by employees on other employees.
5. Avoidance of giving an employee responsibility for various activities which, if carried out simultaneously, may give rise to conflicts of interest.
6. As a last resort, notification of the affected clients of conflicts of interest not sufficiently avoidable or controllable.

Liability of the custodian

The custodian is generally responsible for all assets held in custody by it, or by another institution with its consent. In the case of a loss of such an asset, the custodian is liable to the feeder fund and its investors, unless such loss is attributable to events beyond the influence of the custodian. For losses that are not losses of assets, the custodian is generally only liable if it has failed to meet its obligations pursuant to the provisions of the KAGB and if such failure was at least negligent.

Additional information

Upon request, the Company will provide investors with the most up-to-date information on the custodian and its obligations, on the sub-

custodians, as well as on possible conflicts of interest in connection with the activities of the custodian or of the sub-custodians.

Risk warnings

The risks associated with an investment in the feeder fund are closely related to the risks arising from the assets held in the master fund. These risks can be reduced, however, by the diversification of investments within the master fund.

It is generally not possible for the Company to control the management of the master fund. Its investment decisions do not necessarily have to concur with the Company's assumptions or expectations. According to its terms of contract, at least 85% of the feeder fund's assets must at all times be invested in shares of the master fund. The Company must comply with this requirement even if these shares return a negative performance.

Before making any decision to purchase units of the feeder fund, investors should read carefully the following risk warnings together with the other information contained in this Sales Prospectus, and give due consideration to them when making their investment decision. The occurrence of one or more of these risks by itself or in combination with other circumstances can adversely affect the performance of the feeder fund, or of the assets held in the feeder fund, and may consequently have an adverse effect on the net asset value per unit. If the investor sells units of the feeder fund on a date at which the prices of the assets contained in the feeder fund have fallen in relation to the date at which the units were purchased, the investor will get back none or less than the full amount of the capital invested in the fund.

The investor could lose part or even all of the capital invested in the feeder fund. Appreciation of capital cannot be guaranteed. The investor's risk is limited to the sum invested. There is no obligation to make subsequent payments in addition to the capital invested by the investor. Aside from the risks and uncertainties described in what follows, or elsewhere in the Sales Prospectus, the performance of the fund might also be adversely affected by various other risks and uncertainties that are currently unknown. The order in which the following risks are listed shall not be construed as an indication either of

the probability of their occurrence or of the scope or significance of the occurrence of particular risks.

Risks of investing in the feeder fund

In the following, the risks typically associated with an investment in this feeder fund are presented. These risks can have an adverse effect on the net asset value per unit, on the capital invested by the investor and on the investor's planned holding period for the fund investment.

Fluctuation of the fund's net asset value per unit

The net asset value per unit is calculated as the value of the fund divided by the number of units in circulation. The value of the fund is equal to the sum of the market values of all assets held in the fund, less the market values of all liabilities of the fund. The fund's net asset value per unit is thus dependent on the assets held in the fund and on the amount of the fund's liabilities. If the value of these assets declines, or if the value of the liabilities rises, the fund's net asset value per unit falls.

Impact of tax aspects on individual results

The tax treatment of investment income depends on the individual circumstances of the respective investor, and may be subject to change in the future. The investor should consult their personal tax advisor on investor-specific issues – giving particular consideration to the personal tax situation.

Amendment of the investment policy and of the Terms and Conditions of Investment

The Company can change the Terms and Conditions of Investment with the approval of BaFin. A change in the Terms and Conditions of Investment can also change regulations affecting the investor. For instance, by changing the Terms and Conditions of Investment, the Company can change the fund's investment policy or increase the costs to be charged to the fund. The Company can additionally change the investment policy within the statutorily and contractually permissible investment spectrum, and thus without changing the Terms and Conditions of Investment and without BaFin approval. This can result in a change to the risk associated with the fund.

Restriction of the redemption of units

Unless stated otherwise in the special section and in the Terms and Conditions of Investment, the Company may restrict the redemption of units for a total of up to 15 consecutive working days. For the Company to be able to do this, the investors' redemption requests on a settlement date must exceed a previously defined threshold as of which the redemption requests can no longer be executed in the interests of all investors due to the liquidity situation of the fund. If the threshold is reached or exceeded, the Company decides according to its best judgment whether it will restrict the redemption on this settlement date. If it decides to restrict redemption, it may continue this for up to 14 consecutive working days on the basis

of a daily discretionary judgment. If the Company decides to restrict the redemption, it shall only redeem the units on a pro rata basis at the redemption price applicable on the settlement date; the redemption obligation lapses other than that. This means that each redemption request is executed only on a pro rata basis according to a ratio determined by the Company. The part of the order that is not executed will not be executed at a later date but instead expires. For the investor, there is therefore a risk that only a portion of their redemption order will be executed and that they will have to once again place the outstanding remaining order.

Suspension of the redemption of units

The Company may suspend the redemption of units under exceptional circumstances that make a suspension appear necessary when taking into consideration the interests of investors. Exceptional circumstances by this definition can be, for example, economic or political crises, exceptionally extensive redemption requests, the closing of stock exchanges or markets, trading constraints or other factors that adversely affect the determination of the net asset value per unit. In addition, BaFin may order that the Company suspend the redemption of units if that is necessary in the interests of the investors or the public. The investor cannot return units during such periods. The net asset value per unit can fall even when the redemption of units is suspended, as would be the case if the Company were forced to sell assets below market value during a suspension of the redemption of units. The net asset value per unit after resumption of the redemption of units can be lower than the net asset value per unit before suspension of redemption.

A suspension without subsequent resumption of the redemption of units can lead directly to a liquidation of the investment fund, as is the case when the Company terminates its management of the fund and the right to manage the fund is transferred to the custodian for the purpose of liquidating the fund. For the investor, this entails the risk that the planned holding period might not be realized, and that significant portions of the capital invested might not be available for an indefinite period of time or may be lost entirely.

Liquidation of the fund

The Company has the right to terminate its management of the fund. After termination of management, the Company can completely liquidate the fund. After a six-month period of notice, the right to manage and dispose of the fund passes to the custodian. For the investor, this entails the risk that the holding period planned by the investor will not be realized. When the fund passes to the custodian, taxes other than German income taxes may be imposed on the fund. Income taxes may be imposed on the investor when the fund units are removed from the investor's custody account after completion of the liquidation proceedings.

Transfer of all the assets of the fund to another open-ended retail investment undertaking (merger)

The Company can transfer all the assets of the fund to another UCITS. In this case, the investor can (i) return their units, (ii) retain their units and consequently become an investor of the receiving UCITS or (iii) exchange their units for units of an open-ended retail investment undertaking having comparable investment principles, provided the Company or an entity affiliated with it manages such an investment undertaking having comparable investment principles. The same applies if the Company transfers all the assets of another open-ended retail investment undertaking into the fund. The investor must therefore, in the context of the transfer, make a new investment decision prematurely. Income taxes may be incurred when returning the units. In an exchange of units for units of an investment undertaking having comparable investment principles, the investor may be charged income taxes if, for instance, the value of the units received is higher than the value of the old units at the time of purchase.

Transfer of the fund to another asset management company

The Company may transfer the right to manage and dispose of the fund to another asset management company. The fund remains unchanged by such transfer, as does the position of the investor. The investor must, however, decide in the context of the transfer whether the new asset management company can be considered just as suitable as the previous one. If the investor does not wish to remain invested in the fund under the new management, the units held by the investor must be returned. Income taxes may be incurred in this case.

Profitability and fulfillment of the investor's investment objectives

No assurance can be given that the investor will achieve the desired investment performance. The net asset value per unit of the fund can fall and lead to investor losses. There are no guarantees from the Company or from third parties concerning a particular minimum payment upon redemption or a particular investment performance of the fund. An initial sales charge paid in a purchase of units or a redemption fee paid in a sale of units can additionally reduce or even completely consume the performance of an investment, particularly in the case of a short investment period. Investors could receive back an amount that is lower than the amount originally invested.

Risk of negative performance of the feeder fund (market risk)

The risks described below can affect the performance of the fund or of the assets held in the fund, and can thus also adversely affect the net asset value per unit and the capital invested by the investor.

Sustainability risk

The Disclosure Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector) defines sustainability risk as an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

These events or conditions may be connected with the following factors, among others:

- Environmental factors, such as greenhouse gas emissions, energy sources and use, water consumption;
- Social factors, such as human rights, labor standards and principles for responsible business practices;
- Governance-related factors, such as anti-bribery and anti-corruption actions.

Sustainability risks may constitute an independent risk factor or have an impact on other risks and exert a significant influence on these, examples being market risk, operational risk, liquidity risk and counterparty risk.

Sustainability risks can lead to a significant deterioration in the financial profile, liquidity, profitability or reputation of the underlying asset.

Unless sustainability risk was already considered in the valuation of the asset, it may have a significant negative impact on the expected/estimated market value and/or the liquidity of the investment and consequently on the return of the feeder fund.

Market risk associated with sustainability risks

Environmental, social or governance risks may affect the market price. Market prices can therefore change if companies do not do business sustainably and do not make investments in sustainable changes. The strategic alignments of companies that do not take sustainability into account may also have a negative effect on the market price. The reputational risk that arises from companies failing to act in a sustainable way may also have negative consequences. Finally, physical damage caused by climate change or measures to switch over to a low-carbon economy may have negative effects on the market price.

Risks of changes in value

The assets in which the Company invests for the account of the fund are subject to risks. Losses of value can thus occur if the market value of the assets falls in relation to the purchase price, or if spot and forward prices develop differently.

Risk of negative interest on deposits

The Company invests liquid assets of the fund with the custodian or other banks for the account of the fund, whereby the deposits earn interest at customary market rates. Depending on the development of the interest rate policy of the respective central banks – in particular of the European Central Bank, the Federal Reserve (“Fed”), the Bank of England and/or the Swiss

National Bank – and depending on the respective currency of the fund or of the unit class, short-term, medium-term and even long-term deposits can attract negative interest.

Capital market risk

The price or market performance of financial instruments depends, in particular, on the performance of the capital markets, which in turn are affected by the overall economic situation worldwide and by the general economic and political environment in individual countries.

Risks relating to general economic conditions can be posed by uncertainty about economic growth in the most important industrial and emerging market countries and its impact on the global economy, as well as by the sovereign debt.

Capital market risks can arise from the interest rate levels prevailing in an investment environment and their potential impact (on bond yields, for example). The capital markets are directly and indirectly influenced by the measures taken by different central banks (e.g., interest rate adjustments, expansionary or restrictive monetary policy, programs for purchases and sales of securities) and their interactions. This can affect the liquidity, return and market risks of the fund. Risks relating to the political environment include, for example, uncertainties about the development of the European Union, uncertainties concerning upcoming elections and referenda, and uncertainties relating to developments in (potential) crisis regions.

Irrational factors such as sentiment, opinions and rumors can also have an effect on general price performance, particularly on a stock exchange. Fluctuations of market prices and values can also be attributable to changes in interest rates, the price of commodities such as oil, exchange rates or the creditworthiness of an issuer of financial instruments.

Inflation risk

All assets are subject to a risk of devaluation through inflation. This is also true for the assets held in the fund. The rate of inflation can exceed the growth rate of the fund.

Currency risk

Assets of the fund can be invested in a currency other than the fund currency. The fund receives the income, repayments and proceeds of such investments in that other currency. If the value of that currency falls in relation to the fund currency, the value of such investments, and thus also the value of the fund’s assets, is reduced.

Risks of investing in contingent convertibles

Contingent convertibles (“CoCos”) are a form of hybrid financial instrument. From the perspective of the issuer, they act as a capital buffer and contribute to the fulfillment of certain regulatory capital requirements. Under their terms and conditions of issue, CoCos are either converted into shares or their principal amount is written

down upon the occurrence of certain trigger events linked to regulatory capital thresholds. The conversion event can also be triggered by the supervisory authorities, independently of the trigger events and outside of the control of the issuer, if the supervisory authorities call into question the long-term viability of the issuer, or of companies related to the issuer, as a going concern (conversion/write-down risk).

Following a trigger event, the recovery of the capital invested depends essentially on the configuration of the CoCo. CoCos can use one of the following three methods to recover their fully or partially written-down nominal value: conversion into shares, temporary write-down or permanent write-off. In the case of a temporary write-down, the write-down is completely discretionary, taking into account certain regulatory restrictions. Any coupon payments after the trigger event are based on the reduced nominal value. A CoCo investor may therefore, under certain circumstances, incur losses ahead of equity investors and other holders of debt instruments in respect of the same issuer.

In accordance with the minimum requirements set out in the EU Capital Requirements Directive IV / Capital Requirements Regulation (CRD IV/CRR), the configuration of the terms and conditions of CoCos can be complex and can vary depending on the issuer or the bond.

Investment in CoCos is associated with some additional risks, such as:

- a) Risk of falling below the specified trigger (trigger level risk)
The probability and the risk of a conversion or of a write-down are determined by the difference between the trigger level and the capital ratio of the CoCo issuer currently required for regulatory purposes.

The mechanical trigger is at least 5.125% of the regulatory capital ratio or higher, as set out in the issue prospectus of the respective CoCo. Especially in the case of a high trigger, CoCo investors may lose the capital invested as, for example, in the case of a write-down of the nominal value or a conversion into equity capital (shares).

At sub-fund level, this means that the actual risk of falling below the trigger level is difficult to assess in advance because, for example, the capital ratio of the issuer may only be published quarterly and therefore the actual gap between the trigger level and the capital ratio is only known at the time of publication.

- b) Risk of suspension of the coupon payment (coupon cancellation risk)
Although the interest payable on the CoCo is specified by the coupon in principle, the issuer or the supervisory authority can suspend the coupon payments at any time without such suspension signifying a default of the CoCo. Any lost coupon

payments are not made up for when coupon payments are resumed. That means for the CoCo investor that there is a risk that not all of the coupon payments expected at the time of acquisition will be received.

c) Risk of a change to the coupon (coupon resetting risk)

If the CoCo is not called by the CoCo issuer on the specified call date, the issuer can redefine the terms and conditions of issue. If the issuer does not call the CoCo, the amount of the coupon can be changed on the call date.

d) Risk due to prudential requirements (risk of a reversal of the capital structure)

A number of minimum requirements in relation to the equity capital of banks were defined in CRD IV. The amount of the required capital buffer differs from country to country in accordance with the respective valid regulatory law applicable to the issuer.

At fund level, the different national requirements have the consequence that the conversion as a result of the discretionary trigger or the suspension of the coupon payments can be triggered accordingly depending on the regulatory law applicable to the issuer and that an additional uncertainty factor exists for the CoCo investor, or the investor, depending on the national conditions and the sole judgment of the respective competent supervisory authority.

Moreover, the opinion of the respective competent supervisory authority, as well as the criteria of relevance for the opinion in the individual case, cannot be conclusively assessed in advance.

e) Call risk and risk of the competent supervisory authority preventing a call (prolongation risk)

CoCos are long-term bonds, often perpetual, that are callable by the issuer at certain call dates defined in the issue prospectus. The decision to call is made at the discretion of the issuer, but it does require the approval of the issuer's competent supervisory authority. The supervisory authority makes its decision in accordance with applicable regulatory law.

The CoCo investor can only resell the CoCo on a secondary market, which entails corresponding market and liquidity risks if the issuer does not effectively call the CoCo on one or more of the defined call dates. If there is no sufficiently liquid secondary market in the event of a lack of demand, a CoCo cannot be sold.

f) Equity capital and subordination risk (risk of a reversal of the capital structure)

In the case of conversion to shares, CoCo investors become shareholders when the trigger occurs. In the event of insolvency, claims of shareholders have subordinate priority and are dependent on the remaining funds available. Therefore, a conversion of the CoCo may lead to a total loss of capital. Under certain circumstances, CoCo investors may even incur the initial losses when

the trigger occurs, even before the holders of equity.

g) Risk of concentration on a sector

Due to the special structure of CoCos, the risk of concentration on one sector may arise due to the uneven distribution of risks with regard to financial securities. By law, CoCos are part of the capital structure of financial institutions.

h) Liquidity risk

CoCos entail a liquidity risk in a tense market situation. This is due to the special investor base and the lower total market volume compared with that of normal bonds.

i) Income valuation risk

Due to the fact that CoCos can be called on a flexible basis, it is not clear which date should be used for calculating the income. There is a risk on each call date that the maturity of the bond will be postponed and the income calculation must then be adjusted to the new date, which can lead to a different yield.

j) Unknown risk

Due to the innovative nature of CoCos and the highly changeable regulatory environment for financial institutions, risks may arise that cannot be foreseen at the present time.

For further information, please refer to the statement from the European Securities and Markets Authority (ESMA/2014/944) of July 31, 2014, regarding potential risks associated with investing in contingent convertible instruments.

Risks from increased redemptions or subscriptions

Buy and sell orders from investors cause liquidity to flow into and out of the fund, respectively. The inflows and outflows, after netting, can result in either a net inflow or a net outflow of the fund's liquid assets. This net inflow or net outflow can cause the fund manager to buy or sell assets, which generates transaction costs. This is especially true when liquid assets exceed or fall short of a ratio set by the Company for the fund as a result of the inflows or outflows. The resulting transaction costs are charged to the fund and can adversely affect the fund's performance. In the case of inflows, an increased fund liquidity can diminish the performance of the fund if the Company cannot invest the funds under adequate conditions, or cannot do so in a timely manner.

Operational and other risks of the feeder fund

In the following, the risks that can arise, for example, from inadequate internal processes and from human error or system failures at the Company or at external third parties are presented. These risks can affect the performance of the feeder fund, and can thus also adversely affect the net asset value per unit and the capital invested by the investor.

Risks from criminal acts, shortcomings, natural disasters or failure to take sustainability into account

The fund may become a victim of fraud or other criminal acts. It may suffer losses due to errors by employees of the Company or of external third parties, or be damaged by outside events such as natural disasters or pandemics. These events may be caused or exacerbated by failure to take sustainability into account.

Country or transfer risk

There is a risk that a foreign borrower, despite ability to pay, cannot make payments at all, or not on time, or can only pay in another currency, because the currency in the country of domicile is not freely transferable or the country of domicile is unwilling to execute transfers, or for other reasons. This means that, for example, payments to which the Company is entitled for the account of the fund may not be made, or may be in a currency that is not convertible (anymore) due to restrictions on currencies, or may be in another currency. If the borrower pays in another currency, this position is subject to the currency risk presented above.

Legal and political risks

Investments for the fund may be undertaken in jurisdictions in which the law of the fund domicile does not apply, or where, in the case of disputes, the place of jurisdiction is outside of the fund domicile. Any resulting rights and obligations of the Company for the account of the fund may differ from those in the fund domicile to the detriment of the fund and of the investor. Political or legal developments, including changes to the legal framework in these jurisdictions, may not be detected by the Company, or may be detected too late, or they may lead to restrictions in terms of acquirable assets or assets that have already been acquired. These consequences can also arise when the legal framework for the Company and/or the management of the fund changes in the fund domicile.

Changes in the tax framework, tax risk

The information provided in this Sales Prospectus is based on our understanding of current tax laws. However, no responsibility can be assumed for potential changes in the tax structure through legislation, court decisions or the orders of the tax authorities. The summary of tax regulations is addressed to persons subject, without limitation, to individual or corporate income tax in Germany.

Tax risks from equities trading around the dividend date and hedging transactions

- Tax risks from equities trading around the dividend date and hedging transactions for unit classes as defined by article 10 (1) of the German Investment Tax Act (InvStG) (unit classes for tax-privileged investors)
The possibility cannot be ruled out that the unit price of a fund may turn out to be relatively lower if provisions are recognized for a possible tax liability for payment of investment income tax of the fund, or similar actions are taken. If certain conditions are met, investment

funds and unit classes for tax-privileged investors as defined by article 10 (1) InvStG are charged a definitive German investment income tax of 15% on the gross dividend to be collected. The investment income tax is refunded in full to the investment fund or in favor of the unit class, if (i) the fund holds German equities and German dividend rights similar to equities for 45 days without interruption within a period of 45 days before and after the investment income was payable (91 days in total) and bears no less than 70% of the risk of a decline in value of the units or dividend rights without interruption throughout that entire 45-day period ("45-day rule"). Moreover, in order to receive an investment income tax credit, there must not be an obligation to directly or indirectly pay the investment income to another person (e.g., through swaps, securities lending and borrowing, repurchase agreement transactions). For this reason, hedging or forward transactions that directly or indirectly hedge the risk arising from German equities or German dividend rights similar to equities may be detrimental. Hedging transactions on value and price indices are considered to be indirect hedges. The hedging transactions may also be detrimental if related parties are invested in the fund. Even if the tax liability does not arise and therefore provisions initially recognized are reversed, or similar actions are taken, a relatively higher unit price may not benefit investors who participated in the fund at the time the provision was created.

- Tax risks from hedging transactions for major investors
The possibility that investment income tax on German dividends and income from domestic dividend rights similar to equities that the investor originally generates may not be creditable or refundable in whole or in part cannot be ruled out. The investment income tax is fully offset or refunded if (i) the investor holds German equities and German dividend rights similar to equities for 45 days without interruption within a period of 45 days before and after the investment income was payable (91 days in total) and bears no less than 70% of the risk of a decline in value of the units or dividend rights without interruption throughout that entire 45-day period ("45-day rule"). Moreover, in order to receive an investment income tax credit, there must not be an obligation to directly or indirectly pay the investment income to another person (e.g., through swaps, securities lending and borrowing, repurchase agreement transactions). For this reason, hedging or forward transactions that directly or indirectly hedge the risk arising from German equities or German dividend rights similar to equities may be detrimental. Hedging transactions on value and price indices are considered to be indirect hedges. To the extent that the fund is to be considered a related party of the investor and enters into hedging transactions, these can

result in these being attributed to the investor, and the investor therefore failing to comply with the 45-day rule.

In the event that investment income tax is not withheld from corresponding income that the investor originally generates, hedging transactions of the fund can result in these being attributed to the investor and the investor being required to remit the investment income tax to the tax office.

Key individual risk

If the investment performance of the fund during a particular period is very positive, this success may also depend on the abilities of the individuals acting on behalf of the fund, and hence on the correct management decisions. Fund management personnel can change, however. New decision-makers might not be as successful.

Custody risk

The custody of assets, especially in foreign countries, involves a risk of loss that may result from insolvency, violation of due diligence or force majeure.

Default risk of the custodian or another credit institution

In the event of the default of the custodian, investors of the fund may suffer financial losses insofar as the deposits they have made are not covered by the deposit insurance fund of the Bundesverband deutscher Banken e.V. [Federal Association of German Banks]. If deposits for the fund are made with other credit institutions, investors may suffer financial losses insofar as these deposits are not covered by any existing deposit insurance systems.

The protection of deposits in the investment fund may also be limited despite the existence of deposit insurance systems as they regularly have restrictions regarding the coverage of deposits as per their rules and regulations.

Risks from trading and clearing mechanisms (settlement risk)

In the settlement of securities transactions through an electronic system, there is a risk that one of the contracting parties is late or fails to pay, or fails to deliver securities on time.

Information on possible risks associated with commodity derivative position limits / Possible effects on the investment strategy

As part of the implementation of the MiFID 2 Directive, the competent authorities shall set a quantitative threshold value for each commodity derivative traded on an exchange in a member state of the European Union or a Contracting State to the Agreement on the European Economic Area for the maximum size of a position in that derivative which a person may hold (position limit). The position limits apply to the fund as well. The operator of an exchange in which commodity derivatives are traded must establish procedures to monitor compliance with the established position limits (position management controls).

Due to the defined position limits or the rights of the operator of the respective exchange within the framework of position management controls, there is a risk that positions in commodity derivatives may not be entered into at all or only partially, or that positions entered into must be liquidated or reduced. As a result, the Company may not be able to implement and adjust its investment strategy for commodity derivatives as planned. This may have an impact on the risk profile and performance of the fund.

Risks of investing in the master fund

In the following, the risks typically associated with an investment in the master fund are presented. These risks can have an adverse effect on the net asset value per unit, on the capital invested by the investor and on the investor's planned holding period for the investment in the feeder fund.

Fluctuation of the fund's net asset value per unit

The net asset value per unit is calculated as the value of the master fund divided by the number of units in circulation. The value of the master fund is equal to the sum of the market values of all assets held in the fund, less the market values of all liabilities of the master fund. The net asset value per unit is thus dependent on the assets held in the master fund and on the amount of the master fund's liabilities. If the value of these assets declines, or if the value of the liabilities rises, the net asset value per unit falls.

Impact of tax aspects on individual results

The tax treatment of investment income depends on the individual circumstances of the respective investor, and may be subject to change in the future. The investor should consult their personal tax advisor on investor-specific issues – giving particular consideration to the personal tax situation.

Amendment of the investment policy and of the Terms and Conditions of Investment

The master fund can change its terms and conditions of investment with the approval of the supervisory authority. A change in the Terms and Conditions of Investment can also change regulations affecting the investor. For instance, by changing its terms and conditions of investment, the master fund can change the fund's investment policy or increase the costs to be charged to the fund. The master fund can additionally change the investment policy within the statutorily and contractually permissible investment spectrum, and thus without changing its terms and conditions of investment and without the approval of the supervisory authority. This can result in a change to the risk associated with the master fund.

Profitability and fulfillment of the investor's investment objectives

No assurance can be given that the investor will achieve the desired investment performance. The net asset value per share of the master fund can fall and lead to investor losses. There are no

guarantees from the master fund or from third parties concerning a particular minimum payment commitment upon redemption or a particular investment performance of the master fund. An initial sales charge paid in a purchase of units or a redemption fee paid in a sale of units can additionally reduce or even completely consume the performance of an investment, particularly in the case of a short investment period. Investors could receive back an amount that is lower than the amount originally invested.

Risk of negative performance of the master fund (market risk)

The risks described below can affect the performance of the master fund or of the assets held in the master fund, and can thus also adversely affect the net asset value per share and the capital invested by the investor.

Sustainability risk – Environmental, Social and Governance (ESG)

Sustainability risks can also arise for the master fund (see section “Sustainability risk – Environmental, Social and Governance (ESG)” for the feeder fund).

Sustainability risks may lead to a material deterioration in the financial profile, liquidity, profitability or reputation of the underlying investment.

If the sustainability risks have not been anticipated and taken into account in the valuation of the investment, this may have a significant negative effect on the expected/estimated market price and/or the liquidity of the investment and therefore the master fund’s returns.

Market risk associated with sustainability risks

Environmental, social or governance risks may affect the market price. Market prices can therefore change if companies do not do business sustainably and do not make investments in sustainable changes. The strategic alignments of companies that do not take sustainability into account may also have a negative effect on the market price. The reputational risk that arises from companies failing to act in a sustainable way may also have negative consequences. Finally, physical damage caused by climate change or measures to switch over to a low-carbon economy may have negative effects on the market price.

Risks of changes in value

The assets in which the master fund invests are subject to risks. Losses of value can thus occur if the market value of the assets falls in relation to the purchase price, or if spot and forward prices develop differently.

Risk of negative interest on deposits

The Company invests liquid assets of the master fund with the custodian or other banks for the account of the master fund, whereby the deposits earn interest at customary market rates. Depending on the development of the interest rate policy of the respective central banks – in

particular of the European Central Bank, the Federal Reserve (“Fed”), the Bank of England and/or the Swiss National Bank – and depending on the respective currency of the fund or of the unit class, short-term, medium-term and even long-term deposits can attract negative interest.

Capital market risk

The price or market performance of financial instruments depends, in particular, on the performance of the capital markets, which in turn are affected by the overall economic situation worldwide and by the general economic and political environment in individual countries.

Risks relating to general economic conditions can be posed by uncertainty about economic growth in the most important industrial and emerging market countries and its impact on the global economy, as well as by the debt crisis in the euro area and in other regions of the world.

Risks can arise from the interest rate levels prevailing in an investment environment and their potential impact (on bond yields, for example). The capital markets are directly and indirectly influenced by the measures taken by different central banks (e.g., interest rate adjustments, expansionary or restrictive monetary policy, programs for purchases and sales of securities) and their interactions. This can affect the liquidity, return and risks of the fund.

Risks relating to the political environment include, for example, uncertainties about the development of the European Union, uncertainties concerning upcoming elections and referenda, and uncertainties relating to developments in (potential) crisis regions.

Irrational factors such as sentiment, opinions and rumors can also have an effect on general price performance, particularly on a stock exchange. Fluctuations of market prices and values can also be attributable to changes in interest rates, the price of commodities such as oil, exchange rates or the creditworthiness of an issuer of financial instruments.

Risk of price changes in equities

Equities are known to be subject to strong price fluctuations and thus also to the risk of price declines. These price fluctuations are particularly influenced by the issuing company’s earnings performance and by developments in the industry and in the overall economy. The confidence of market participants in the particular company can affect price performance as well. This is especially true for companies whose shares have only been admitted to a stock exchange or other organized market for a shorter period of time; even slight changes in estimates can trigger strong price movements in the shares of such companies. If a particular stock has a low proportion of shares that trade freely and are owned by many shareholders (the “free float”), even smaller buy and sell orders for that stock can have a strong impact on the

market price, thus leading to higher price fluctuations.

Risk of changes in interest rates

Investing in fixed rate securities is associated with the possibility that the level of market interest rates existing at the time a security is issued will change. If market interest rates rise in comparison with the interest rates at the time of the issue, the prices for fixed rate securities will fall as a rule. If, on the other hand, the market interest rate falls, the price of fixed rate securities will rise. This price trend means that the current return on a fixed rate security is roughly equivalent to the current market interest rate. However, these price fluctuations vary according to the (residual) term to maturity of the fixed rate securities. Fixed rate securities with shorter maturities are generally associated with lower price risks than fixed rate securities with longer maturities. Conversely, fixed rate securities with shorter maturities generally have lower returns than longer-term fixed rate securities. Due to their short terms not exceeding 397 days, money market instruments tend to be associated with lower price risks. In addition, the interest rates of different interest-related financial instruments denominated in the same currency and with similar residual terms to maturity can perform differently.

Risk of price changes in convertible and warrant-linked bonds

Convertible and warrant-linked bonds securitize the right to convert the bond into stock, or to acquire stock. The change in the value of convertible and warrant-linked bonds is thus dependent on the price performance of the underlying stock. The performance risk of the underlying stocks can therefore also have an effect on the performance of the convertible or warrant-linked bond. Warrant-linked bonds that give the issuer the right to issue to the investor a predetermined number of shares instead of paying back a principal amount (reverse convertibles) are dependent on the price of the corresponding stock to a greater extent.

Risks associated with derivative transactions

The master fund may enter into derivative transactions. Buying and selling options, as well as the conclusion of futures contracts or swaps, involves the following risks:

- Price changes in the underlying can cause a decrease in the value of the option or future. If the value decreases to a total loss, the master fund may be forced to allow the rights acquired to expire. Changes in the value of the asset underlying a swap can also result in losses for the master fund.
- The leverage effect of options may alter the value of the master fund’s assets more strongly than the direct purchase of underlyings would. The risk of loss may not be determinable when entering into the transaction.
- There may be no liquid secondary market for a specific instrument at a particular point in

time. In that case, it may not be possible to close a derivative position under certain circumstances.

- The purchase of options entails the risk that the call options are not exercised because the prices of the underlyings do not change as expected, meaning that the master fund loses the option premium it paid. If options are sold, there is the risk that the master fund may be obligated to buy assets at a price that is higher than the current market price, or obliged to deliver assets at a price that is lower than the current market price. In that case, the master fund suffers a loss amounting to the price difference less the option premium received.
- In futures contracts, there is a risk that the master fund will be obligated to bear the difference between the price underlying the contract when it was entered into and the market price when the transaction is closed or matures. That would result in losses for the master fund. The risk of loss is not determinable when entering into the futures contract.
- Any necessary back-to-back transactions (closing of position) incur costs.
- Forecasts made by the master fund about the future development of underlying assets, interest rates, prices and currency markets may turn out to be incorrect in retrospect.
- It may not be possible to buy or sell the assets underlying the derivatives at a favorable time; conversely, it may be necessary to buy or sell them at an unfavorable time.
- Using derivatives can result in potential losses that are not foreseeable under certain circumstances and which may even exceed the initial margins paid.

The following risks can occur in over-the-counter (“OTC”) transactions:

- There may be no organized market, and it may therefore be difficult or impossible for the master fund to sell financial instruments acquired in the OTC market.
- Given the individual nature of agreements, back-to-back transactions (closing of position) may be difficult or impossible, or may entail substantial costs.

Risks in securities lending transactions

If the master fund grants a loan of securities, it transfers the securities to a borrower, which returns securities of the same kind, quantity and quality at the end of the transaction (securities loan). For the duration of the transaction, the master fund has no right to use securities lent. If the security loses value during the transaction and the master fund wants to dispose of the security altogether, it must terminate the lending transaction and await the customary settlement cycle, which can result in a risk of loss for the master fund.

Risks in repurchase agreement transactions

If the master fund sells securities under a repurchase agreement, it undertakes to buy them back at the end of the agreement term in return for a premium. The repurchase price and the premium to be paid by the seller at the end of the term are set when the agreement is entered into. If the securities sold under a repurchase agreement should lose value during the term of the agreement, and if the master fund wanted to sell them to limit the losses of value, it can do so only by exercising the right of early termination. Early termination of the agreement can entail financial losses for the master fund. It is also possible that the premium payable at the end of the term will turn out to be higher than the income the master fund generated through reinvestment of the cash received.

If the master fund buys securities under a repurchase agreement, it must sell them back at the end of an agreement term. The repurchase price is set when the agreement is entered into. Securities bought under a repurchase agreement serve as collateral for providing the liquidity to the contracting party. The master fund does not benefit from any increases in the value of the securities.

Risks associated with the acceptance of collateral

The master fund receives collateral for derivative transactions, securities lending transactions and repurchase agreement transactions. The management of this collateral requires the deployment of systems and the definition of certain processes. The failure of these processes, as well as any human or system failure at the management company of the master fund or at external third parties in connection with the management of collateral, may result in the risk that the collateral could lose value and no longer be sufficient to fully cover the management company's delivery or retransfer claim with respect to the counterparty.

Risk in securitization positions with no retention

The master fund may acquire securities backed by loans (loan securitization positions) issued after January 1, 2011, only if the lender retains an interest in the securitization of at least 5% and complies with other requirements. The master fund is therefore obligated to initiate corrective measures in the interests of the investors if loan securitizations issued after this date fail to meet these EU standards. As part of these corrective measures, the master fund may be forced to sell such loan securitization positions. Given the legal requirements for banks, fund companies and possibly insurance companies in the future as well, there is a risk that the master fund will not be able to sell such loan securitization positions held in the fund, or will be able to do so only with deep discounts or after very long delays.

Inflation risk

All assets are subject to a risk of devaluation through inflation. This is also true for the assets held in the master fund. The rate of inflation can exceed the growth rate of the master fund.

Currency risk

Assets of the master fund can be invested in a currency other than the fund currency. The master fund receives the income, repayments and proceeds of such investments in that other currency. If the value of that currency falls in relation to the fund currency, the value of such investments, and thus also the value of the fund's assets, is reduced.

Risks of investing in contingent convertibles

Contingent convertibles (“CoCos”) are a form of hybrid financial instrument. From the perspective of the issuer, they act as a capital buffer and contribute to the fulfillment of certain regulatory capital requirements. Under their terms and conditions of issue, CoCos are either converted into shares or their principal amount is written down upon the occurrence of certain trigger events linked to regulatory capital thresholds. The conversion event can also be triggered by the supervisory authorities, independently of the trigger events and outside of the control of the issuer, if the supervisory authorities call into question the long-term viability of the issuer, or of companies related to the issuer, as a going concern (conversion/write-down risk).

Following a trigger event, the recovery of the capital invested depends essentially on the configuration of the CoCo. CoCos can use one of the following three methods to recover their fully or partially written-down nominal value: conversion into shares, temporary write-down or permanent write-off. In the case of a temporary write-down, the write-down is completely discretionary, taking into account certain regulatory restrictions. Any coupon payments after the trigger event are based on the reduced nominal value. A CoCo investor may therefore, under certain circumstances, incur losses ahead of equity investors and other holders of debt instruments in respect of the same issuer.

In accordance with the minimum requirements set out in the EU Capital Requirements Directive IV / Capital Requirements Regulation (CRD IV/CRR), the configuration of the terms and conditions of CoCos can be complex and can vary depending on the issuer or the bond.

Investment in CoCos is associated with some additional risks, such as:

- a) Risk of falling below the specified trigger (trigger level risk)

The probability and the risk of a conversion or of a write-down are determined by the difference between the trigger level and the capital ratio of the CoCo issuer currently required for regulatory purposes.

The mechanical trigger is at least 5.125% of the regulatory capital ratio or higher, as set out in the issue prospectus of the respective CoCo. Especially in the case of a high trigger, CoCo investors may lose the capital invested as, for example, in the case of a write-down of the nominal value or a conversion into equity capital (shares).

At sub-fund level, this means that the actual risk of falling below the trigger level is difficult to assess in advance because, for example, the capital ratio of the issuer may only be published quarterly and therefore the actual gap between the trigger level and the capital ratio is only known at the time of publication.

b) Risk of suspension of the coupon payment (coupon cancellation risk)

Although the interest payable on the CoCo is specified by the coupon in principle, the issuer or the supervisory authority can suspend the coupon payments at any time without such suspension signifying a default of the CoCo. Any lost coupon payments are not made up for when coupon payments are resumed. That means for the CoCo investor that there is a risk that not all of the coupon payments expected at the time of acquisition will be received.

c) Risk of a change to the coupon (coupon resetting risk)

If the CoCo is not called by the CoCo issuer on the specified call date, the issuer can redefine the terms and conditions of issue. If the issuer does not call the CoCo, the amount of the coupon can be changed on the call date.

d) Risk due to prudential requirements (risk of a reversal of the capital structure)

A number of minimum requirements in relation to the equity capital of banks were defined in CRD IV. The amount of the required capital buffer differs from country to country in accordance with the respective valid regulatory law applicable to the issuer.

At fund level, the different national requirements have the consequence that the conversion as a result of the discretionary trigger or the suspension of the coupon payments can be triggered accordingly depending on the regulatory law applicable to the issuer and that an additional uncertainty factor exists for the CoCo investor, or the investor, depending on the national conditions and the sole judgment of the respective competent supervisory authority.

Moreover, the opinion of the respective competent supervisory authority, as well as the criteria of relevance for the opinion in the individual case, cannot be conclusively assessed in advance.

e) Call risk and risk of the competent supervisory authority preventing a call (prolongation risk)

CoCos are long-term debt securities, often perpetual, that are callable by the issuer at certain call dates defined in the issue prospectus. The

decision to call is made at the discretion of the issuer, but it does require the approval of the issuer's competent supervisory authority. The supervisory authority makes its decision in accordance with applicable regulatory law.

The CoCo investor can only resell the CoCo on a secondary market, which entails corresponding market and liquidity risks if the issuer does not effectively call the CoCo on one or more of the defined call dates. If there is no sufficiently liquid secondary market in the event of a lack of demand, a CoCo cannot be sold.

f) Equity capital and subordination risk (risk of a reversal of the capital structure)

In the case of conversion to shares, CoCo investors become shareholders when the trigger occurs. In the event of insolvency, claims of shareholders have subordinate priority and are dependent on the remaining funds available. Therefore, a conversion of the CoCo may lead to a total loss of capital. Under certain circumstances, CoCo investors may even incur the initial losses when the trigger occurs, even before the holders of equity.

g) Risk of concentration on a sector

Due to the special structure of CoCos, the risk of concentration on one sector may arise due to the uneven distribution of risks with regard to financial securities. By law, CoCos are part of the capital structure of financial institutions.

h) Liquidity risk

CoCos entail a liquidity risk in a tense market situation. This is due to the special investor base and the lower total market volume compared with that of normal bonds.

i) Income valuation risk

Due to the fact that CoCos can be called on a flexible basis, it is not clear which date should be used for calculating the income. There is a risk on each call date that the maturity of the bond will be postponed and the income calculation must then be adjusted to the new date, which can lead to a different yield.

j) Unknown risk

Due to the innovative nature of CoCos and the highly changeable regulatory environment for financial institutions, risks may arise that cannot be foreseen at the present time.

For further information, please refer to the statement from the European Securities and Markets Authority (ESMA/2014/944) of July 31, 2014, regarding potential risks associated with investing in contingent convertible instruments.

Concentration risk

If investment is concentrated on particular assets or markets, the master fund becomes particularly heavily dependent on the performance of these assets or markets.

Risks associated with investment in investment fund units

The risks entailed in investment undertakings whose units are acquired for the master fund ("target funds") are closely linked to the risks inherent in the individual assets contained in these target funds, and in the investment strategies pursued by these target funds and the investment decisions they take. The managers of the individual target funds generally operate independently of one another. In the event of a review of all assets of the acquired investment undertaking, any potential diversification effect that reduces risk across the units held by the target fund may turn out to be lower than expected. It is generally not possible for the master fund or its management company to control the management of the target funds. Their investment decisions do not necessarily have to concur with the master fund's assumptions or expectations. The master fund often will not have timely knowledge of the current composition of target funds. If the composition does not match the master fund's assumptions or expectations, it may not be able to react without a considerable delay by returning target fund units.

Open-ended investment undertakings in which the master fund acquires units might also occasionally restrict or suspend the redemption of units. In that case, the Company is prevented from disposing of the units of the target fund by returning them to the management company or custodian of the target fund against payment of the redemption price.

Risks of restricted or elevated liquidity of the master fund (liquidity risk)

In the following, the risks that may adversely affect the liquidity of the master fund are presented. This may result in the master fund being temporarily or permanently unable to meet its payment obligations, and in the master fund being temporarily or permanently unable to meet the redemption requests of investors. The investor might not be able to realize a potentially planned holding period, and some or all of the capital invested might not be available to the investor for an indefinite period of time. The realization of the liquidity risks could also cause the net asset value of the master fund, and thus the net asset value per share, to decline in cases where, for instance, the master fund is forced, with appropriate legal permissibility, to sell assets for the master fund at less than market value.

If the Company is unable to meet the redemption requests of investors in the master fund, this may additionally lead to the restriction or suspension of redemptions and, in extreme cases, to the subsequent liquidation of the master fund.

Risk from investing in assets

It is also permitted to acquire assets for the master fund that are neither admitted to a stock exchange nor admitted to or included in an organized market. A potential sale of these assets may be

possible only with high price discounts or with delays, or not at all. Even for assets admitted to a stock exchange, a potential sale might not be possible or might only be possible with high price discounts, depending on the market situation, the volume, the time frame and planned costs. Although only assets that can generally be liquidated at any time may be acquired for the master fund, it cannot be ruled out that it might temporarily or permanently be possible to dispose of these assets only with realization of losses.

Risk from funding liquidity

The master fund may borrow. There is a risk that the master fund might not be able to get a corresponding loan, or be able to get one only at significantly more unfavorable terms. Variable rate loans can additionally have a negative impact when interest rates rise. Insufficient funding liquidity can affect the liquidity of the master fund, with the result that the master fund may be forced to sell assets prematurely or at terms inferior than planned.

Risks from increased redemptions or issues

Buy and sell orders from investors cause liquidity to flow into and out of the master fund, respectively. The inflows and outflows, after netting, can result in either a net inflow or a net outflow of the master fund's liquid assets. This net inflow or net outflow can cause the fund manager to buy or sell assets, which generates transaction costs. This is especially true when liquid assets exceed or fall short of a ratio set by the master fund as a result of the inflows or outflows. The resulting transaction costs are charged to the master fund's assets and can adversely affect the master fund's performance. In the case of inflows, an increased fund liquidity can diminish the performance of the master fund if the master fund cannot invest the funds under adequate conditions.

Risk associated with public holidays in specific regions/countries

According to the investment strategy, investments for the master fund are to be made in specific regions and countries. Local public holidays in these regions or countries may result in differences between stock exchange trading days of these regions or countries and the valuation dates of the master fund. The master fund may consequently be unable to react to market developments in these regions or countries on the same day if that day is not a valuation date, or it may be unable to act on a valuation date that is not a trading day in the markets of these regions or countries. As a result, the master fund might be prevented from selling assets in the time required. This can adversely affect the ability of the master fund to meet redemption requests or other payment obligations.

Counterparty risk including credit and receivable risk

In the following, the risks that can arise for the master fund in the context of a contractual relationship with another party (a "counterparty")

are presented. Here there is a risk that the contracting party might no longer be able to meet its contractual obligations. These risks can affect the performance of the master fund, and can thus also adversely affect the net asset value per share and the capital invested by the investor.

Risk of default / Counterparty risks (except central counterparties)

The default of an issuer or of a contracting party (counterparty) against which the master fund has claims can lead to losses for the master fund. Issuer risk describes the effect of particular developments at the individual issuer that, alongside general trends in the capital markets, will affect the price of a security. The risk of a decline in the assets of issuers cannot be entirely eliminated even through careful selection of securities. The other party to a contract entered into for the account of the master fund can default in whole or in part (counterparty risk). This applies to all contracts that are entered into for the account of the master fund.

Risk from central counterparties

A central counterparty ("CCP") acts as an intermediary institution in particular transactions for the master fund, especially transactions in derivative financial In this case, the CCP acts as the buyer toward the seller, and as the seller toward the buyer. A CCP hedges its counterparty default risks by means of a series of protective measures, including initial margins (e.g., collateralizations), that enable it to offset losses from transactions entered into at any time. These protective measures notwithstanding, it cannot be ruled out that a CCP might default, which would also affect claims of the Company for the master fund. This can result in losses for the master fund that are not hedged.

Risks of default in repurchase agreement transactions

In repurchase agreement transactions, the collateral is provided as consideration by the contracting party. In the event of a default of the contracting party during the term of the repurchase agreement transaction, the master fund has a right of use with respect to the securities purchased or to the cash received under the agreement. A risk of loss to the master fund can ensue from the fact that the collateral provided is no longer sufficient to cover the master fund's retransfer claim in full because of the temporary deterioration in the creditworthiness of the issuer, or because the prices of the securities sold have risen.

Risks of default in securities lending transactions

If the master fund grants a loan of securities, it must obtain sufficient collateral to protect itself against the default of the contracting party. Collateral is provided in an amount at least equivalent to the market value of the securities transferred in the securities loan. The borrower must provide additional collateral if the value of the securities lent increases, if the quality of the

collateral provided decreases or if the financial situation of the borrower deteriorates and the collateral already provided is not sufficient. If the borrower is unable to meet this obligation to provide additional collateral, there is a risk that the Company's retransfer claim is not fully hedged in the event of a contracting party default. If the collateral is held in custody at an institution other than the master fund's custodian, there is also the risk that the collateral might not be available for full or immediate use in the event of a borrower default.

Operational and other risks of the master fund

In the following, the risks that can arise, for example, from inadequate internal processes and from human error or system failures at the management company of the master fund or at external third parties are presented. These risks can affect the performance of the master fund, and can thus also adversely affect the net asset value per share and the capital invested by the investor.

Risks from criminal acts, shortcomings, natural disasters or failure to take sustainability into account

The master fund may become a victim of fraud or other criminal acts. It may suffer losses due to errors by employees of the master fund's Management Company or of external third parties, or be damaged by outside events such as natural disasters or pandemics. These events may be caused or exacerbated by failure to take sustainability into account.

Country or transfer risk

There is a risk that a foreign borrower, despite ability to pay, cannot make payments at all, or not on time, or can only pay in another currency, because the currency in the country of domicile is not freely transferable or the country of domicile is unwilling to execute transfers, or for other reasons. This means that, for example, payments to which the master fund is entitled may not occur, or may be in a currency that is not convertible (anymore) due to restrictions on currency exchange, or may be in another currency. If the borrower pays in another currency, this position is subject to the currency risk presented above.

Legal and political risks

Investments for the master fund may be undertaken in jurisdictions in which the law of the fund domicile does not apply, or where, in the case of disputes, the place of jurisdiction is outside of the fund domicile. Any resulting rights and obligations of the master fund may differ from those in the fund domicile to the detriment of the master fund and of the investor. Political or legal developments, including changes to the legal framework in these jurisdictions, may not be detected by the master fund, or may be detected too late, or they may lead to restrictions in terms of acquirable assets or assets that have already been acquired. These consequences can also arise when the legal framework for the Company and/or

the management of the master fund in the fund domicile changes.

Changes in the tax framework, tax risk

The information provided in this Sales Prospectus is based on our understanding of current tax laws. However, no responsibility can be assumed for potential changes in the tax structure through legislation, court decisions or the orders of the tax authorities. The summary of tax regulations is addressed to persons subject, without limitation, to individual or corporate income tax in Germany.

Tax risks from equities trading around the dividend date and hedging transactions

- Tax risks from equities trading around the dividend date and hedging transactions for unit classes as defined by article 10 (1) of the German Investment Tax Act (InvStG) (unit classes for tax-privileged investors)
The possibility cannot be ruled out that the unit price of a fund may turn out to be relatively lower if provisions are recognized for a possible tax liability for payment of investment income tax of the fund, or similar actions are taken. If certain conditions are met, investment funds and unit classes for tax-privileged investors as defined by article 10 (1) InvStG are charged a definitive German investment income tax of 15% on the gross dividend to be collected. The investment income tax is refunded in full to the investment fund or in favor of the unit class, if (i) the fund holds German equities and German dividend rights similar to equities for 45 days without interruption within a period of 45 days before and after the investment income was payable (91 days in total) and bears no less than 70% of the risk of a decline in value of the units or dividend rights without interruption throughout that entire 45-day period ("45-day rule"). Moreover, in order to receive an investment income tax credit, there must not be an obligation to directly or indirectly pay the investment income to another person (e.g., through swaps, securities lending and borrowing, repurchase agreement transactions). For this reason, hedging or forward transactions that directly or indirectly hedge the risk arising from German equities or German dividend rights similar to equities may be detrimental. Hedging transactions on value and price indices are considered to be indirect hedges. The hedging transactions may also be detrimental if related parties are invested in the fund.
Even if the tax liability does not arise and therefore provisions initially recognized are reversed, or similar actions are taken, a relatively higher unit price may not benefit investors who participated in the fund at the time the provision was created.
- Tax risks from hedging transactions for major investors
The possibility that investment income tax on German dividends and income from domestic dividend rights similar to

equities that the investor originally generates may not be creditable or refundable in whole or in part cannot be ruled out. The investment income tax is fully offset or refunded if (i) the investor holds German equities and German dividend rights similar to equities for 45 days without interruption within a period of 45 days before and after the investment income was payable (91 days in total) and bears no less than 70% of the risk of a decline in value of the units or dividend rights without interruption throughout that entire 45-day period ("45-day rule"). Moreover, in order to receive an investment income tax credit, there must not be an obligation to directly or indirectly pay the investment income to another person (e.g., through swaps, securities lending and borrowing, repurchase agreement transactions). For this reason, hedging or forward transactions that directly or indirectly hedge the risk arising from German equities or German dividend rights similar to equities may be detrimental. Hedging transactions on value and price indices are considered to be indirect hedges. To the extent that the fund is to be considered a related party of the investor and enters into hedging transactions, these can result in these being attributed to the investor, and the investor therefore failing to comply with the 45-day rule.

In the event that investment income tax is not withheld from corresponding income that the investor originally generates, hedging transactions of the fund can result in these being attributed to the investor and the investor being required to remit the investment income tax to the tax office.

Key individual risk

If the investment performance of the master fund during a particular period is very positive, this success may also depend on the abilities of the individuals acting on behalf of the fund, and hence on the correct management decisions. Fund management personnel can change, however. New decision-makers might not be as successful.

Custody risk

The custody of assets, especially in foreign countries, involves a risk of loss that may result from insolvency, violation of due diligence or force majeure.

Default risk of the custodian or another credit institution

In the event of the default of the custodian, investors of the master fund may suffer financial losses insofar as the deposits they have made are not covered by the deposit insurance fund of the Bundesverband deutscher Banken e.V. [Federal Association of German Banks]. If deposits for the master fund are made with other credit institutions, investors may suffer financial losses insofar as these deposits are not covered by any existing deposit insurance systems.

The protection of deposits in the investment fund may also be limited despite the existence of deposit insurance systems as they regularly have restrictions regarding the coverage of deposits as per their rules and regulations.

Risks from trading and clearing mechanisms (settlement risk)

In the settlement of securities transactions through an electronic system, there is a risk that one of the contracting parties is late or fails to pay, or fails to deliver securities on time.

Information on possible risks associated with commodity derivative position limits / Possible effects on the investment strategy

As part of the implementation of the MiFID 2 Directive, the competent authorities shall set a quantitative threshold value for each commodity derivative traded on an exchange in a member state of the European Union or a Contracting State to the Agreement on the European Economic Area for the maximum size of a position in that derivative which a person may hold (position limit). The position limits apply to the fund as well. The operator of an exchange in which commodity derivatives are traded must establish procedures to monitor compliance with the established position limits (position management controls). Due to the defined position limits or the rights of the operator of the respective exchange within the framework of position management controls, there is a risk that positions in commodity derivatives may not be entered into at all or only partially, or that positions entered into must be liquidated or reduced. As a result, the Company may not be able to implement and adjust its investment strategy for commodity derivatives as planned. This may have an impact on the risk profile and performance of the fund.

Efficient portfolio management techniques

In accordance with Circular 13/559 issued by the Luxembourg supervisory authority, the Commission de Surveillance du Secteur Financier ("CSSF"), the master fund may use efficient portfolio management techniques. These include all forms of derivative transactions, as well as securities lending and borrowing and (reverse) repurchase agreement transactions.

Risks in the use of derivatives

The master fund may – provided an appropriate risk management system is in place – invest in any type of derivative that is based on assets that may be purchased for the master fund or on recognized financial indices, interest rates, exchange rates or currencies. In particular, this includes options, financial futures and swaps, as well as combinations thereof. Their use need not be limited to hedging the master fund's assets; they may also be part of the investment strategy. Trading in derivatives is conducted within the confines of the investment limits and provides for the efficient management of the master fund's assets, while also regulating investment maturities and risks.

Swaps

The master fund may, within the scope of the investment principles, conduct swap transactions including those listed below:

- interest rate swaps,
- currency swaps,
- equity swaps,
- Credit default swaps,
- Total return swaps.

Swap transactions are exchange contracts in which the parties swap the assets or risks underlying the respective transaction.

Total return swaps

If the master fund uses total return swaps or other derivatives with similar characteristics to substantially implement the master fund's investment strategy, information on aspects such as the underlying strategy or the counterparty will be provided in the special section of the Sales Prospectus of the master fund.

Swaptions

Swaptions are options on swaps. A swaption is the right, but not the obligation, to conduct a swap transaction, the terms of which are precisely specified, at a certain point in time or within a certain period.

Credit default swaps

Credit default swaps are credit derivatives that enable the transfer of a volume of potential credit defaults to other parties. As compensation for accepting the credit default risk, the seller of the risk pays a premium to its contracting party.

In all other aspects, the information for swaps applies accordingly.

Securitized financial instruments

The master fund may also acquire the financial instruments described in the preceding if they are securitized. It is also possible for the transactions involving financial instruments to be only partly securitized (as in the case of warrant-linked bonds). The statements on opportunities and risks apply accordingly to such securitized financial instruments, but with the condition that the risk of loss in the case of securitized financial instruments is limited to the value of the security.

OTC derivative transactions

The master fund may conduct both those derivative transactions admitted for trading on a stock exchange or included in another regulated market and over-the-counter (OTC) transactions. A process for accurate and independent assessment of the value of OTC derivatives will be employed.

Securities lending and borrowing and (reverse) repurchase agreement transactions

The master fund may transfer securities from its own assets to a counterparty for a specified period in return for a fee customary in the market. The master fund shall ensure that it is in a position to

demand the return of any lent security at any time, or to terminate any lending agreement entered into at any time.

a) Securities lending and borrowing transactions

The master fund may enter into securities lending and borrowing transactions. The applicable restrictions can be found in CSSF Circular 08/356, as amended.

These transactions may be entered into for one or more of the following purposes: (i) reduction of risk, (ii) reduction of cost and (iii) generation of additional capital or income with a level of risk that is consistent with the risk profile of the master fund and with the risk diversification rules applicable to it. These transactions may be conducted for 100% of the assets held by the master fund provided (i) that their volume is kept at an appropriate level at all times or that the master fund or the fund manager can require the return of the securities lent in a manner that enables the master fund to meet its redemption obligations at all times and (ii) that these transactions do not jeopardize the management of the master fund's assets in accordance with master fund's investment policy. The risks associated with these transactions shall be controlled within the framework of the risk management process of the master fund.

The master fund may enter into securities lending and borrowing transactions only if they comply with the following rules:

- The master fund may only lend securities through a standardized system operated by a recognized clearing house or through a securities lending and borrowing program operated by a top-rated financial institution that specializes in such transactions and is subject to prudential rules considered by the supervisory authority to be equivalent to those laid down in Community law.
- The borrower must be subject to prudential rules considered by the supervisory authority to be equivalent to those laid down in Community law.
- The counterparty risk with respect to a single counterparty (which, for the avoidance of doubt, may be reduced by the use of collateral) arising from one or more securities lending and borrowing may not exceed 10% of the assets of the master fund when the counterparty is a financial institution within the scope of article 41 (1) (f) of the Law of December 17, 2010, on undertakings for collective investment ("Law of December 17, 2010"), or 5% of its assets in all other cases.

The master fund shall disclose the total value of the securities lent in the annual and semiannual reports.

Securities lending and borrowing may also be conducted synthetically ("synthetic securities

lending and borrowing"). In a synthetic securities loan, a security contained in the master fund is sold to a counterparty at the current market price. The sale is, however, subject to the condition that the master fund simultaneously receives from the counterparty a securitized unleveraged option giving the master fund the right to demand delivery at a later date of securities of the same kind, quality and quantity as the sold securities. The price of the option (the "option price") is equal to the current market price received from the sale of the securities less (a) the securities lending fee, (b) the income (e.g., dividends, interest payments, corporate actions) from the securities whose return can be demanded upon exercise of the option and (c) the exercise price associated with the option. The option will be exercised at the exercise price during the term of the option. If the security underlying the synthetic securities loan is to be sold during the term of the option in order to implement the investment strategy, such a sale may also be executed by selling the option at the then prevailing market price less the exercise price.

Securities lending and borrowing may also, as the case may be, be entered into with respect to individual unit classes, taking into account the specific characteristics of such unit class and/or its investors, with any right to income and collateral under such securities lending and borrowing arising at the level of such specific unit class.

b) (Reverse) repurchase agreement transactions

The master fund may (i) enter into repurchase agreement transactions, which consist of the purchase and sale of securities with a clause granting the right to or imposing the obligation on the seller to repurchase from the buyer the securities sold at a price and at terms specified by the two parties in their contractual arrangement and (ii) enter into reverse repurchase agreement transactions, which consist of forward transactions that at maturity impose on the seller (counterparty) the obligation to repurchase the securities sold, and on the master fund the obligation to return the securities received under the transaction (collectively the "repurchase agreement transactions").

The master fund can act either as purchaser or seller in individual repurchase agreement transactions or in a series of continuing repurchase transactions. Its involvement in such transactions is, however, subject to the following rules:

- The master fund may not buy or sell securities using a repurchase agreement transaction unless the counterparty in that transaction is subject to prudential rules considered by the CSSF to be equivalent to those laid down in Community law.
- The counterparty risk arising from one or more repurchase agreement transactions with respect to a single counterparty (for clarification purposes: this may be reduced by the use of collateral) may not exceed 10% of

the assets of the master fund when the counterparty is a financial institution within the scope of article 41 (1) (f) of the Law of December 17, 2010, or 5% of its assets in all other cases.

- (iii) During the term of a repurchase agreement transaction in which the master fund acts as the purchaser, it cannot sell the securities that are the object of the contract until the right to repurchase these securities has been exercised by the counterparty, or until the repurchase term has expired, except to the extent that the master fund has other means of coverage.
- (iv) The securities acquired by the master fund under repurchase agreement transactions must conform to its investment policy and investment restrictions and must be limited to:
 - short-term bank certificates or money market instruments according to the definition in Directive 2007/16/EC of March 19, 2007;
 - bonds issued or guaranteed by an OECD member country or its local authorities or by supranational institutions and authorities at EU, regional or international level;
 - units of a UCI investing in money market instruments that calculates a net asset value daily and has a rating of AAA or an equivalent rating;
 - bonds issued by non-government issuers with appropriate liquidity; and
 - equities admitted to or trading in a regulated market in an EU member state or on a stock exchange in an OECD member country, as long as these equities are contained in a major index.

The master fund shall disclose in its annual and semiannual reports the total amount of the open repurchase agreement transactions as of the respective reporting date.

Repurchase agreement transactions may also be entered into with respect to individual unit classes, taking into account their respective specific characteristics and/or investor profiles, with any right to income and collateral under such repurchase agreement transactions arising at the level of the relevant unit class.

Collateral management for transactions with OTC derivatives and efficient portfolio management techniques

For transactions with OTC derivatives and for reverse repurchase agreement transactions, the master fund can accept collateral in order to reduce counterparty risk. For its securities lending and borrowing, the master fund must require collateral with a value of at least 90% of the total value of the securities lent during the contract term (taking into account interest, dividends, other potential rights and any agreed discounts or minimum transfer amounts).

The master fund can accept all collateral that corresponds to the regulations of CSSF circulars 08/356, 11/512 and 13/559.

I. For securities lending and borrowing, this collateral shall have been received before or at the time of the transfer of the securities lent. If the securities are lent via intermediaries, the transfer of the securities can take place before receipt of the collateral as long as the respective intermediary ensures the orderly completion of the transaction. Such intermediary can provide collateral in place of the borrower.

II. In general, collateral for securities lending and borrowing, reverse repurchase agreement transactions and transactions with OTC derivatives must be provided in one of the following forms:

- liquid assets such as cash, short-term bank deposits, money market instruments according to the definition in Directive 2007/16/EC of March 19, 2007, letters of credit and first-demand guarantees that are issued by top-rated credit institutions not affiliated with the counterparty, or bonds issued by an OECD member country or its local authorities or by supranational institutions and authorities at local, regional or international level;
- units of a UCI investing in money market instruments that calculates a net asset value daily and has a rating of AAA or an equivalent rating;
- units of a UCITS that invests primarily in the bonds and equities listed under the next two indents;
- bonds issued or guaranteed by top-rated issuers with appropriate liquidity; or
- equities admitted to or trading in a regulated market in a member state of the European Union or on a stock exchange in an OECD member country, as long as these equities are contained in a major index.

III. Collateral that is not provided in the form of cash or units of UCIs/UCITS must have been issued by a legal entity that is not affiliated with the contracting party.

IV. If collateral provided in the form of cash exposes the master fund to a credit risk with respect to the administrator of this collateral, such exposure shall be subject to the 20% restriction indicated in article 43 (1) of the Law of December 17, 2010. In addition, such cash collateral may not be held in custody by the counterparty unless it is legally protected from the consequences of a default of the counterparty.

V. Non-cash collateral may not be held in custody by the counterparty unless it is adequately segregated from the counterparty's own assets.

VI. If collateral fulfills a series of criteria such as standards for liquidity, valuation, credit quality of the issuer, correlation and diversification, it can be offset against the gross commitment of the counterparty. If collateral is offset, its value may be discounted by a certain percentage depending on its price volatility. This discount (or "haircut") is

intended to compensate for short-term fluctuations in the value of the commitment and the collateral. As a rule, no discount is generally applied to cash collateral.

The criterion of adequate diversification in relation to issuer concentration is deemed fulfilled if the master fund, in the context of transactions with OTC derivatives or of reverse repurchase agreement transactions, receives from a counterparty a collateral basket having a maximum exposure to a particular issuer of 20% of the net asset value. If the master fund is exposed to risks involving different counterparties, the different collateral baskets must be aggregated to calculate the 20% limit with respect to a single issuer.

Notwithstanding the foregoing paragraph, up to 100% of the collateral received by the master fund may be held in securities and money market instruments stemming from different issues that are issued or guaranteed by a member state of the European Union, its local authorities, a third country or a public international body of which one or more member states of the European Union are members, provided that the master fund holds securities stemming from at least six different issues and securities from one issue do not exceed 30% of the net asset value of the master fund.

VII. The master fund has a strategy for applying the valuation discounts on financial assets that are accepted as collateral ("haircut strategy").

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined based on the haircut strategy. The haircut strategy takes into account a variety of factors depending on the nature of the collateral received, such as the credit quality of the issuer, the maturity, the currency, price volatility of the assets and the outcome of any stress tests that the master fund performs under normal and extreme liquidity scenarios. A haircut strategy is normally not applied to cash collateral.

Through the use of the haircut strategy the Company of the master fund requires contracting parties to furnish collateral for OTC derivative transactions, securities lending transactions and reverse repurchase agreement transactions, applying the following collateralization rates:

Collateralization rate for	at least
Cash	100%
Fixed rate securities (depending on rating and type of instrument)	102%
Equities (depending on liquidity)	104%
ETFs	102%
Convertible bonds	104%

VIII. The collateralization rates are reviewed for appropriateness on a regular basis, at least once each year, and are adjusted if necessary.

IX. The master fund (or its representatives) carry out a daily valuation of the securities received. Should the value of collateral previously provided appear to be insufficient in view of the amount to be covered, the counterparty must provide additional collateral at very short notice.

X. The master fund shall ensure that it is able to assert its rights in relation to the collateral if an event occurs requiring the execution of these rights, meaning that the collateral shall be available at all times, either directly or through the intermediary of a top-rated financial institution or a wholly owned subsidiary of that institution, in a form that allows the master fund to appropriate or make use of the assets provided as collateral if the counterparty does not comply with its obligation to return the securities lent.

XI. For the length of the agreement, the collateral cannot be sold, otherwise provided as collateral or pledged unless the master fund has other means of coverage.

XII. If the master fund receives collateral for at least 30% of its assets, the resulting risk must be measured by means of regular stress tests, which shall be conducted under normal and exceptional liquidity conditions, in order to assess the effects of changes on market value and on the liquidity risk associated with the collateral. The guidelines for conducting liquidity stress tests shall include a presentation of the following:

- a) the concept for analyzing the stress test scenario, including calibration, certification and sensitivity analysis;
- b) the empirical approach for estimating consequences, including the back-testing of liquidity risk assessments;
- c) the reporting frequency, as well as the reporting limits and loss tolerance thresholds;
- d) the measures for stemming losses, including haircut strategy and gap-risk protection.

Investment principles and limits, assets, master fund

Assets of the feeder fund

The Company can acquire the following assets for the account of the feeder fund:

- Shares of the master fund,
- bank balances according to article 195 KAGB,
- Derivatives according to article 197 (1) KAGB, provided they are used only for hedging purposes.

Details of these assets, and of the investment limits applicable to them, are presented below.

Investment instruments in detail

1. Shares of the master fund

Investment powers and restrictions of the master fund

The master fund can make investments in the following assets:

A. Investments

- a) The master fund can invest in securities and money market instruments that are listed on or traded in a regulated market.
- b) The master fund can invest in securities and money market instruments that are traded in another market in a member state of the European Union that operates regularly and is recognized, regulated and open to the public.
- c) The master fund can invest in securities and money market instruments that are admitted for official trading on a stock exchange in a country that is not a member state of the European Union or traded in another regulated market in that state that is recognized, open to the public and operates regularly.
- d) The master fund can invest in newly issued securities and money market instruments, provided that
 - the terms of issue include the obligation to apply for admission to a stock exchange or for trading in another regulated market that operates regularly and is recognized and open to the public, and
 - such admission is procured no later than one year after the issue.
- e) The master fund can invest in units of undertakings for collective investment in transferable securities (UCITS) and/or of other collective investment undertakings (UCIs) as defined in Directive 2009/65/EC (the UCITS Directive, as amended) within or outside of a member state of the European Union, provided that
 - such other collective investment undertakings were authorized under laws that provide that they are subject to supervision considered by the CSSF to be equivalent to that laid down in Community law, and that cooperation between authorities is sufficiently ensured;
 - the level of protection for unitholders of the other collective investment undertakings is equivalent to that provided for unitholders of an undertaking for collective investment in transferable securities, and in particular that the rules on asset segregation, borrowing, lending, and short sales of securities and money market instruments are equivalent to the requirements of the UCITS Directive;
 - the business activity of the other collective investment undertakings is reported in annual and semiannual reports to enable an assessment to be made of the assets and liabilities, income and operations over the reporting period;
 - no more than 10% of the assets of the undertaking for collective investment in transferable securities or of the other collective investment undertaking whose acquisition is being contemplated can,

according to its terms of contract or its Articles of Incorporation, be invested in units of other undertakings for collective investment in transferable securities or other collective investment undertakings.

Such units meet the requirements of article 41 (1) (e) of the Luxembourg Law of December 17, 2010, and all references to “funds” in the special section of the Sales Prospectus of the master fund shall be interpreted accordingly.

- f) The master fund can invest in deposits with credit institutions that are repayable on demand or have the right to be withdrawn, and mature within twelve months or less, provided that the credit institution has its registered office in a member state of the European Union or, if the credit institution has its registered office in a country that is not a member state of the European Union, provided that it is subject to prudential rules considered by the Commission de Surveillance du Secteur Financier to be equivalent to those laid down in Community law.
- g) The master fund can invest in derivative financial instruments (“derivatives”), including equivalent cash-settled instruments, that are traded in one of the markets referred to in (a), (b) and (c) and/or in derivative financial instruments that are not traded on a stock exchange (“OTC derivatives”), provided that
 - the underlying instruments are instruments covered by this paragraph, or are financial indices, interest rates, foreign exchange rates or currencies;
 - the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the CSSF; and
 - the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the master fund’s initiative.
- h) The master fund can invest in money market instruments not traded in a regulated market that are usually traded in the money market, are liquid and have a value that can be accurately determined at any time, provided that the issue or issuer of such instruments is itself subject to regulations for the protection of savings and investors, and provided that these instruments are
 - issued or guaranteed by a central, regional or local authority or the central bank of a member state of the European Union, the European Central Bank, the European Union or the European Investment Bank, a country that is not a member state of the European Union or, in the case of a federal state, by one of the members making up the federation, or by a public international body of which one or more member states of the European Union are members; or
 - issued by a company whose securities are traded in the regulated markets specified in (a), (b) or (c) above; or
 - issued or guaranteed by an institution that is subject to supervision according to the

criteria stipulated in Community law, or by an institution that is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those laid down in Community law; or

- issued by other issuers belonging to a category approved by the CSSF, provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third preceding indent, and provided that the issuer is a company whose capital and reserves amount to at least EUR 10 million and which presents and publishes its annual accounts in accordance with the Fourth Council Directive 78/660/EEC, or is an entity that, within a group of companies that includes one or several listed companies, is dedicated to the financing of the group or is an entity that is dedicated to the financing of securitization vehicles that benefit from credit lines to assure liquidity.
- i) Notwithstanding the principle of risk spreading, the master fund can invest up to 100% of its assets in securities and money market instruments stemming from different issues that are issued or guaranteed by a member state of the European Union, its local authorities, a member country of the Organisation for Economic Cooperation and Development (OECD), the G20 or Singapore, or by public international bodies of which one or more member states of the European Union are members, provided that the master fund holds securities that originated from at least six different issues and the securities stemming from any one issue do not exceed 30% of the master fund's assets.
- j) The master fund may not invest in precious metals or precious-metal certificates; should the investment policy of the master fund make specific reference to this provision, this restriction shall not apply to 1:1 certificates whose underlying is one single commodity or precious metal and that meet the requirements for securities according to article 1 (34) of the Luxembourg Law of December 17, 2010.

B. Investment limits

- a) No more than 10% of the master fund's net assets may be invested in securities or money market instruments of any one issuer.
- b) No more than 20% of the master fund's net assets may be invested in deposits made with any one institution.
- c) The default risk exposure to a counterparty in OTC derivative transactions entered into in the context of efficient portfolio management may not exceed 10% of the master fund's net assets if the counterparty is a credit institution as defined in A. (f) above. In all other cases, the maximum exposure is 5% of the master fund's net assets.
- d) The total value of the securities and money market instruments of issuers in which the master fund respectively invests more than 5% of its net assets may not exceed 40% of the

master fund's net assets.

This limitation does not apply to deposits or OTC derivative transactions made with financial institutions subject to prudential supervision.

Notwithstanding the individual upper limits specified in B. (a), (b) and (c) above, the master fund may not invest more than 20% of its net assets in a combination of

- securities or money market instruments issued by this institution and/or
- deposits made with this institution and/or
- OTC derivatives acquired from this institution.
- e) The upper limit of 10% specified in B. (a) rises to 35% and the limit set in B. (d) does not apply if the securities or money market instruments are issued or guaranteed by
 - a member state of the European Union or its local authorities; or
 - a country that is not a member state of the European Union; or
 - public international bodies of which one or more member states of the European Union are members.
- f) The upper limit specified in B. (a) rises from 10% to 25% and the limit set in B. (d) does not apply, in the case of bonds that fulfill the following conditions:
 - they are issued by a credit institution that has its registered office in a member state of the European Union and which is legally subject to special public supervision intended to protect the holders of such bonds, and
 - sums deriving from the issue of such bonds are invested in accordance with the law in assets that, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds, and
 - such assets, in the event of default of the issuer, would be used on a priority basis for the repayment of the principal and payment of the accrued interest.

If the master fund invests more than 5% of its assets in bonds of this type issued by any one issuer, the total value of these investments may not exceed 80% of the master fund's net assets.

- g) The limits specified in B. (a), (b), (c), (d), (e) and (f) may not be combined, and thus investments in securities or money market instruments issued by any one institution or in deposits made with this institution or in this institution's derivatives shall under no circumstances exceed 35% of the master fund's net assets.
 - The master fund can cumulatively invest up to 20% of its assets in securities and money market instruments of any one group of companies.
 - Companies that are included in the same group for the purposes of consolidated accounting as defined in EU Directive 83/349/EEC or in accordance with recognized international accounting rules shall be regarded as a single issuer for the purpose of calculating the investment limits specified in this article.

- h) The master fund may invest no more than 10% of its net assets in securities and money market instruments other than those specified in A.

- i) The master fund may invest no more than 10% of its net assets in units of other undertakings for collective investment in transferable securities (UCITS) or in other collective investment undertakings (UCIs) as defined in A. (e). For investments in units of another undertaking for collective investment in transferable securities and/or other collective investment undertaking, the asset values of the undertaking for collective investment in transferable securities and/or other collective investment undertaking in question are not taken into account in relation to the upper limits specified in B. (a), (b), (c), (d), (e) and (f).

- j) If admission to one of the markets defined under A. (a), (b) or (c) is not obtained within the one-year deadline, new issues shall be considered unlisted securities and money market instruments and counted towards the investment limit stated there.
- k) The master fund may not acquire equities with voting rights that would enable it to exercise significant influence over the management of the issuer.

The master fund's umbrella may acquire no more than

- 10% of the non-voting shares of any one issuer;
- 10% of the debt securities of any one issuer;
- 25% of the units of any one fund;
- 10% of the money market instruments of any one issuer.

The investment limits specified in the second, third and fourth indents may be disregarded at the time of acquisition if at that time the gross amount of the debt securities or of the money market instruments, or the net amount of the securities in issue, cannot be calculated.

- l) The investment limits specified in (k) shall not be applied to:
 - securities and money market instruments issued or guaranteed by a member state of the European Union or its local authorities;
 - securities and money market instruments issued or guaranteed by a country that is not a member state of the European Union;
 - securities and money market instruments issued by public international bodies of which one or more member states of the European Union are members;
 - shares held by the master fund in the capital of a company that is incorporated in a country that is not a member state of the European Union, and which invests its assets mainly in the securities of issuers having their registered offices in that country, where under the legislation of that country such a holding represents the only way in which the master fund can invest in the securities of issuers of that country. This derogation, however, shall apply only if in its investment policy the master fund from the country that is not a member state of the European Union complies with the limits specified in B. (a), (b), (c), (d), (e), (f) and (g),

(i) and (k). Where these limits are exceeded, article 49 of the Law of December 17, 2010, on undertakings for collective investment shall apply;

- shares held by one or more investment companies in the capital of subsidiary companies that only conduct certain management, advisory or marketing activities with regard to the repurchase of units at the request of unitholders in the country where the subsidiaries are located, and do so exclusively on behalf of that investment company or those investment companies.
- m) Notwithstanding the limits specified in B. (k) and (l), the maximum limits specified in B. (a), (b), (c), (d), (e) and (f) for investments in equities and/or debt securities of any one issuer are 20% when the objective of the investment policy is to replicate the composition of a specific index or a leveraged index. This requires that:
 - the composition of the index is sufficiently diversified;
 - the index represents an adequate benchmark for the market to which it refers;
 - the index is published in an appropriate manner.

The limit specified here is 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain securities or money market instruments are highly dominant. An investment up to that limit shall be permitted for only one single issuer.

- n) The master fund's overall exposure relating to derivatives must not exceed the total net value of its portfolio. The risk is calculated taking into account the market value of the underlying assets, the default risk exposure of the counterparty, future market movements and the time available to liquidate the positions. The master fund can, as part of its investment strategy and within the limits of B. (g), invest in derivatives, provided that the overall risk of the underlyings does not exceed the investment limits of B. (a), (b), (c), (d), (e) and (f). If the master fund invests in index-based derivatives, these investments are not taken into consideration as regards the investment limits specified in B. (a), (b), (c), (d), (e) and (f). When a security or money market instrument embeds a derivative, the latter must be taken into consideration when complying with the requirements of the investment limits.
- o) The master fund can additionally invest up to 49% of its assets in liquid assets. In particular exceptional cases, it is permitted to temporarily have more than 49% invested in liquid assets, if and to the extent that this appears to be justified with regard to the interests of unitholders.

C. Exceptions to investment limits

- a) The master fund need not comply with the investment limits when exercising subscription

rights attaching to securities or money market instruments that form part of its assets.

- b) While ensuring compliance with the principle of risk spreading, the master fund can depart from the specified investment limits for a period of six months following the date of its authorization.

D. Cross-investment between sub-funds of DWS Invest

The master fund (the "Investing Sub-Fund") may invest in one or several other sub-funds of DWS Invest. Any acquisition by the Investing Sub-Fund of units of another sub-fund (the "Target Sub-Fund") is subject to the following conditions (and to all the other conditions that have been specified in this Sales Prospectus):

- a) the Target Sub-Fund may not invest in the Investing Sub-Fund;
- b) the Target Sub-Fund may invest no more than 10% of its net assets in UCITS (including other sub-funds) or other UCIs;
- c) the voting rights associated with the units of the Target Sub-Fund are suspended for as long as the units involved are held by the Investing Sub-Fund;
- d) the value of the units of the Target Sub-Fund held by the Investing Sub-Fund is not considered in the verification of the statutory minimum capital requirement of EUR 1,250,000.00.
- e) there shall be no double charging of management, subscription or redemption fees.

E. Loans

The master fund may not borrow. However, the master fund may acquire foreign currencies by means of a "back-to-back" loan.

Notwithstanding the preceding paragraph, the master fund may borrow:

- up to 10% of the master fund's assets, provided that such borrowing is on a temporary basis;
- up to 10% of the master fund's assets, provided that the borrowing is to make possible the acquisition of real estate essential for the direct pursuit of its business; in this case the borrowing and that referred to in the preceding sentence may not in any case exceed in total 15% of the respective master fund's net assets.

The master fund may not grant loans or act as a guarantor on behalf of third parties.

This shall not prevent the acquisition of securities, money market instruments or other financial instruments that are not yet fully paid in.

F. Short sales

The master fund may not engage in short sales of securities, money market instruments or other

financial instruments referred to in A. (e), (g) and (h).

G. Encumbrance

The master fund's assets may only be pledged as collateral, transferred, assigned or otherwise encumbered to the extent that such transactions are required by a stock exchange or regulated market or imposed by contractual or other terms and conditions.

H. Regulations for DWS Invest

DWS Invest will not acquire shares with voting rights where such an acquisition would give it significant influence on the management policies of the issuer.

The master fund can acquire movable and immovable property if it is essential for the direct pursuit of its business.

I. Bank balances according to article 195 KAGB

The Company may invest up to 15% of the feeder fund's assets in bank balances for the account of the master fund. Bank balances must mature within twelve months or less, and shall be kept in blocked accounts at credit institutions having their registered offices in a member state of the EU or in another state that is a party to the Agreement on the EEA. They may also be held at credit institutions having their registered offices in a third country having prudential rules considered by BaFin to be equivalent to those of EU legislation.

2. Derivatives according to article 197 (1) KAGB

Unless otherwise provided for in the special section of the Sales Prospectus, the Company may conduct transactions with derivatives for the fund as part of the investment strategy. This includes derivative transactions for efficient portfolio management and for achieving additional income, i.e., also for speculative purposes. That can increase the risk of loss in the fund at least temporarily.

A derivative is an instrument whose price depends on the price fluctuations or expected prices of other ("underlying") assets. The following discussion concerns both derivatives and financial instruments with derivative components (collectively "derivatives").

The market risk may not be more than doubled through the use of derivatives in the master fund and in this feeder fund ("market risk limit"). Market risk is the risk of loss arising from fluctuations in the market values of assets held in the feeder fund that are attributable to changes in variable market prices and rates such as interest rates, exchange rates and the prices of equities and commodities, or to changes in the creditworthiness of an issuer. The Company must comply with the market risk limit on an ongoing basis. It must determine on a daily basis the extent to which the market risk limit

has been reached as provided for by law, specifically the Regulation on Risk management and risk measurement when using Derivatives, securities loans and repurchase agreement transactions in investment undertakings according to the German Investment Code ("Derivatives Regulation").

Precise details on which derivatives the Company may acquire for the account of the feeder fund, and on the method being used for determining the extent to which the market risk limit has been reached, are presented in the "Derivatives" section in the special section.

Futures contracts

Futures contracts are agreements that unconditionally bind both parties to buy or sell a particular amount of a certain underlying at a predetermined price at a certain point in time, at maturity or within a certain period. The Company may, within the scope of the investment principles, enter into futures contracts for the account of the feeder fund on securities and money market instruments acquirable for the feeder fund, as well as on interest rates, exchange rates, currencies and qualified financial indices.

Options

In options transactions, a third party is granted, in exchange for a consideration ("option premium"), the right to demand delivery or acceptance of assets during a specific period of time or at the end of a specific period at a predetermined price ("strike price"), or to demand payment of a cash settlement, or to acquire corresponding options. The Company may take part in options transactions for the account of the fund within the scope of the investment principles.

Swaps

Swaps are exchange contracts in which the parties swap the cash flows or risks underlying the respective transaction. The Company may, within the scope of the investment principles, conduct swap transactions such as interest rate swaps, currency swaps, interest rate/currency swaps and variance swaps for the account of the feeder fund.

Swaptions

Swaptions are options on swaps. A swaption is the right, but not the obligation, to conduct a swap transaction, the terms of which are precisely specified, at a certain point in time or within a certain period. In all other aspects, the principles established for options apply. The Company may only conclude swaptions for the account of the feeder fund that consist of the options and swaps described above.

Credit default swaps

Credit default swaps are credit derivatives that enable the transfer of a volume of potential credit defaults to other parties. As compensation for accepting the credit default risk, the seller of the risk pays a premium to its contracting party. In all other aspects, the information for swaps applies accordingly.

Total return swaps

Total return swaps are derivatives in which all income and price changes of an underlying are exchanged for an agreed fixed interest payment. A contracting party, the protection buyer, transfers the entire credit and market risk of the underlying to the other contracting party, the protection seller. In return, the protection buyer pays a premium to the protection seller.

If total return swaps are used for the feeder fund, the details are outlined in the "Use of total return swaps" section of the special section.

Securitized financial instruments

The Company may also acquire for the account of the feeder fund the financial instruments described in the preceding if they are securitized. It is also possible for the transactions involving financial instruments to be only partly securitized (as in the case of warrant-linked bonds). The statements on opportunities and risks apply accordingly to such securitized financial instruments, but with the condition that the risk of loss in the case of securitized financial instruments is limited to the value of the security.

OTC derivative transactions

The Company may conduct for the account of the feeder fund both those derivative transactions admitted for trading on a stock exchange or admitted to or included in another organized market and over-the-counter ("OTC") transactions.

The Company may conduct derivative transactions that are neither admitted for trading on a stock exchange nor admitted to or included in another organized market only with suitable credit institutions or financial services institutions on the basis of standardized master agreements. For derivatives traded other than on a stock exchange, the counterparty risk of a contracting party is limited to 5% of the feeder fund's assets. If the contracting party is a credit institution having its registered office in a member state of the EU, in another state that is a party to the Agreement on the EEA or in a third country with a comparable level of supervision, the counterparty risk may amount to 10% of the feeder fund's assets. Derivative transactions conducted other than on a stock exchange where the contracting party is the central clearing house of a stock exchange or another organized market are not included when determining these limits if the derivatives are marked to market daily, with a daily margin settlement. However, amounts due to the feeder fund from an intermediary trader are attributed to these limits, even if the derivative is traded on a stock exchange or in another organized market.

Borrowing

Short-term borrowing of up to 10% of the feeder fund's assets for the collective account of the investors is permissible if the borrowing conditions

are customary in the market, and if the custodian grants its consent.

Leverage

Leverage designates any method by which the Company can increase the investment level of the feeder fund. The level of investment represents the percentage of positions with a market risk exposure in the feeder fund and can rise to over 100% of the net asset value due to the leverage effect of derivatives. Leverage is mainly generated through the use of derivatives, through borrowing and through reinvestment of collateral from securities lending and repurchase agreement transactions. Derivatives also include structured products with a derivative component such as bonus and discount certificates, credit-linked notes and convertible bonds.

The Company may use such methods for the feeder fund to the extent described in this Sales Prospectus. The possibility of using derivatives and entry into securities lending transactions and repurchase agreement transactions is presented in the section "Investment principles and limits – Assets – Derivatives," and/or "Securities lending transactions and repurchase agreement transactions." The possibility of borrowing is explained in the section "Investment principles and limits – Borrowing."

Leverage is calculated in accordance with the gross method. All derivatives are included in the calculation, regardless of whether the derivatives are used for hedging risk or for optimizing returns. The gross leverage of the feeder fund is determined from the ratio of the total of the absolute values of all positions of the feeder fund with a market risk exposure and the net asset value of the fund. Cash and other assets in the fund currency that are free of market risk are not taken into account.

Individual derivative transactions or securities positions are not offset against each other in the calculation, i.e., netting and hedging agreements are not taken into account. Any effects from the reinvestment of collateral in securities lending transactions and repurchase agreement transactions are taken into account.

The calculation of the net asset value is explained in the section "Units – Issue and redemption price."

The Company anticipates that the leverage for the feeder fund calculated according to the gross method shall not exceed more than five times its net asset value. Depending on market conditions, however, leverage can fluctuate, and the intended threshold may therefore be exceeded in spite of constant monitoring by the Company.

Valuation

General asset valuation rules

Assets admitted for trading on a stock exchange/ traded in an organized market

Assets that are admitted for trading on a stock exchange or admitted to or included in another organized market, as well as subscription rights for the feeder fund, are valued at the most recent available trading price permitting reliable valuation, unless otherwise provided for in the following section "Special rules for the valuation of individual assets."

Assets neither listed on stock exchanges nor traded in organized markets, or assets having no trading price

Assets that are neither admitted for trading on stock exchanges nor admitted to or included in another organized market, or for which there is no trading price, are valued at the current market value deemed appropriate on the basis of a careful assessment using suitable valuation models and taking into consideration current market conditions, unless otherwise provided for in the following section "Special rules for the valuation of individual assets."

Special rules for the valuation of individual assets

Unlisted bonds and promissory note loans

For the purposes of valuing bonds that are neither admitted for trading on a stock exchange nor admitted to or included in another organized market (e.g., unlisted debt instruments, commercial papers and certificates of deposit) and for the valuation of promissory note loans, the market prices agreed for comparable bonds and note loans and, if applicable, the market prices of bonds of comparable issuers and with equivalent maturities and interest rates are used, less a discount to compensate for limited marketability, if necessary.

Options and futures contracts

Options belonging to the feeder fund and liabilities from options granted to third parties that are admitted for trading on a stock exchange or admitted to or included in another organized market are valued at the most recent available trading price permitting reliable valuation.

The same applies with respect to amounts receivable and payable under futures contracts sold for the account of the feeder fund. The initial margins charged to the feeder fund are included in the value of the feeder fund, taking into account the gains and losses in valuation established on the valuation date.

Swaps

Swaps are valued at the market value deemed appropriate on the basis of a careful assessment using suitable valuation models and taking into consideration overall circumstances.

Bank balances, other assets, liabilities, time deposits and master fund shares

Bank balances are generally valued at their nominal value plus accrued interest.

Time deposits are valued at their market value, provided that the time deposit may be canceled at any time and repayment is not at nominal value plus interest.

Shares of the master fund are generally recognized at the most recently determined redemption price or at the most recent available trading price permitting reliable valuation. If these values are not available, units of investment funds are valued at the current market value deemed appropriate on the basis of a careful assessment using suitable valuation models and taking into consideration current market conditions.

Securities lending transactions and repurchase agreement transactions

Repayment claims arising from securities lending transactions are governed by the applicable market value of the assets transferred as loans.

Assets sold under repurchase agreements for the account of the feeder fund shall continue to be taken into account in the valuation. In addition, the amounts received for the account of the feeder fund under repurchase agreement transactions shall be reported as bank balances.

Assets purchased under repurchase agreements for the account of the feeder fund shall not be taken into account in the valuation. Because of the payments made by the feeder fund, a claim against the transferor in the amount of the discounted repayment claims must be taken into account in the valuation.

Assets denominated in foreign currency

Assets denominated in foreign currency shall be converted on the same day into the currency of the feeder fund using the exchange rate quoted for the respective currency pair on the Thomson Reuters trading platform.

Sub-funds

The feeder fund is not a sub-fund of an umbrella structure.

Units

The rights of investors are represented by share certificates or are issued as electronic share certificates. Securitised share certificates are securitized exclusively in global certificates. These global certificates are kept at a central depository for securities. Investors are not entitled to receive physical delivery of individual share certificates. Units may only be acquired for holding in custody accounts. Units are made out to bearer.

Obligation to deposit actual securities

Bearer units in the form of definitive securities were issued for the investment fund in the past. According to the KAGB, these definitive securities may no longer remain in the possession of investors and must, along with the coupons not yet due, instead be held in collective custody by a central custodian for securities, an authorized or recognized domestic or foreign central custodian or another suitable foreign custodian. Investors cannot demand that these definitive securities be re-issued to them. The Company may replace the deposited definitive securities with securitization of the corresponding units in a global certificate.

Bearer share certificates that were still not held in collective custody at one of the aforementioned institutions by December 31, 2016, became null and void after this date. This also applies to the coupons that are not yet due. As of January 1, 2017, the rights of the investors in question were instead represented in a global certificate. The investors then became co-owners, in proportion to their share of the fund's assets, of this global certificate and of the collective holdings to which the certificate pertains. They can still submit their void bearer share certificates to the custodian of the feeder fund and demand that their units in the feeder fund instead be credited to a custody account.

Issue and redemption of units

The Company prohibits all activities connected with market timing and similar practices, and it reserves the right to refuse buy, sell and exchange orders if it suspects that such practices are being applied. In such cases, the Company will take all measures necessary to protect the other investors in the feeder fund.

Issue of units

The number of units issued is generally unlimited. Units can be purchased from the custodian. They are issued by the custodian at the issue price, which is equal to the net asset value per unit plus an initial sales charge. Acquisition through an intermediary is also generally possible; additional costs may be incurred. The Company reserves the right to suspend or definitively discontinue the issue of units. The issue of units may be suspended in whole or in part.

If a minimum investment is required for an investment, this fact is disclosed in the "Minimum investment" section of the special section.

Redemption of units

Investors can request the redemption of units on each valuation date unless the Company has limited or temporarily suspended the redemption of units (see section "Units – Suspension of the redemption of units"). Redemption orders must be placed with the custodian, the Company itself or with an intermediary (such as the institution maintaining the custody account). The Company is obligated to redeem units at the redemption price applicable on the settlement date, which

corresponds to the net asset value per unit determined on that date less any applicable redemption fee. Redemption can also take place through an intermediary (such as the institution maintaining the custody account), which may give rise to additional costs.

Settlement when issuing and redeeming units

The Company complies with the principle of equal treatment of investors by ensuring that no investor can gain an advantage by buying or selling units at known net asset values per unit. It therefore imposes a daily order acceptance deadline. The settlement of issue and redemption orders received at the offices of the custodian or the Company by the order acceptance deadline shall take place no later than the valuation date following the date on which the order was received (= the settlement date) at the net asset value per unit determined on that date. Orders received by the custodian or the Company after the acceptance deadline are not settled until the valuation date immediately following that next valuation date (= the settlement date) at the net asset value per unit determined on that date. The special section and the Special Terms and Conditions of Investment can provide otherwise in particular individual cases. The order acceptance deadline for this feeder fund is published on the Internet at www.dws.com. It can be changed by the Company at any time.

Third parties like the institution maintaining the custody account for the investor, for example, can additionally act as intermediaries in the issue and redemption of units. This can result in longer settlement periods. The Company has no influence on the different settlement arrangements of institutions maintaining custody accounts.

Unless otherwise provided for in the special section, the posting of the respective units or the transfer of the amount to be received takes place two bank business days after the settlement date. This period refers to the processing activity between the institution maintaining the custody account and the custodian. Posting or transfer from the institution maintaining the custody account to the desired recipient account must follow afterward, and may lead to additional delays. Investors should therefore allow sufficient time when planning for specific payment dates.

Restriction of the redemption of units

The Company can restrict the redemption of units for a total of up to 15 consecutive working days if the redemption requests of the investors on the first settlement date of the 15 working days reaches at least 10% of the net asset value (threshold). If the threshold is reached or exceeded, the Company decides according to its best judgment whether it will restrict the redemption on this settlement date. If it decides to restrict redemption, it may continue this for up to 14 consecutive working days on the basis of a daily discretionary judgment. It may decide to do so if

the redemption requests can no longer be executed in the interests of all investors due to the liquidity situation of the fund. This may be the case, for example, if the liquidity of the assets of the fund deteriorates due to political, economic or other market events and is therefore no longer sufficient for executing all of the redemption requests on the settlement date. In such cases, the redemption restriction should be considered a more moderate measure compared to a suspension of redemption.

If the Company decides to restrict the redemption, it shall only redeem the units on a pro rata basis at the redemption price applicable on the settlement date. Other than that, the redemption obligation shall not apply. This means that each redemption order is executed only on a pro rata basis according to a ratio determined by the Company. In the interests of the investors, the Company determines the ratio on the basis of the available liquidity and the total number of orders for the applicable settlement date. The extent of the available liquidity is heavily dependent on the current market environment. The ratio stipulates at what percentage the redemption requests are to be paid out on the settlement date. The part of the order that is not executed (remaining order) will not be executed by the Company at a later date, but instead expires (pro-rata approach with forfeiture of the remaining order).

The Company decides on each valuation date whether and on the basis of which ratio it will restrict redemption. The Company can restrict the redemption for a maximum of 15 consecutive working days. The possibility of suspending the redemption remains unaffected.

The Company immediately publishes information on the restriction of the redemption of units as well as the lifting of such restriction on its website.

The redemption price corresponds to the net asset value per unit determined on that day less a redemption fee, where applicable. Redemption through an intermediary (e.g., the institution maintaining the custody account) is also possible; additional costs may be incurred for the investor when so doing.

Suspension of the redemption of units

The Company may suspend the redemption of units under exceptional circumstances that make a suspension appear necessary when taking into consideration the interests of investors. Such exceptional circumstances include, for example, the unscheduled closing of a stock exchange on which a significant portion of the securities of the feeder fund is traded or that the assets of the feeder fund cannot be valued. In addition, BaFin may order that the Company suspend the redemption of units if that is necessary in the interests of the investors or the public.

The Company reserves the right not to redeem or exchange units until it has disposed of assets of

the feeder fund without delay, but serving the interests of all investors, at the redemption price then applicable. A suspension without subsequent resumption of the redemption of units can lead directly to a liquidation of the investment fund (see section "Liquidation, transfer and merger of the feeder fund").

If the master fund temporarily suspends the redemption of its shares, the Company in turn has the right to suspend the redemption of units of this feeder fund during the same period of time.

The Company shall notify the investors, by means of an announcement in the Bundesanzeiger and on the Internet at www.dws.com, about the suspension of the redemption of units and its resumption. The institutions maintaining the custody accounts shall also inform investors by means of a durable medium, such as on paper or in electronic format.

Liquidity management

The Company has specified written principles and procedures for the feeder fund that enable it to monitor the feeder fund's liquidity risks and to ensure that the liquidity profile of the investments of the feeder fund matches the underlying liabilities of the feeder fund. The principles and procedures include:

- The Company monitors the liquidity risks that may arise at the level of the feeder fund or of the assets. It makes an assessment of the liquidity of the assets held in the feeder fund in relation to the fund's assets and stipulates a liquidity ratio. The evaluation of liquidity includes, for example, an analysis of the trading volume, the complexity of the asset and the number of trading days that are required to dispose of the respective asset without influencing the market price. The Company also monitors the investments in target funds and their redemption policies, and any resulting impact on the liquidity of the feeder fund.
- The Company monitors the liquidity risks that can result from elevated demand by investors for the redemption of units. Here it forms expectations about net changes in capital, taking into account available information on the investor structure and experience from historical net changes in capital. It takes into account the effects of large-scale call risks and other risks (such as reputational risks).
- The Company has established adequate liquidity risk limits for the feeder fund. It monitors compliance with these limits and has specified procedures to follow if the limits are or might be exceeded.
- The procedures instituted by the Company ensure consistency between liquidity ratio, the liquidity risk limits and the net changes in capital to be expected.

The Company reviews these principles regularly and updates them accordingly.

The Company conducts stress tests on a regular basis, at least once each year, with which it can evaluate the liquidity risks of the feeder fund. The Company conducts the stress tests on the basis of reliable and current quantitative or, where that is not appropriate, qualitative information. This information includes investment strategy, redemption periods, payment obligations and periods within which the assets can be sold, as well as information relating to general investor behavior and market developments. The stress tests simulate any potential lack of liquidity of the assets in the feeder fund, as well as requests for redemptions that are unusual in terms of number and scope. They cover market risks and their effects, including margin calls, collateral requirements or lines of credit. They take into account valuation sensitivities under stress conditions. They are performed at frequencies appropriate for the type of feeder fund, taking into account the investment strategy, the liquidity profile, the type of investor and the redemption principles of the feeder fund.

The redemption rights under normal and extraordinary circumstances as well as the restriction or suspension of redemption are set out in the sections "Units – Issue of units", "Units – Redemption of units", "Units – Restriction of the redemption of units", and "Units – Suspension of the redemption of units". The associated risks are explained under "Risk warnings – Risks of investing in the feeder fund – Restriction of the redemption of units, Suspension of the redemption of units" and "Risk warnings – Risks of restricted or elevated liquidity of the master fund."

Stock exchanges and markets

The Company may have the units of the feeder fund admitted to trading on a stock exchange or in organized markets; currently the Company is not availing itself of this option.

The possibility of the units also being traded in other markets without the Company's consent cannot be ruled out. A third party can, without the consent of the Company, arrange for the units to be included in the open market or in other over-the-counter trading.

The market price underlying trading in other markets is not determined exclusively by the value of the assets held in the feeder fund. Supply and demand are also contributing factors. Therefore, this market price may vary from the net asset value per unit determined by the Company or the custodian.

Fair treatment of investors and unit classes

Unless the special section provides otherwise, all units issued have the same configuration characteristics and no unit classes shall be formed. If the special section does provide for the formation of unit classes, all issued units of a specific unit class shall have the same configuration characteristics. Additional unit classes may be formed. The unit classes may

especially differ with respect to the distribution policy, the initial sales charge, the redemption fee, the currency of the net asset value per unit, the management fee / all-in fee, the minimum investment or a combination of these features.

It may be stipulated that units in certain unit classes of the feeder fund may only be acquired and held by investors if these investors meet certain additional requirements. If applicable, these requirements are described in the "Units – Issue of units" section of the special section.

The Company shall treat the feeder fund's investors fairly. When managing liquidity risk and redeeming units, it may not place the interests of one investor or group of investors ahead of the interests of another investor or group of investors.

Regarding the procedures used by the Company to ensure the fair treatment of investors, see the sections "Units – Settlement when issuing and redeeming units," "Units – Liquidity management" and "Fair treatment of investors/Handling of conflicts of interest."

Issue and redemption price

In calculating the issue price and the redemption price for the units, the custodian determines on each valuation date, with the participation of the Company, the value of the assets owned by the feeder fund less any liabilities of the fund (the "net asset value").

Dividing the net asset value thus determined by the number of units issued gives the net asset value per unit.

In calculating the issue price and the redemption price for the units, the custodian, with the participation of the Company, determines a net asset value on each valuation date. If stipulated in the Terms and Conditions of Investment, the Company shall apply partial swing pricing for all issues and redemptions of units on the valuation date.

Swing pricing is a method of calculating the net asset value per unit whereby the transaction costs arising from redemptions or issues of units are apportioned to the unitholders whose orders caused the trades. For this, the net asset value is first determined by the value of the assets belonging to the fund less the liabilities. Dividing the net asset value thus determined by the number of units issued gives the net asset value per unit, which is additionally modified up or down ("swing factor"). In the case of partial swing pricing, this mechanism is then only applied if the imbalance of unit redemptions and unit issues on the respective valuation date exceeds a threshold value defined by the Company. The Company determines the threshold value as a percentage amount using several criteria such as market conditions, market liquidity, risk analyses.

The swing factor takes into account transaction costs caused by an excess of redemption or issue

requests. The Company determines the swing factor depending on various parameters (e.g., taking into account transaction costs, bid/ask spreads, effects on the market price). The swing factor shall not exceed 2% of the net asset value.

A higher swing factor can be set in an extraordinary market environment (this may be the case, for example, if the fund's assets cannot be valued or trading of financial instruments in the markets is considerably affected due to political, economic or other events). In such a case, the Company shall publish a corresponding notification about such an increase on its website www.dws.com.

If there is an excess of redemptions on a settlement date on which the threshold is exceeded, the net asset value per unit or share is reduced by the swing factor. If there is an excess of issues on a settlement date on which the threshold is exceeded, the net asset value per unit or share is increased by the swing factor.

The net asset value, the net asset value per unit and the issue and redemption prices will be determined Monday through Friday, except on public holidays in Frankfurt/Main, Hesse and not on December 24 or December 31 ("valuation dates"). Other days may also be excluded as valuation dates in the Special Terms and Conditions of Investment.

Suspension of the calculation of the issue and redemption prices

The Company may suspend the calculation of the issue and redemption prices under the same conditions as the redemption of units. These circumstances are explained in more detail in the section entitled "Units – Suspension of the redemption of units."

Initial sales charge and redemption fee

Precise details on the initial sales charge and on the redemption fee are presented in the sections "Issue and redemption prices – Initial sales charge" and "Issue and redemption prices – Redemption fee" in the special section.

Publication of the issue and redemption prices

For each issue and redemption of units, the issue and redemption prices and, if applicable, the net asset value per unit shall be published in a business publication and a daily newspaper with sufficient circulation and/or on the Internet at dws.com.

If units are redeemed through third parties, costs could be incurred for the redemption of the units. Costs higher than the issue price may be charged if the units are sold through third parties.

Costs

Costs related to the issue and redemption of units

No additional costs are charged by the Company or the custodian for the issue and redemption of units at the respective issue price (net asset value per unit plus any applicable initial sales charge) or redemption price (net asset value per unit less any applicable redemption fee).

If the investor acquires units through third parties, these third parties can assess costs that are higher than the initial sales charge. If the investor redeems units through third parties, these third parties can assess their own costs when redeeming the units.

Administrative and other costs

Details on administrative and other costs are presented in the section "Administrative and other costs" in the special section.

Circumstances particular to the acquisition of master fund shares

In addition to the fees for the management of the feeder fund, a management fee is also assessed for the shares of the master fund held in the master fund.

In connection with the acquisition of master fund shares, the following types of fees, costs, taxes, commissions and other expenses are borne directly or indirectly by the investors of the feeder fund:

- the management fee / all-in fee of the target fund;
- the performance-based fee of the target fund;
- the initial sales charges and redemption fees of the target fund;
- reimbursements of expenses by the target fund;
- other costs.

When acquiring shares of the master fund, the feeder fund may only be charged a reduced all-in fee in respect of the extent of this investment. Because the management fee of the master fund is lower than the all-in fee of the feeder fund, the Company may charge the feeder fund for the shares acquired only the difference between the all-in fee of the feeder fund and the management fee of the master fund. The section "Special section – Issue and redemption prices and costs – Costs of the master fund" may contain different provisions. The Company may not charge initial sales charges or redemption fees when purchasing master fund shares. Furthermore, the annual and semiannual reports will disclose the amount charged to the feeder fund as a management fee for the master fund shares held in the feeder fund.

Statement of total expense ratio

In the annual report, the costs accrued and charged to the feeder fund during the fiscal year are disclosed and reported as a ratio of the fund's

average net assets ("total expense ratio"). The costs consist of fees for the management of the feeder fund (including any applicable performance-based fee), the remuneration of the custodian and the additional expenses that can be charged to the feeder fund (see sections "Costs – Circumstances particular to the acquisition of master fund shares" and "Special section – Issue and redemption prices and costs – Administrative and other costs"). If the feeder fund invests a substantial portion of its assets in other open-ended investment undertakings, the total expense ratio of these target funds is additionally taken into account. The total expense ratio includes neither incidental costs nor costs incurred in the purchase and sale of assets ("transaction costs").

Different expense statement from distributors

If the investor is advised on the acquisition of units by third parties or if these act as intermediaries for the purchase, they may charge the investor expenses or shares of expenses which are not identical to the expense information in this Sales Prospectus and in the Key Information Document and which may exceed the total expense ratio described here. The reason for this may especially be that the third party additionally takes the costs of its activities into account (such as brokerage, advisory or custody services). In addition, it may also take into account any one-time costs such as initial sales charges and generally uses other calculation methods, or also estimates, for costs incurred at fund level, which include, in particular, transactions costs for the feeder fund.

Deviations in the expense statement may arise with regard to the information prior to the conclusion of the contract but also in the event of the provision of any regular cost information regarding the existing fund investment as part of a permanent business relationship with the client.

Compensation policy

The Company as a subsidiary of DWS Group GmbH & Co. KGaA ("DWS KGaA") is included in the group-wide compensation strategy of the DWS Group. All matters related to compensation, as well as compliance with regulatory requirements, are monitored by the relevant governing bodies of the DWS Group. The DWS Group pursues a total compensation approach, i.e., total compensation for employees comprises fixed and variable compensation and may contain portions of deferred compensation, which are linked both to individual future performance and to sustainable corporate development. Under the compensation strategy, employees at the first and second management level in particular receive a portion of the variable compensation in the form of deferred compensation elements, which are largely linked to the long-term performance of the DWS share price or of the investment products.

In addition, the compensation policy applies the following guidelines:

- a) The compensation policy is consistent with and conducive to sound and effective risk management and does not encourage the assumption of excessive risk.
- b) The compensation policy is consistent with the business strategy, objectives, values and interests of DWS Group (including the Company, the investment funds it manages and the investors of these investment funds) and includes measures to avoid conflicts of interest.
- c) Performance is generally evaluated on a multi-year basis.
- d) The fixed and variable components of the total compensation are proportionate to each other, with the share of the fixed component in the total compensation being high enough to provide complete flexibility with regard to the variable compensation components, including the possibility of waiving payment of a variable component.

Further details on the current compensation policy are published on the Internet at <https://download.dws.com/download?elib-assetguid=b29dd45e7-b4646a7b64481fc3db4b8cd>. This includes the description of the compensation system for employees, including the principles related to granting the variable compensation, to taking into account sustainability and sustainability risks, and the description of the Compensation Committee that has been set up below Management level. The Company shall provide this information free of charge in paper form upon request. Moreover, the Company provides additional information on employee compensation in the annual report.

Determination of income, income adjustment procedure

The feeder fund generates income in the form of the interest, dividends and income from investment fund units that have accrued during the fiscal year and have not been applied to cover costs. The fund additionally receives considerations from lending transactions and repurchase agreement transactions. Further income can result from the disposal of assets held for the account of the feeder fund.

The Company uses an "income adjustment procedure" for the feeder fund. This prevents the share of distributable income in the unit price from fluctuating as a result of capital inflows and outflows. Otherwise, any inflows of capital into the feeder fund during the fiscal year would lead to less income being available for distribution per unit at the distribution dates than would be the case with a constant number of units in circulation. In contrast, any outflows of capital would lead to more income being available for distribution than would be the case with a constant number of units in circulation. In order to prevent this, the distributable income over the fiscal year that the

purchaser of units must pay as part of the issue price, and that the seller of units receives as part of the redemption price, is continually calculated and entered as a distributable item in the income statement.

In doing so, it is accepted that investors acquiring units shortly before a distribution date, for instance, will receive back the portion of the issue price attributable to income in the form of a dividend, even though their paid-in capital did not contribute to the generation of that income.

Liquidation, transfer and merger of the feeder fund

Conditions for the liquidation of the feeder fund

The investors are not entitled to demand the liquidation of the feeder fund. The Company may, however, terminate its right to manage the feeder fund by giving a minimum of six months' notice by way of an announcement in the Bundesanzeiger and additionally in the annual report or semiannual report. The institutions maintaining the custody accounts shall also inform investors about the termination by means of a durable medium, such as on paper or in electronic format. Upon the effective termination of its management, the Company's right to manage the feeder fund shall cease.

If the master fund is liquidated, the feeder fund must be liquidated as well, unless BaFin, at the request of the Company, approves its continued existence with another master fund or as a fund that may not concentrate its investments on one specific master fund. If the feeder fund is to be liquidated as well, the Company must inform BaFin thereof no later than within two months of learning of the planned liquidation of the master fund; it must also inform investors accordingly without delay by means of an announcement in the electronic version of the Bundesanzeiger. The institutions maintaining the custody accounts shall also inform investors on paper or in electronic format about the planned liquidation. If the Company was informed of the liquidation of the master fund by its management company more than five months before its commencement, the Company must inform BaFin and the investors no later than three months before the liquidation of the master fund is to commence.

If the master fund is merged with another fund, this feeder fund must be liquidated, unless BaFin, at the request of the Company, approves its continued existence with a fund that proceeds from the merger as the master fund, with another master fund or as a normal investment undertaking that may not concentrate its investments on one specific master fund. If the investment undertaking is to be liquidated, the Company must inform BaFin thereof no later than within one month of learning of the planned merger of the master fund; it must also inform investors accordingly without delay by means of

an announcement in the electronic version of the Bundesanzeiger. The institutions maintaining the custody accounts shall also inform investors on paper or in electronic format about the planned liquidation. If the Company was informed of the merger of the master fund by its management company more than four months beforehand, the Company must inform BaFin and the investors no later than three months before the merger of the master fund.

The Company's right to manage shall also cease upon the institution of bankruptcy proceedings concerning its assets or when a judicial order by which the application for the institution of such proceedings is rejected for lack of assets becomes final and binding. When the Company's right to manage expires, the right to manage and dispose of the feeder fund passes to the custodian, which shall wind up the feeder fund and distribute the proceeds to the investors or, with the approval of BaFin, transfer management to another asset management company.

Procedure for the liquidation of the feeder fund

Once the right to manage and dispose of the feeder fund passes to the custodian, the issue and redemption of units ceases and the feeder fund is wound up.

The proceeds from the sale of the feeder fund's assets, less any remaining costs still payable by the feeder fund and the costs associated with the liquidation, are distributed to the investors. The investors shall be entitled to a share of the liquidation proceeds that is proportional to the number of units they hold in the feeder fund.

The Company will prepare a liquidation report, dated to the day on which its right to manage expires, that meets the requirements of an annual report. No later than three months after the date of liquidation of the feeder fund, the liquidation report is published in the Bundesanzeiger. While the custodian liquidates the feeder fund, it prepares liquidation reports that meet the requirements of an annual report annually and on the date that the liquidation is completed. These reports must also be published in the Bundesanzeiger no later than three months after the date of liquidation.

Settlement of the distribution of the liquidation proceeds

Settlement takes place three bank business days after the liquidation date. This period refers to the processing activity between the institution maintaining the custody account and the custodian. Posting or transfer from the institution maintaining the custody account to the desired recipient account must follow afterward, and may lead to additional delays. Investors should therefore allow sufficient time when planning for specific payment dates.

Transfer of the feeder fund

The Company may transfer the right to manage and dispose of the feeder fund to another asset management company. The transfer requires the prior written approval of BaFin. The approved transfer shall be announced in the Bundesanzeiger and, in addition, in the annual report or semiannual report for the feeder fund, as well as in the electronic information media designated in the Sales Prospectus. The time at which the transfer becomes effective is determined by the contractual arrangements between the Company and the receiving asset management company. However, the transfer shall take place no sooner than three months after its announcement in the Bundesanzeiger. All rights and obligations of the Company in relation to the feeder fund are then transferred to the receiving asset management company.

Conditions for the merger of the feeder fund

All the assets of this feeder fund may, with the approval of BaFin, be transferred to another currently existing investment undertaking or to a new investment undertaking established by the merger that must fulfill the requirements of a UCITS and which was launched in Germany or in another EU or EEA state. The transfer takes effect at the end of the feeder fund's fiscal year (the "key date of transfer"), unless another key date of transfer is specified.

Rights of investors in the merger of the feeder fund

The Company must, in advance of the proposed key date of transfer, inform investors of the feeder fund by means of a durable medium, such as on paper or in electronic format, about the reasons for the merger, the potential effects for investors and the rights of investors in connection with the merger, as well as about material procedural aspects. The Key Information Document for the investment undertaking to which the feeder fund's assets are to be transferred must also be sent to investors. The investor must receive the aforementioned information at least 30 days in advance of the deadline for the redemption or exchange of the investor's units.

Investors have five working days before the proposed key date of transfer to either return their units at no additional cost other than the costs incurred for the liquidation of the feeder fund or to exchange their units for units of another open-ended retail investment undertaking that is also managed by the Company or another entity belonging to the same group of companies and whose investment principles are comparable to those of the feeder fund.

On the key date of transfer, the net asset values of the feeder fund and of the receiving investment undertaking are calculated, the conversion ratio is determined, and the entire exchange procedure is examined by the auditor. The conversion ratio is calculated on the basis of the ratio of the net asset values per unit of the feeder fund and of the

receiving investment undertaking at the time of the transfer. The investor receives the number of units of the receiving investment undertaking that corresponds to the value of the units held in the feeder fund.

If investors do not avail of their redemption or exchange right, they become investors in the receiving investment undertaking on the key date of transfer. The Company also has the option to arrange with the management company of the receiving investment undertaking that investors in the feeder fund shall receive a disbursement in

cash of up to 10% of the value of their units. Once all the assets of the fund are transferred, the feeder fund ceases to exist. If the transfer takes place during the current fiscal year of the feeder fund, the Company must prepare a report, dated to the key date of transfer, that meets the requirements of an annual report.

The Company will announce in the Bundesanzeiger and on the Internet at www.dws.com when the feeder fund was merged into another investment undertaking managed by the Company and when the merger took effect. If the

feeder fund is merged into an investment undertaking that is not managed by the Company, the management company that administers the receiving or newly established investment undertaking makes the announcement of the merger taking effect.

Outsourcing

The Company has outsourced the following activities. Some of the activities were in turn delegated to other outsourcing companies:

Seq. no.	Outsourcing company	Outsourcing measure	Conflicts of interest*
1	BlackRock Financial Management Inc., New York (USA)	Use of the "Aladdin" IT platform to support portfolio and risk management	Variant 1

*** Conflicts of interest in relation to outsourcing:**

Variant 1: No conflicts of interest are identified. Potential conflicts of interest would be managed by the configuration of the outsourcing contract.

Variant 2: The outsourcing company is a company affiliated with the Company. It cannot be ruled out that the contract might have been concluded in another form if a management company were involved that is not linked under corporate law or personally.

Additional information

The list of outsourcing companies is current as of the date indicated on the title page of this Sales Prospectus. Upon request, the Company will provide investors with the most up-to-date information on the list of outsourcing and sub-outsourcing companies as well as on conflicts of interest that could arise from the outsourcing. The most up-to-date list of outsourcing and sub-outsourcing companies as well as conflicts of interest that could arise from the outsourcing can also be found on the Internet at <https://www.dws.com/en-lu/footer/Legal-Resources>.

Fair treatment of investors / Handling of conflicts of interest

Guiding principle

The Company conducts its operations in such a way that conflicts of interest are handled in a fair manner, both between the Company, its employees and its clients and between one client and another. In conflicts of interest between the Company or its employees on the one hand and the client on the other hand, client interests shall always take priority.

Introduction

As a globally active financial services provider, the Company and its affiliated companies within the Deutsche Bank Group (including Deutsche Bank AG) are constantly confronted with actual or potential conflicts of interest. It is a principle of the Company to take all reasonable steps to establish organizational structures and to apply effective

administrative measures to enable the identification, handling and monitoring of the conflicts in question.

The Company's management is responsible for ensuring that the systems, controls and procedures of the Company for the identification, monitoring and resolution of conflicts of interest are appropriate. The Compliance and Legal departments of the Company provide support in the identification and monitoring of actual and potential conflicts of interest.

The Company has appropriate procedures in place to identify, handle and monitor actual or potential conflicts of interest on a division-specific basis. The Company has established principles for handling conflicts of interest; they are available on the Internet at <https://www.dws.com/Legal-Resources#conflicts-of-interest-policy.htm> in their respective current version.

Objective

The Company will take reasonable steps to identify and appropriately handle conflicts of interest that have a material adverse effect on client interests. Corresponding guidelines specify the requirements for appropriate procedures and measures at Group and divisional level to identify, prevent and, where prevention is not possible, handle all such material conflicts of interest in the best interests of the affected clients.

Fair treatment of investors

The Company is obligated to treat the feeder fund's investors fairly. It manages the feeder fund according to the principle of fair treatment of investors by not giving preferential treatment to some investment funds, and investors of the investment funds, at the expense of others. The decision-making processes and organizational structures of the Company are aligned accordingly.

The Company is aware that conflicts of interest may arise based on the functions that employees of the Company and companies affiliated with the Company perform as members of the Deutsche Bank Group. In respect of such eventualities, each Deutsche Bank Group member has undertaken to endeavor, to a reasonable extent, to resolve such conflicts of interest equitably (with regard to the members' respective duties and responsibilities), and to ensure that the interests of the investors are not adversely affected. The Company is of the view that Deutsche Bank Group members possess the required aptitude and competence to perform such duties.

(Potential) Material conflicts of interest

The following material conflicts of interest can have a negative impact on the economic result achievable by the investor and in particular lead to lower payouts to investors (see also the risk warnings).

In addition, other conflicts of interest can exist or occur in the future that might also have a negative impact particularly on the economic result achievable by the investor, and lead to lower payouts to investors.

1. Conflicts of interest at the level of the Company Deutsche Bank AG and the Company, as well as the persons taking actions at these companies, are all members of the Deutsche Bank Group (collectively "Affiliated Entities"). Some of them are also involved or active in the same or similar functions at other funds as at this feeder fund, or will be in the future. This can give rise to conflicts of interest.

The Affiliated Entities are directly or indirectly connected to each other under corporate law or personally. The partial identities of the companies involved, and the corporate or personal links between them, can lead to conflicts of interest. It cannot be ruled out that contracts material for the feeder fund might have been concluded in another form if only such companies were involved that do not perform multiple functions and are not linked under corporate law or personally.

The interests of the Affiliated Entities and related parties can conflict with each other. In the event of conflicts of interest affecting the Company, the Company will endeavor to resolve such conflicts in favor of the feeder fund's investors. Insofar as the interests of the investors are also affected, the Company will endeavor to avoid any conflicts of interest and, if it is impossible to avoid such conflicts, to ensure that unavoidable conflicts of interests are resolved while suitably protecting the interests of the investors.

The feeder fund can invest in financial instruments (e.g., money market funds) whose underlyings are the companies of the Deutsche Bank Group and their subsidiaries or Affiliated Entities. In some cases, such transactions, derivative transactions, derivatives contracts or similar items may have to

be evaluated on the basis of information provided by the counterparties. Such information may constitute in these cases the basis for calculation of the value of particular assets of the respective fund by the custodian. This can give rise to conflicts of interest.

Assets of the feeder fund in the form of bank balances, units of investment undertakings or securities (to the extent permissible according to the terms and conditions of investment of the respective feeder fund) may be deposited with Affiliated Entities in accordance with the legal provisions at the custodian. Bank balances of the AIF may be invested in securities or certificates of deposit issued by Affiliated Entities or in bank deposits offered by Affiliated Entities. This can have the consequence that, in addition to the interest rate (e.g., for bank balances), other factors concerning the investment become relevant as well (e.g., flow of information, but also and especially the interest of the Affiliated Entities in investments in their own products or those of Affiliated Entities). Banking or comparable transactions can also be conducted with or through the Affiliated Entities. Affiliated Entities can further be counterparties in derivative transactions or derivatives contracts. This can give rise to conflicts of interest in the valuation of such derivative transactions or derivatives contracts.

Notwithstanding provisions to the contrary in this document, the Company may actively conduct transactions for the account of other funds that involve the same units, real estate, securities, assets and instruments in which the Company will invest. The Company may provide for other funds and accounts investment management and advisory services and administrative services that have similar or different investment objectives to those of the feeder fund and/or which can execute investment programs similar to those of the feeder fund and in which they have no involvement. The portfolio strategies that are used for these or other investment funds could conflict with the transactions and strategies that are recommended by the Affiliated Entities in the management of the feeder fund, and adversely affect the prices and availability of the units, securities and instruments in which the feeder fund invests.

The Company devotes to the activities of the feeder fund as much time as it deems necessary and appropriate. There are no restrictions on the Company when it comes to launching additional investment funds, especially with regard to entering into further investment advisory relationships or pursuing additional business activities, even if those activities are in competition with the activities of the feeder fund.

Non-exercise of voting rights

In order to avoid any potential conflicts of interest, the Company will not exercise voting rights arising from shares of Deutsche Bank AG and DWS Group GmbH & Co KGaA.

2. Conflicts of interest at the level of the distributors

The payment of commissions, initial sales charges and bonuses to distributors may thus result in conflicts of interest at the expense of the investor in that an incentive could be created for distributors to preferably sell units of funds with a higher commission to their clients. Such commissions are included in the fees or may, if applicable, be borne by the investors of the fund in the form of initial sales charges.

Distributors and investment advisors may possibly pursue their own interests in respect of the sale or brokerage of units of the fund and in respect of the associated advisory or brokerage activity. Such a conflict of interest may result in distributors and investment advisors making an investment recommendation based not on the interest of the investors, but rather on self-interest.

3. Repayment and forwarding of management fees collected

The Company does not receive any reimbursement of the fees and expense reimbursements paid out of the feeder fund to the custodian and third parties.

With the exception of the TF unit classes, the Company grants brokerage fees, "trail commissions," to intermediaries such as credit institutions on a recurring basis, usually annually. These may be significant portions of the management fee of the Company. This is remuneration for sales services. At the request of an investor in the fund, the Company shall disclose further details to the investor. The Company shall not pay remuneration to distribution partners for the TF unit class, with the result that the investor's costs associated with investing in the TF unit class may be lower than those associated with investing in other unit classes of the same investment undertaking.

The Company may, at its discretion, agree with individual investors the partial repayment to them of the management fees collected. This can be a consideration especially in the case of institutional investors who directly invest large amounts for the long term.

Master-feeder agreement, custodian agreement

The Company and the management company of the master fund have entered into an agreement regulating the exchange of information and cooperation between the two. The agreement ensures, among things, that the Company will receive from the master fund all the information it needs to manage this feeder fund in accordance with applicable statutory and contractual requirements. The agreement includes provisions specifying the exchange of documents and information, the coordination of operational procedures and the rules for the exchange of information relating to fiscal year-end procedures.

The master-feeder agreement ends as soon as the underlying master-feeder structure ceases to exist, or once it is replaced by a new master-feeder agreement.

Additional information about the master-feeder agreement can be obtained from the Company.

The custodian of this feeder fund and the custodian of the master fund have likewise entered into an agreement on the exchange of information.

Auditor

The audit firm KPMG AG Wirtschaftsprüfungsgesellschaft, THE SQUAIRE, Am Flughafen, 60549 Frankfurt/Main, Germany, has been appointed auditor of the feeder fund and of the annual report.

The auditor audits the annual report of the feeder fund. The auditor shall summarize the findings of the audit in a special report; the auditor's report shall be reproduced in full in the annual report. When performing the audit, the auditor shall also determine whether the feeder fund has been managed in compliance with the provisions of the KAGB and those of the Terms and Conditions of Investment.

The auditor shall submit the auditor's report for the feeder fund to BaFin on request.

The master fund and its annual report and, where applicable, the liquidation report are audited by the audit firm KPMG Luxembourg S.à r.l. KPMG AG and KPMG Luxembourg S.à r.l. have together entered into an agreement regulating the regular exchange of information on this feeder fund and the master fund.

Payments to investors / Distribution of reports and other information

The appointment of the custodian ensures that investors will receive dividend distributions and that units will be redeemed. The investor information mentioned in this Sales Prospectus can be obtained in the manner indicated in the section "General principles – Sales documentation and disclosure of information on risk management." The documentation can also be obtained at the custodian.

Service providers

Companies that are assuming functions outsourced by the Company are presented in the section "Outsourcing." Beyond this, the Company has not commissioned any further relevant service providers for the administration of the fund.

If an investment advisor is being used, this fact is disclosed in the special section.

Sales Prospectus – Special Section

DWS WellCare

Fund, sub-funds and unit classes

The feeder fund DWS WellCare was launched on 10. November 1997, for an indefinite period.

The investors are joint owners, on a fractional basis, of the assets of the feeder fund in proportion to the number of units they hold. Units are made out to bearer and embody the bearer's claims against the Company. The feeder fund is not a sub-fund of an umbrella structure.

Unit classes in accordance with the table below will be formed for the feeder fund.

Investment objective and strategy

Investment objective

The objective of the investment policy of the feeder fund and the master fund is to generate long-term capital appreciation. In addition, an objective of the investment policy of the feeder fund is to allow investors to participate in the performance of the master fund.

Investment strategy

The Company acquires and sells the assets permitted under the KAGB and the Terms and Conditions of Investment in accordance with its assessment of economic and capital market conditions and of future prospects on the stock exchanges.

The Company may acquire only the following assets for the feeder fund:

1. shares of the EU UCITS master fund DWS Invest WellCare,
2. bank balances according to article 195 KAGB, provided they are available on demand,
3. derivatives according to article 197 KAGB, provided they are used only for hedging purposes.

The feeder fund permanently invests at least 85% of its assets in shares of the master fund.

Up to 15% of the feeder fund's assets may also be invested in bank balances according to article 195 KAGB, provided they are available on demand, and/or in derivatives according to article 197 KAGB, provided these are used only for hedging purposes.

The feeder fund may not invest in contingent convertibles.

In addition to the other investment limits defined in the Terms and Conditions of Investment, it applies for the purposes of bringing about a partial exemption as defined in the German Investment Tax Act ("InvStG") that at least 85% of the feeder fund's gross assets (determined as being the value of the investment fund's assets without taking into account liabilities) will be invested in shares of the master fund ("equity funds"). The actual equity

capital investment rates of the master fund can be taken into consideration for the rate of the feeder fund's equity capital investments as defined by article 2 (8) InvStG.

Structure and investment instruments of the master fund

The master fund, consisting of different share classes, is a sub-fund of DWS Invest, an investment company with variable capital. That investment company was organized under Luxembourg law, on the basis of the Law of December 17, 2010, on undertakings for collective investment and of the Law of August 10, 1915, on trading companies, as a Société d'Investissement à Capital Variable ("SICAV") and is subject to the provisions of Part I of the aforementioned Law of December 17, 2010. The registered office of the master fund is at 2, Boulevard Konrad Adenauer, 1115 Luxembourg, Luxembourg. The current Sales Prospectus, the Key Information Document and the current annual and semiannual reports of the master fund are available free of charge from the Management Company (DWS Investment S.A.) or on its website www.dws.com.

Long-term capital appreciation through the worldwide investment of at least 51% of the master fund's assets in equities of companies of all market capitalizations that are active in the area of health care and wellness. These companies provide technologies, products or services in connection with modern treatment, early detection and/or prevention, which are qualitatively assessed by the sub-fund management using a fundamental analysis.

At least 70% of the master fund's assets are invested in equities of all market capitalizations, equity certificates, participation and dividend-right certificates, convertible bonds and equity warrants issued by international companies.

In total, up to 20% of the master fund's assets may be invested in money market instruments, deposits with credit institutions, money market funds and ancillary liquid assets.

For the purpose of inducing a partial tax exemption within the meaning of the German Investment Tax Act, the master fund must invest at least 60% of its gross assets (determined as being the value of the investment fund's assets without taking into account liabilities) in equities that are admitted to official trading on a stock exchange or admitted to, or included in, another organized market and which are not

- units of investment funds;
- equities indirectly held via partnerships;
- units of corporations, associations of persons or estates, at least 75% of the gross assets of which consist of immovable property in accordance with statutory provisions or their investment conditions, if such corporations, associations of persons or estates are subject to corporate income tax of at least 15% and are not exempt from it, or if their distributions

are subject to tax of at least 15%, and the investment fund is not exempt from said taxation;

- units of corporations which are exempt from corporate income tax to the extent that they conduct distributions unless such distributions are subject to tax of at least 15%, and the investment fund is not exempt from said taxation;
- units of corporations, the income of which originates, directly or indirectly, to an extent of more than 10%, from units of corporations that are (i) real estate companies or (ii) are not real estate companies, but (a) are domiciled in a member state of the European Union or a member state of the European Economic Area and are not subject in said domicile to corporate income tax or are exempt from it or (b) are domiciled in a third country and are not subject in said domicile to corporate income tax of at least 15% or are exempt from it.
- units of corporations which hold, directly or indirectly, units of corporations that are (i) real estate companies or (ii) are not real estate companies, but (a) are domiciled in a member state of the European Union or a member state of the European Economic Area and are not subject in said domicile to corporate income tax or are exempt from it or (b) are domiciled in a third country and are not subject in said domicile to corporate income tax of at least 15% or are exempt from it if the fair market value of units of such corporations equal more than 10% of the fair market value of those corporations.

Consideration of EU criteria for environmentally sustainable economic activities as defined by Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (Taxonomy Regulation)

Disclosure according to article 6 of the Taxonomy Regulation: The principle of "avoiding principal adverse impacts" only applies to those investments underlying the feeder fund and the master fund that take EU criteria for environmentally sustainable economic activities into account.

The investments underlying the remainder of the feeder fund and the master fund do not take into account the EU criteria for environmentally sustainable economic activities.

The promoted proportion of environmentally sustainable investments according to the Taxonomy Regulation is therefore currently 0% of the master fund's and feeder fund's assets. It may, however, be the case that some sustainable investments are nevertheless aligned with an environmental objective of the Taxonomy Regulation.

No assurance can be given that the objectives of the investment strategy for the feeder fund and the master fund will actually be achieved.

Master-feeder agreement

The Company of the feeder fund and the Management Company of the master fund have entered into an agreement on the exchange of information in accordance with the KAGB. This agreement defines, among other things, what documents and types of information are routinely exchanged between the two Companies, what information the Management Company of the master fund transmits to the Company of the feeder fund if the master fund does not fulfill its statutory or contractual obligations, and what rules apply to the transfer of subscription and redemption orders and for the suspension of subscriptions and redemptions.

Further information on the master fund and the agreement on the exchange of information will be provided to unitholders free of charge upon request at the registered office of the Management Company (DWS Investment S.A., 2, Boulevard Konrad Adenauer, 1115 Luxembourg, Luxembourg).

Currency of the master fund and the feeder fund

Both the feeder fund and the master fund are denominated in euro.

Performance of the feeder and master funds

The performance of the feeder fund is similar to that of the master fund but is not identical due to the costs and expenses incurred and the cash held by the feeder fund.

Special notes

Consideration of sustainability risks

The Company considers sustainability risks in one or more phases of the investment process, for example when making its investment decision and when monitoring. Depending on the fund's investment strategy, this may also entail a proprietary ESG-integrated analysis of the issuer.

Sustainability risks are primarily considered using a proprietary data processing program that collates information from one or multiple ESG data providers, public sources and/or internal evaluations.

Sustainability risks can arise due to several factors, including but not limited to the effects of climate change or the violation of internationally recognized standards and principles of responsible business practices. The internationally recognized guidelines include, above all, the principles of the United Nations Global Compact, the UN Guiding Principles for Business and Human Rights, the standards of the International Labour Organization, and the OECD Guidelines for Multinational Enterprises.

Principal adverse impacts on sustainability factors (PAIs)

The Company takes into account the principal adverse impacts of its investment decisions on sustainability factors (PAIs), as described in its published declaration in accordance with article 4 of the Disclosure Regulation.

Other information for taking PAIs into account at the fund level, where applicable, is annexed to this Sales Prospectus.

Increased volatility

The feeder fund may exhibit markedly increased volatility on account of its composition and its investment strategy. The price per unit may thus be subject to substantial downward or upward fluctuation, even within short periods of time.

Explanation of the feeder fund's risk profile

The performance of the feeder fund is particularly influenced by the performance of the master fund.

Explanation of the master fund's risk profile

The performance of the master fund is influenced in particular by the following factors, which involve both opportunities and risks:

- Risk of price changes in equities
- Currency risk
- Concentration risk

In addition, the master fund may temporarily concentrate more or less intensively on particular sectors, countries or market

segments. This, too, may give rise to opportunities and risks.

A detailed description of these risks can be found in the Sales Prospectus for the master fund. In addition, investors are referred to the general risk warnings in the "Risk factors" section of the Sales Prospectus for the master fund.

Derivatives

The Company can detect and measure sufficiently accurately all market risks in the feeder fund arising from the use of derivatives.

To determine the extent to which the market risk limit has been reached, the Company applies the "qualified approach" as defined by the Derivatives Regulation.

In this regard, the Company uses the relative VaR method to measure and limit the market risk exposure. In the case of the relative VaR method, a reference portfolio that generally does not contain derivatives is defined that in terms of its risk profile and investment strategy is appropriate for the feeder fund, and the market risk ("VaR") of the feeder fund is compared to the market risk ("VaR") of the reference portfolio.

The reference portfolio with no derivatives for the feeder fund comprises an equity index whose composition essentially corresponds to the investment objectives and investment strategy of the feeder fund.

The precise composition of the reference portfolio is available from the Company on request.

The value-at-risk amount for the feeder fund's market risk exposure may at no time exceed twice the value-at-risk amount for the market risk exposure of the associated reference portfolio with no derivatives.

The market risk of the feeder fund and of the reference portfolio with no derivatives is calculated using the value-at-risk ("VaR") method. As the VaR method, the Company uses historical simulation with the following parameters: a confidence interval of 99% and an effective historical observation period of at least one year. The VaR is the highest possible loss that, with 99% probability, will not be exceeded within the specified holding period. The VaR therefore does not indicate the maximum possible loss. When calculating the VaR, the Company records market price risks from all transactions. By means of the risk model, it quantifies the change in the value of the assets held in the feeder fund over time. The VaR is thus a limit, expressed as a monetary amount, for potential losses in a portfolio between two given points in time. This change in value is determined by random events, namely the future

development of market prices, and can therefore not be predicted with certainty. The market risk to be determined in each case can be estimated only with a certain degree of probability.

The VaR method is continuously tested using backtesting. In addition, stress tests are conducted on a regular basis.

The Company may – provided an appropriate risk management system is in place – invest in any and all types of derivatives for the account of the feeder fund, provided that this investment is consistent with the investment objectives and the investment strategy of the feeder fund. This requires that the derivatives be based on assets that may be acquired for the fund, or on the following underlyings:

- Interest rates
- Exchange rates
- Currencies
- Financial indices that are sufficiently diversified, represent an adequate benchmark for the market to which they refer, and are published in an appropriate manner. In particular, this includes options, financial futures and swaps, as well as combinations thereof.

Profile of a typical investor

The feeder fund is intended for the risk-tolerant investor who, in seeking investments with strong returns, can tolerate the substantial fluctuations in the values of investments, and the very high risks this entails. Strong price fluctuations and high creditworthiness risks result in temporary or permanent reductions of the net asset value per unit. Expectations of high returns and tolerance of risk by the investor are offset by the possibility of incurring significant losses up to and including the total loss of capital invested. The investor is willing and able to bear such a financial loss and is not concerned with capital protection.

Units

Issue of units

1. Units can be purchased from the custodian, the Company or through an intermediary. They are issued by the custodian at the issue price, which is equal to the net asset value per unit plus an initial sales charge.

The calculation of the net asset value is explained in the "Issue and redemption price" subsection in the "Units" section. Acquisition through an intermediary is also possible; additional costs may be incurred when so doing. The Company reserves the right to partially or fully discontinue the issue of units on a temporary or permanent basis.

2. Units of the F unit class are available to investors who:

- (i) acquire the units through distributors not established in Spain,
- (ii) who acquire the units through distributors established in Spain and are professional investors as defined by article 1 (19), no. 32, KAGB

Professional investors as defined by article 1 (19), no. 32, KAGB who acquire units of the F unit class in their own name for a third party must confirm to the Company that the units are being acquired for a professional investor as defined by article 1 (19), no. 32, KAGB. The Company may, at its discretion, request documentation proving compliance with these requirements.

Redemption of units

Irrespective of the minimum investment, investors may demand the redemption of units each exchange trading day, unless the Company has restricted the redemption of units (see "Restriction of redemption" section) or temporarily suspended redemption (see "Suspension of redemption" section). Redemption orders must be placed with the custodian, the Company itself or with an intermediary (such as the institution maintaining the custody account).

The Company is obligated to redeem units at the redemption price applicable on the settlement date, which corresponds to the net asset value per unit determined on that date less any applicable redemption fee. Redemption can also take place through an intermediary (such as the institution maintaining the custody account), which may give rise to additional costs.

Orders for the issue and redemption of units received by the Company or the custodian at or before 13:30 PM CET ("the order acceptance deadline") on a valuation date are processed on the basis of the net asset value per unit on the next valuation date. Orders received by the Company or the Depositary after 13:30 PM CET are processed on the basis of the net asset value per unit on the valuation date immediately following that next valuation date.

Suspension of the redemption of units

In addition to the information in the section entitled "Suspension of the redemption of units" in the general section of the Sales Prospectus, the following applies: If the master fund in which the feeder fund invests temporarily suspends the redemption of its shares, the Company in turn has the right to suspend the redemption of units of the feeder fund during the same period of time.

Restriction of the redemption of units

In addition to the information in the section entitled "Restriction of redemption" in the general section of the Sales Prospectus, the following applies: If the redemption of units of the master

fund in which the feeder fund invests is temporarily restricted, the Company shall be entitled to restrict the redemption of units of the feeder fund during the same period.

Measures taken to ensure compliance with requirements for net asset value calculation and publication in order to avoid market timing in units and prevent arbitrage opportunities

The order acceptance deadline for the issue and redemption of the master fund's units is 4:00 PM CET on every valuation date.

Minimum investment

Insofar as minimum investment amounts exist for unit classes, these can be found in the table below.

Issue and redemption prices

Initial sales charge

When determining the issue price, an initial sales charge is added to the net asset value per unit. Information on the amount of the initial sales charge that is levied can be found in the table below. The initial sales charge may reduce or even completely consume the performance of the feeder fund, particularly in the case of a short investment period.

The initial sales charge is basically a fee for the distribution of the units of the feeder fund. The Company may pass on the initial sales charge to intermediaries as remuneration for sales services.

Redemption fee

A redemption fee is not charged. Redemption takes place at the net asset value per unit.

Reporting and correction of pricing errors in the master fund

The correction and reporting of pricing errors are processed by different companies for the master and the feeder fund, but there are arrangements in place that will make it possible to immediately take into account in the feeder fund any error in pricing that might have occurred in the master fund.

Special arrangements for the calculation of the net asset value per unit

Notwithstanding the general section of the Sales Prospectus, the net asset value, the net asset value per unit and the issue and redemption prices are determined only on valuation dates that are also a bank business day in Luxembourg.

Fees and expenses

All-in fee

The Company shall be paid a fee from the feeder fund for each day of the fiscal year in the amount of 1/365 (1/366 in a leap year) of the all-in fee stated in the following table for each individual unit class of the respective net asset value

(article 18 of the General Terms and Conditions of Investment).

On each day that is a valuation date, the all-in fee will be calculated based on the net asset value determined on the last valuation date and taken into account as a liability in the net asset value of the current valuation date.

On each day that is not a valuation date, the all-in fee will be calculated based on the net asset value determined on the last valuation date and taken into account as a liability in the net asset value of the next valuation date.

The all-in fee for all calendar days in a month shall be paid by the tenth calendar day of the next month.

This all-in fee covers the following services provided by and expenses incurred by the Company which shall therefore not be additionally charged to the feeder fund:

- a) the Company's activities related to the management of the feeder fund (collective asset management, which particularly includes fund management, administration, cost of distribution and a service fee for reporting and analysis);
- b) custodian fees;
- c) cash and custody account fees in line with normal banking practice (including, where applicable, normal costs for holding foreign assets in custody abroad);
- d) the costs incurred for printing and mailing the sales documentation intended for investors as required by law (annual and semiannual reports, Sales Prospectuses, Key Information Document);
- e) the cost of announcing the annual and semiannual reports, the issue and redemption prices and (where applicable) distributions or reinvestments and the liquidation report;
- f) the cost of having the feeder fund audited by the external auditor of the feeder fund;
- g) the cost of publishing the information required for taxation and the certificate confirming that the tax information was prepared in compliance with German tax law.

In addition to the all-in fee payable to the Company, the following additional expenses incurred by the Company may also be charged to the feeder fund:

- a) the costs incurred by the Company for asserting and enforcing legal claims for the account of the feeder fund, and for defending any claims asserted against the Company to the detriment of the feeder fund;
- b) the costs of creating and using a durable medium (statutory, required in particular by the KAGB), except in the case of providing information on mergers of investment undertakings and except in the case of providing information about measures in connection with investment limit violations or

computational errors in the determination of the net asset value per unit;

- c) taxes imposed in connection with the fees payable to the Company, the custodian and third parties, as well as with the aforementioned expenses, including taxes arising in connection with administration and custody.

Transaction costs

In addition to the aforementioned fees and expenses, the costs incurred in connection with the purchase and sale of fund assets will also be charged to the feeder fund.

Costs of the master fund

The following applies for the master fund: The Management Company (DWS Investment S.A.) shall receive from the feeder fund an annual management fee of up to 0.4% for the management of the master fund.

The following additional fees may be incurred:

- the *taxe d'abonnement* (a 0.01% Luxembourg tax on the assets of the master fund);
- transaction costs, audit costs and any performance-based fee charged by the master fund, as well as any other expenses that may be charged to the master fund.

Notwithstanding the relevant provisions in the Sales Prospectus under the sections entitled "Costs," "Buy and sell orders for securities and financial instruments" and "Commission sharing," the Company shall use no valuable benefits from brokers and traders in connection with trading operations for the feeder fund.

The Company may not impose initial sales charges or redemption fees in connection with the purchase or redemption of shares of the master fund.

The fees that were charged to the feeder fund as a management fee for the shares of the master fund by its management company are disclosed in the annual and semiannual reports. In addition, the annual report will contain a statement of the combined charges that were taken from the feeder fund and the master fund.

Costs and expenses to be borne by the feeder fund for investment in the master fund:

One-time costs before and after investment in the master fund

Initial sales charges:

When acquiring the master fund, the Company may impose no initial sales charges.

Redemption fees:

When redeeming the master fund, the Company may impose no redemption fees for such redemption.

Costs that must be borne by the feeder fund under certain circumstances: Fees based on the performance of the feeder fund: None.

Circumstances particular to the acquisition of investment fund units

The portion of the management fee / all-in fee attributable to units of the master fund is reduced by the management fee / all-in fee charged by the master fund, if necessary up to the full amount (difference method).

Fiscal year

The fiscal year of the feeder fund commences on 1, October, and ends on 30, September.

Distribution policy

Reinvesting unit classes

The income from the reinvesting unit classes will not be distributed, but reinvested in the feeder fund.

If units are held in a custody account with the custodian, the custodian's branches will credit distributions free of charge. If the custody account is maintained at banks or savings banks other than the preceding, additional costs may be incurred.

Distributing unit classes

In the case of distributing unit classes, the Company generally distributes – subject to the requisite adjustment of income – the prorated interest, dividends and income that have accrued for the account of the feeder fund during the fiscal year and have not been applied to cover costs.

Realized capital gains may also be included in the distribution – subject to the requisite adjustment of income.

The Company may elect to pay out interim distributions for the feeder fund in accordance with the law.

Distributable prorated income may be carried forward for distribution in future fiscal years, provided that the aggregate amount of the income carried forward does not exceed 15% of the feeder fund's assets as of the end of the fiscal year.

Income from shortened fiscal years can be transferred in full.

If units are held in a custody account with the custodian, the custodian's branches will credit distributions free of charge. If the custody account is maintained at banks or savings banks other than the preceding, additional costs may be incurred.

Terms and Conditions of Investment

General Terms and Conditions of Investment

governing the legal relationship between the investors and DWS Investment GmbH, Frankfurt/Main, (hereinafter referred to as the "Company") for the UCITS-compliant investment funds managed by the Company. These General Terms and Conditions of Investment are only valid in conjunction with the Special Terms and Conditions of Investment set forth for the specific UCITS fund.

§ 1 General principles

1. The Company is a UCITS asset management company subject to the provisions of the German Investment Code (Kapitalanlagegesetzbuch, "KAGB").
2. The Company invests the money deposited with it in its own name for the collective account of the investors in the form of a UCITS fund pursuant to the principle of risk spreading in assets permitted under the KAGB, but separate from its own assets. Global certificates are issued concerning the rights of the investors.

The business objective of the UCITS fund is limited to the investment of capital according to a defined investment strategy in a collective asset management structure using the funds deposited with it; all operating activities and active commercial usage of the assets held are excluded.

3. The legal relationship between the Company and the investor is defined by the General Terms and Conditions of Investment ("General Terms") and the Special Terms and Conditions of Investment ("Special Terms") (collectively the "Terms and Conditions of Investment") of the UCITS fund, and by the KAGB.

§ 2 Custodian

1. The Company shall appoint a credit institution as custodian for the UCITS fund. The custodian shall act independently of the Company and solely in the interests of the investors.
2. The functions and duties of the custodian are defined by the custodian agreement concluded with the Company, the KAGB and the Terms and Conditions of Investment.
3. The custodian can outsource custody duties to another entity ("sub-custodian") as provided for by article 73 KAGB. Additional details are contained in the Sales Prospectus.
4. The custodian shall be liable to the UCITS fund or to the investors for the loss of a financial instrument held in custody by the custodian as defined in article 72 (1), no. 1, KAGB, or by a sub-custodian to which the custody of financial instruments was delegated in accordance with article 73 (1) KAGB. The custodian shall not be liable if it can prove that the loss is attributable to

external events the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. Additional rights arising from the provisions of civil law on the basis of contracts, or from prohibited actions, are unaffected. The custodian shall also be liable to the UCITS fund or to the investors for all other losses they incur as a consequence of the custodian's negligent or intentional violation of its obligations under the provisions of the KAGB. The liability of the custodian shall not be affected by any delegation of custody duties according to paragraph 3, sentence 1.

§ 3 Fund management

1. The Company purchases and manages the assets in its own name for the collective account of the investors with due skill, honesty, care and diligence. In performing its functions, the Company shall act independently of the custodian and solely in the interests of the investors.
2. The Company has the right to use the money deposited with it by the investors to purchase assets, resell them and invest the proceeds in other assets; the Company is furthermore authorized to carry out all other legal transactions arising out of the management of the assets.
3. The Company may neither extend money loans nor enter into any obligations in connection with a contract of surety or guarantee for the collective account of the investors. It may not sell assets as defined by articles 193, 194 and 196 KAGB that are not held by the UCITS fund at the time of conclusion of the transaction. Article 197 KAGB shall remain unaffected.

§ 4 Investment principles

The UCITS fund is invested directly or indirectly pursuant to the principle of risk spreading. The Company shall acquire for the UCITS fund only such assets as can be expected to generate income and/or growth. It determines in the Special Terms which assets may be acquired for the UCITS fund.

§ 5 Securities

Unless the Special Terms provide for additional restrictions, the Company may purchase securities for the account of the UCITS fund – subject to article 198 KAGB – only if

- a) they are admitted for trading on a stock exchange in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area or are admitted for trading or included in another organized market in one of these states;
- b) they are exclusively admitted for trading on a stock exchange outside the member states of the European Union or outside the other states that are parties to the Agreement on the European Economic Area or are admitted for

trading or included in another organized market in one of these states, provided that the choice of this stock exchange or organized market is approved by the German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, "BaFin")¹;

- c) their admission for trading on a stock exchange in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area or their admission to an organized market or their inclusion in such a market in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area is to be applied for under the terms and conditions of issue, insofar as the admission or inclusion of these securities takes place within one year of issue;
- d) the respective terms of issue require that their admission for trading on a stock exchange or on an organized market, or their inclusion in such a market, outside the member states of the European Union or outside the other states that are parties to the Agreement on the European Economic Area must be applied for, BaFin has approved of the choice of stock exchange or organized market and the admission or inclusion of such securities takes place within one year of their issue;
- e) they are equities to which the UCITS fund is entitled in the event of a capital increase from the issuing company's own funds;
- f) they are acquired through the exercise of subscription rights belonging to the UCITS fund;
- g) they are units of closed-end funds that meet the criteria specified in article 193 (1), sentence 1, no. 7, KAGB;
- h) they are financial instruments that meet the criteria specified in article 193 (1), sentence 1, no. 8, KAGB.

The acquisition of securities according to sentence 1 (a) through (d) may take place only if the prerequisites stipulated in article 193 (1), sentence 2, KAGB are also fulfilled. Subscription rights may also be acquired if they originate from securities that may themselves be acquired under this article 5.

§ 6 Money market instruments

1. Unless the Special Terms provide for additional restrictions, the Company may, subject to article 198 KAGB, acquire for the account of the UCITS fund instruments that are usually traded in the money market, as well as interest-bearing securities that have a residual term not exceeding 397 days at the time of acquisition for the UCITS fund, or whose interest payments are adjusted to market circumstances regularly, although at least once every 397 days, throughout their entire term,

¹ The list of authorized stock exchanges and of other organized markets according to article 193 (1), sentence 1, nos. 2 and 4, KAGB is published on the BaFin website (<http://www.bafin.de>).

pursuant to the terms and conditions of issue or whose risk profile corresponds to the risk profile of such securities ("money market instruments").

Money market instruments may be acquired for the UCITS fund only if

- a) they are admitted for trading on a stock exchange in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area or are admitted for trading or included in another organized market in such a member state;
- b) they are exclusively admitted for trading on a stock exchange outside the member states of the European Union or outside the other states that are parties to the Agreement on the European Economic Area or are admitted for trading or included in another organized market in such a country, insofar as the choice of this stock exchange or organized market is approved by BaFin²;
- c) they are issued or guaranteed by the European Union, the German federal government, a special-purpose vehicle of the German federal government, a German federal state, another member state or another central, regional or local authority or the central bank of a member state of the European Union, the European Central Bank or the European Investment Bank, a third country or, in the case of a federal state, by one of the members making up the federation, or by a public international body of which one or more member states of the European Union are members;
- d) they are issued by a company whose securities are traded in the markets specified in (a) and (b) above;
- e) they are issued or guaranteed by a credit institution that is subject to supervision according to criteria defined in European Union legislation, or by a credit institution that is subject to and complies with prudential rules considered by BaFin to be equivalent to those of European Union legislation; or
- f) they are issued by other issuers and those issuers meet the requirements under article 194 (1), sentence 1, no. 6, KAGB.

2. Money market instruments as defined in paragraph 1 may be acquired only if they fulfill the respective prerequisites of article 194 (2) and (3) KAGB.

§ 7 Bank balances

The Company may, for the account of the UCITS fund, hold bank balances having a term not exceeding twelve months. Such balances shall be kept in blocked accounts at a credit institution having its registered office in a member state of the European Union or in another state that is a party to the Agreement on the European Economic Area, or else in a third country whose prudential rules are considered by BaFin as equivalent to

those stipulated in European Union legislation. Unless the Special Terms provide otherwise, the bank balances may also be denominated in foreign currencies.

§ 8 Investment fund units

1. Unless the Special Terms provide otherwise, the Company may acquire units of investment undertakings according to Directive 2009/65/EC ("UCITS") for the account of the UCITS fund. Units of other domestic investment funds and investment stock corporations with variable capital, as well as units of open-ended EU AIFs and foreign open-ended AIFs may be acquired if they fulfill the requirements of article 196 (1), sentence 2, KAGB.

2. The Company may acquire units of domestic investment funds and investment stock corporations with variable capital, as well as units of EU UCITS, open-ended EU AIFs and foreign open-ended AIFs only if the terms and conditions of investment or the Articles of Incorporation of the asset management company, the investment stock corporation with variable capital, the EU investment undertaking, the EU management company, the foreign AIF or the foreign AIF management company stipulate that no more than 10% of their net assets in total may be invested in units of other domestic investment funds, investment stock corporations with variable capital, open-ended EU investment undertakings or foreign open-ended AIFs.

§ 9 Derivatives

1. Unless the Special Terms provide otherwise, the Company may employ derivatives according to article 197 (1), sentence 1, KAGB and financial instruments with derivative components according to article 197 (1), sentence 2, KAGB as part of the management of the UCITS fund. Depending on the type and volume of the derivatives and financial instruments with derivative components employed, the Company may use either the simple or the qualified approach as defined by the Regulation on risk management and risk measurement when using derivatives, securities loans and repurchase agreement transactions in investment undertakings according to the German Investment Code ("Derivatives Regulation" or "DerivateV") issued pursuant to article 197 (3) KAGB to determine the extent to which the market risk limit for the use of derivatives and financial instruments with derivative components set in accordance with article 197 (2) KAGB has been reached; details are specified in the Sales Prospectus.

2. If the Company uses the simple approach, it may employ regularly only standard forms of derivatives and financial instruments with derivative components or combinations of these derivatives, financial instruments with derivative components and underlyings permissible under article 197 (1), sentence 1, KAGB in the UCITS fund.

Complex derivatives based on underlyings permissible under article 197 (1), sentence 1, KAGB may only be employed to a negligible extent. The attributable amount of the UCITS fund to be determined for the market risk in accordance with article 16 DerivateV may at no time exceed the value of the UCITS fund's assets.

The standard derivatives are:

- a) Futures contracts on the underlyings according to article 197 (1) KAGB, with the exception of investment fund units according to article 196 KAGB;
- b) Options or warrants on the underlyings according to article 197 (1) KAGB, with the exception of investment fund units according to article 196 KAGB, and on futures contracts according to (a) hereof, if they have the following characteristics:
 - aa) the option may be exercised either during the entire term or at the end of the term, and
 - bb) at the time the option is exercised, its value depends directly on the positive or negative difference between the strike price and the market price of the underlying, and becomes zero if the difference has the opposite sign;
- c) Interest rate swaps, currency swaps or interest rate/currency swaps;
- d) Options on swaps according to (c) hereof, provided they have the characteristics defined in (aa) and (bb) of (b) above ("swaptions");
- e) Single-name credit default swaps.

3. If the Company uses the qualified approach, it may – provided an appropriate risk management system is in place – invest in any and all types of financial instruments with derivative components or in derivatives that are based on underlyings permissible in accordance with article 197 (1), sentence 1, KAGB.

In these cases, the value-at-risk amount attributable to the UCITS fund for the market risk exposure ("VaR amount") may at no time exceed twice the value-at-risk amount for the market risk exposure of the associated reference portfolio according to article 9 DerivateV. Alternatively, the VaR amount may at no time exceed 20% of the UCITS fund's assets.

4. In these transactions, the Company may not deviate under any circumstances from the investment principles and investment limits specified in the Terms and Conditions of Investment or from those specified in the Sales Prospectus.

5. The Company will employ derivatives and financial instruments with derivative components for hedging purposes, for efficient portfolio management, and for achieving additional income, if and to the extent that it considers this advisable in the interests of the investors.

² See footnote 1.

6. In determining the market risk limit for the use of derivatives and financial instruments with derivative components, the Company may at any time switch between the simple and qualified approach in accordance with article 6, sentence 3, DerivateV. The switch does not require approval by BaFin; however, the Company must inform BaFin immediately of the change and publish it in the next semiannual or annual report.

7. The Company will comply with the DerivateV whenever it uses derivatives and financial instruments with derivative components.

§ 10 Other investment instruments

Unless the Special Terms provide otherwise, the Company may acquire 'Other' investment instruments in accordance with article 198 KAGB for the account of the UCITS fund up to a value of 10% of the UCITS fund's assets.

§ 11 Issuer limits and investment limits

1. In its management, the Company must comply with the limitations and restrictions specified in the KAGB, the DerivateV and in the Terms and Conditions of Investment.

2. Up to 5% of the UCITS fund's assets may be invested in securities and money market instruments, including securities and money market instruments purchased under repurchase agreements, of the same issuer; however, up to 10% of the UCITS fund's assets may be invested in such assets if that is provided for in the Special Terms and the total value of the securities and money market instruments of such single issuers does not exceed 40% of the UCITS fund's assets.

Issuers of securities and money market instruments must then also be taken into consideration within the scope of the limits set out in sentence 1 if the securities and money market instruments issued by these issuers are acquired indirectly via other securities included in the UCITS that are linked to their performance.

3. The Company may invest up to 35% of the UCITS fund's assets respectively in bonds, promissory note loans and money market instruments that have been issued or guaranteed by any one of the German federal government, a German federal state, the European Union, a member state of the European Union or its local authorities, another state that is a party to the Agreement on the European Economic Area, a third country or by an international organization of which one or more member states of the European Union are members.

4. The Company may invest up to 25% each of the UCITS fund's assets in mortgage bonds and municipal bonds, as well as in bonds and note loans issued by credit institutions having their registered offices in a member state of the European Union or in another state that is a party

to the Agreement on the European Economic Area, if these credit institutions are legally subject to special public supervision intended to protect the holders of such bonds, and if the sums deriving from the issue of such bonds are invested in conformity with the law in assets that, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and that, in the event of default of the issuer, would be used on a priority basis for the repayment of the principal and payment of the accrued interest. If the Company invests more than 5% of the UCITS fund's assets in bonds of the same issuer according to sentence 1, the total value of these bonds may not exceed 80% of the UCITS fund's assets.

5. The limit in paragraph 3 may be exceeded in the case of securities and money market instruments of the same issuer pursuant to article 206 (2) KAGB if that is provided for in the Special Terms, which must state the names of the issuers involved. In these cases, the securities and money market instruments held for the account of the UCITS fund must originate from at least six different issues; no more than 30% of the UCITS fund's assets may be invested in one issue.

6. The Company may invest no more than 20% of the UCITS fund's assets in bank balances in accordance with article 195 KAGB at the same credit institution.

7. The Company shall ensure that a combination of

- a) securities or money market instruments issued by one and the same institution,
- b) deposits at this institution, and
- c) attributable amounts for the counterparty risk of transactions conducted with this institution,

do not exceed 20% of the UCITS fund's assets. Sentence 1 shall apply to the issuers and guarantors stated in paragraphs 3 and 4 subject to the condition that the Company shall ensure that a combination of the assets and attributable amounts stated in sentence 1 does not exceed 35% of the UCITS fund's assets. The respective individual upper limits shall remain unaffected in both cases.

8. The bonds, promissory note loans and money market instruments referred to in paragraphs 3 and 4 shall not be taken into consideration when applying the 40% limits referred to in paragraph 2. Notwithstanding the provision in paragraph 7, the limits referred to in paragraphs 2 through 4 and in paragraphs 6 and 7 shall not be combined.

9. The Company may invest no more than 20% of the UCITS fund's assets in units of a single investment undertaking according to article 196 (1) KAGB. The Company may invest a total of no more than 30% of the UCITS fund's assets in units of investment undertakings according to article 196 (1), sentence 2, KAGB. The Company may

acquire for the account of the UCITS fund no more than 25% of the issued units of another open-ended domestic, EU or foreign investment undertaking that is invested according to the principle of risk spreading in assets as defined by articles 192 through 198 KAGB.

§ 12 Merger

1. The Company may, in accordance with articles 181 through 191 KAGB,

- a) transfer all the assets and liabilities of this UCITS fund to another currently existing UCITS fund or a new one established by such transfer, or to an EU UCITS, or to a UCITS investment stock corporation with variable capital;
- b) transfer all the assets and liabilities of another open-ended retail investment undertaking into this UCITS fund.

2. The merger requires the approval of the respective competent supervisory authority. The detailed procedure is governed by articles 182 through 191 KAGB.

3. The UCITS fund may be merged with a retail investment fund that is not a UCITS only if the receiving or newly established investment undertaking remains a UCITS. EU UCITS may additionally be merged into the UCITS fund as provided for by article 2 (1), point (p) (iii), of Directive 2009/65/EC.

§ 13 Securities loans

1. The Company may grant to a securities borrower for the account of the UCITS fund a securities loan that can be terminated at any time in exchange for appropriate market consideration and after provision of sufficient collateral in accordance with article 200 (2) KAGB. The market value of the securities to be transferred, together with the market value of the securities already transferred as a securities loan for the account of the UCITS fund to the same securities borrower, including affiliated companies as defined by article 290 of the German Commercial Code, may not exceed 10% of the UCITS fund's assets.

2. If collateral for the securities transferred is provided by the borrower is in the form of bank balances, such bank balances must be held in blocked custody accounts according to article 200 (2), sentence 3, no. 1, KAGB. Alternatively, the Company may avail itself of the option to invest such bank balances in the following assets in the currency of these balances:

- a) in high-quality bonds that have been issued or guaranteed by the German federal government, a German federal state, the European Union, a member state of the European Union or its local authorities, another state that is a party to the Agreement on the European Economic Area or a third country;

- b) in money market funds with short-term maturity structures corresponding to guidelines issued by BaFin on the basis of article 4 (2) KAGB; or
- c) by way of a reverse repurchase agreement transaction with a credit institution that guarantees recovery of the accrued balance at all times.

The UCITS fund is entitled to the income from the investment of the collateral.

- 3. The Company may also make use of an organized system for the brokerage and settlement of securities loans provided by a central depository for securities that does not meet the requirements of article 200 (1), sentence 3, KAGB, if there is no departure from the right to termination at any time according to paragraph 1.
- 4. Unless the Special Terms provide otherwise, the Company may also grant securities loans in relation to money market instruments and investment fund units, insofar as the UCITS fund is permitted to acquire these assets. The provisions of paragraphs 1 through 3 shall apply accordingly in this case.

§ 14 Repurchase agreement transactions

- 1. The Company may, for the account of the UCITS fund, enter into securities repurchase agreement transactions as defined by article 340b (2) of the German Commercial Code that can be terminated at any time with credit institutions or financial services institutions in exchange for a consideration on the basis of standardized master agreements.
- 2. The repurchase agreement transactions must involve securities that may be purchased for the UCITS fund in accordance with the Terms and Conditions of Investment.
- 3. The repurchase agreement transactions may have a maximum term of twelve months.
- 4. Unless the Special Terms provide otherwise, the Company may also conclude repurchase agreement transactions in relation to money market instruments and investment fund units, insofar as the UCITS fund is permitted to acquire these assets. The provisions of paragraphs 1 through 3 shall apply accordingly in this case.

§ 15 Borrowing

The Company may take out short-term loans of up to 10% of the UCITS fund's assets for the collective account of the investors if the borrowing conditions are customary in the market, and if the custodian grants its consent.

§ 16 Units

- 1. The units in the investment fund are made out to bearer and are represented by share certificates or are issued as electronic share certificates.
- 2. Securitised share certificates are securitized in a global certificate; the issue of individual certificates is excluded. By acquiring a unit of the investment fund, the investor acquires a co-ownership share of the global certificate. This is transferable unless the Special Terms provide otherwise.
- 3. The units may have different configuration characteristics, especially with respect to the distribution policy, the initial sales charge, the redemption fee, the currency of the net asset value per unit, the management fee, the minimum investment or a combination of these features ("unit classes"). Details are set down in the Special Terms.

§ 17 Issue and redemption of units, restriction and suspension of redemption

- 1. The number of units issued is generally unlimited. The Company reserves the right to suspend or definitively discontinue the issue of units. The issue of units may be suspended in whole or in part (through mechanisms such as the introduction of upper limits). The Company shall inform investors of a suspension or definitive discontinuation of the issue of units in the electronic information media designated in the Sales Prospectus.
- 2. Units can be purchased from the Company, the custodian or through an intermediary. The Special Terms can provide that units may only be acquired and held by certain investors.
- 3. Investors may request the redemption of units by the Company. The Special Terms may stipulate notice periods for redemption. The Company is obligated to redeem units at the applicable redemption price for the account of the UCITS fund. Units are redeemed by the custodian.
- 4. Unless the Special Terms provide otherwise, the Company, however, reserves the right to restrict the redemption of units for up to 15 working days if investors' redemption requests reach a threshold beyond which the redemption requests can no longer be executed in the interests of all investors due to the liquidity situation of the investment fund's assets. The threshold is defined in the Special Terms. It describes the redemption request as a percentage of the net asset value of the investment fund.

In this case, the Company shall only meet the redemption request per investor on a pro rata basis and, other than that, the redemption obligation shall not apply. This means that each redemption order is only executed on a pro rata basis. The part

of the order that is not executed (remaining order) will not be executed by the Company at a later date, but instead expires (pro-rata approach with forfeiture of the remaining order).

Further details on the redemption restriction procedure can be found in the Sales Prospectus. The Company must immediately publish the restriction of the redemption of units as well as the lifting of such restriction on its website.

- 5. The Company also reserves the right to suspend the redemption of units in accordance with article 98 (2) KAGB under exceptional circumstances that make a suspension appear necessary in the interests of the investors.
- 6. The Company shall notify investors about the suspension of the redemption of the units according to paragraph 4 and its resumption by publishing notices in the Bundesanzeiger (Federal Gazette) and in the electronic information media designated in the Sales Prospectus. Investors shall be informed of the suspension and resumption of the redemption of units by durable medium immediately after their respective publication in the Bundesanzeiger.

§ 18 Net asset value, net asset value per unit, issue and redemption prices

- 1. Unless the Special Terms provide otherwise, the issue and redemption prices of the units are based on the net asset value per unit, which is calculated from the sum of the market values of the assets owned by the UCITS fund less its borrowings and other liabilities ("the net asset value"), divided by the number of units outstanding. If different unit classes are introduced for the UCITS fund pursuant to article 16 (3), the net asset value per unit and the issue and redemption prices shall be calculated separately for each unit class. Assets and liabilities are valued in accordance with articles 168 and 169 KAGB and with the Accounting and Valuation Regulation issued under the KAGB ("KARBV").
 - 2. The issue price corresponds to the net asset value per unit of the UCITS fund plus any initial sales charge specified in the Special Terms in accordance with article 165 (2), no. 8, KAGB.
- The redemption price corresponds to the net asset value per unit of the UCITS fund less any redemption fee specified in the Special Terms in accordance with article 165 (2), no. 8, KAGB.
- 3. The settlement date for purchases of units and redemption orders shall be no later than the valuation date following the date on which the buy order or the redemption order was received, unless the Special Terms provide otherwise.

- 4. The net asset value, the net asset value per unit and the issue and redemption prices will be determined Monday through Friday, except on public holidays in Frankfurt/Main, Hesse and not

on December 24 or December 31 ("valuation dates"). Other days may also be excluded as valuation dates in the Special Terms and Conditions of Investment.

§ 19 Costs

The fees and other expenses that may be charged to the UCITS fund and to which the Company, the custodian and third parties are entitled are set forth in the Special Terms. In the case of fees as defined in sentence 1 hereof, the method of payment, their amount and the calculation that forms their basis are also specified in the Special Terms.

§ 20 Reporting duties

1. No later than four months following the close of the UCITS fund's fiscal year, the Company shall publish an annual report, including a statement of income and expenses, according to article 101 (1), (2) and (4) KAGB.

2. No later than two months after the first half of the fiscal year, the Company shall publish a semiannual report according to article 103 KAGB.

3. If the right to manage the UCITS fund is transferred to another asset management company in the course of the fiscal year, or if the UCITS fund is merged into another UCITS fund, a UCITS investment stock corporation with variable capital, or an EU UCITS in the course of the fiscal year, the Company must draw up an interim report dated to the key date of transfer. This report must comply with the requirements of an annual report according to paragraph 1.

4. If the UCITS fund is liquidated, the custodian shall prepare liquidation reports that meet the requirements of an annual report according to paragraph 1 annually and as of the date the liquidation is completed.

5. The reports are available from the Company and the custodian and at other offices that must be specified in the Sales Prospectus and in the Key Information Document; they are also announced in the Bundesanzeiger.

§ 21 Termination and liquidation of the UCITS fund

1. The Company may terminate its management of the UCITS fund by giving at least six months' notice through an announcement in the Bundesanzeiger and in the annual or semiannual report. Investors shall be informed immediately by durable medium of a termination announced according to sentence 1.

2. Upon the effective termination of its management, the Company's right to manage the UCITS fund shall cease. In this case, the UCITS fund, or the right to manage and dispose of the UCITS fund, shall pass to the custodian, which

shall liquidate it and distribute the proceeds to the investors. During the liquidation period, the custodian is entitled to compensation for its liquidation activity and to reimbursement of expenses necessary for the liquidation. The custodian may, with the approval of BaFin, refrain from such liquidation and distribution, and instead transfer the management of the UCITS fund to another asset management company in accordance with the existing Terms and Conditions of Investment.

3. The Company must draw up a liquidation report to the day on which its right of management ceases in accordance with article 99 KAGB; this report must comply with the requirements of an annual report according to article 20 (1).

§ 22 Change of asset management company and custodian

1. The Company may transfer the right to manage and dispose of the UCITS fund to another asset management company. The transfer requires prior approval by BaFin.

2. The approved transfer shall be announced in the Bundesanzeiger and, in addition, in the annual report or semiannual report as well as in the electronic information media designated in the Sales Prospectus. The transfer shall take effect no earlier than three months after its announcement in the Bundesanzeiger.

3. The Company may change the custodian for the UCITS fund. Such a change requires the approval of BaFin.

§ 23 Amendments to the Terms and Conditions of Investment

1. The Company may amend the Terms and Conditions of Investment.

2. Amendments to the Terms and Conditions of Investment require prior approval by BaFin.

3. All proposed amendments shall be announced in the Bundesanzeiger and in the electronic information media designated in the Sales Prospectus. Reference to the proposed amendments and their coming into force must be made in a publication as defined in sentence 1. In the case of cost changes as defined by article 162 (2), no. 11, KAGB that are disadvantageous to investors, or of changes that are disadvantageous to investors in relation to significant investor rights, as well as in the case of changes to the investment principles of the UCITS fund as defined by article 163 (3) KAGB, investors shall, at the same time the announcement according to sentence 1 is published, be informed in an understandable way by durable medium about the material contents of the proposed amendments to the Terms and Conditions of Investment and the background thereto. In the case of amendments to current investment principles, investors must also be

informed about their rights in accordance with section 163 (3) KAGB.

4. Amendments take effect no earlier than on the day after their publication in the Bundesanzeiger, with amendments to provisions concerning costs and investment principles taking effect no earlier than four weeks after their respective publication.

§ 24 Place of performance

The place of performance shall be the location of the registered office of the Company.

§ 25 Dispute resolution proceedings

The Company has undertaken to participate in dispute resolution proceedings of a consumer arbitration office.

In the case of disputes consumers may contact the investment funds ombudsman's office ("Ombudsstelle für Investmentfonds") at BVI Bundesverband Investment und Asset Management e.V. as the competent consumer arbitration office. The Company participates in dispute resolution proceedings before this arbitration office.

The office can be contacted at:
Büro der Ombudsstelle (Office of the Ombudsman) of BVI
Bundesverband Investment und Asset Management e.V.
Unter den Linden 42,
10117 Berlin, Germany,
www.ombudsstelle-investmentfonds.de.

The European Commission has set up a European online dispute resolution platform at www.ec.europa.eu/consumers/odr. Consumers may use this for the extra-judicial settlement of disputes arising from online sales contracts or online service contracts. The Company's e-mail address is: info@dws.com.

Special Terms and Conditions of Investment

governing the legal relationship between the investors and DWS Investment GmbH, Frankfurt/Main, Germany, (hereinafter referred to as the "Company") for the UCITS-compliant investment fund

DWS WellCare

managed by the Company. These Special Terms and Conditions of Investment are only valid in conjunction with the General Terms and Conditions of Investment laid down by the Company.

Investment principles and investment limits

§ 26 Assets

The UCITS fund is a UCITS-compliant feeder fund as defined by article 1 (19), no. 11, KAGB ("feeder fund"). The master fund as defined by article 1 (19), no. 12, KAGB is DWS Invest WellCare ("master fund"), which is managed by DWS Investment S.A. The master fund, consisting of different share classes, is a sub-fund of DWS Invest, an investment company with variable capital. That investment company was established under Luxembourg law, on the basis of the Law of December 17, 2010, on undertakings for collective investment and of the Law of August 10, 1915, on trading companies, as a Société d'Investissement à Capital Variable ("SICAV") and is subject to the provisions of Part I of the aforementioned Law of December 17, 2010. The master fund is an EU investment undertaking that meets the requirements of Directive 2009/65/EU.

The Company may acquire only the following assets for the feeder fund:

1. shares of the EU UCITS master fund DWS Invest WellCare,
2. bank balances according to article 195 KAGB, provided they are available on demand,
3. derivatives according to article 197 KAGB, provided they are used only for hedging purposes.

§ 27 Investment limits

1. At least 85% of the feeder fund's assets are invested in shares of the master fund.

The objective of the master fund is to generate long-term capital appreciation through the worldwide investment of at least 51% of the master fund's assets in equities of companies of all market capitalizations that are active in the area of health care and wellness. These companies provide technologies, products or services in connection with modern treatment, early detection and/or prevention (as defined below), which are

qualitatively assessed by the sub-fund management using a fundamental analysis.

At least 70% of the master fund's assets are invested in equities of all market capitalizations, equity certificates, participation and dividend-right certificates, convertible bonds and equity warrants issued by international companies.

The master fund can invest in money market instruments and deposits with credit institutions, and up to 5% of its assets in money market funds. Investments in money market instruments, deposits with credit institutions and money market funds as well as ancillary liquid assets held in addition to these investments will together not exceed more than 20% of the master fund's assets.

For the purpose of inducing a partial tax exemption within the meaning of the German Investment Tax Act, the master fund must invest at least 60% of its gross assets (determined as being the value of the investment fund's assets without taking into account liabilities) in equities that are admitted to official trading on a stock exchange or admitted to, or included in, another organized market and which are not

- units of investment funds;
- equities indirectly held via partnerships;
- units of corporations, associations of persons or estates, at least 75% of the gross assets of which consist of immovable property in accordance with statutory provisions or their investment conditions, if such corporations, associations of persons or estates are subject to corporate income tax of at least 15% and are not exempt from it, or if their distributions are subject to tax of at least 15%, and the investment fund is not exempt from said taxation;
- units of corporations which are exempt from corporate income taxation to the extent that they conduct distributions unless such distributions are subject to taxation at a minimum rate of 15% and the investment fund is not exempt from said taxation;
- units of corporations, the income of which originates, directly or indirectly, to an extent of more than 10%, from units of corporations that are (i) real estate companies or (ii) are not real estate companies, but (a) are domiciled in a member state of the European Union or a member state of the European Economic Area and are not subject in said domicile to corporate income tax or are exempt from it or (b) are domiciled in a third country and are not subject in said domicile to corporate income tax of at least 15% or are exempt from it;
- units of corporations which hold, directly or indirectly, units of corporations that are (i) real estate companies or (ii) are not real estate companies, but (a) are domiciled in a member state of the European Union or a member state of the European Economic Area and are not subject in said domicile to corporate income tax or are exempt from it or (b) are domiciled in a third country and are not

subject in said domicile to corporate income tax of at least 15% or are exempt from it if the fair market value of units of such corporations equal more than 10% of the fair market value of those corporations.

In this respect, the investment limits of article 207 (1) and article 210 (3) KAGB and of article 11 (8) of the General Terms and Conditions of Investment do not apply to the feeder fund.

2. Up to 15% of the feeder fund's assets may additionally be invested in bank balances according to article 25, no. 2, of the Special Terms and Conditions of Investment, and/or in derivatives according to article 25, no. 3, of the Special Terms and Conditions of Investment.

3. Securities, money market instruments, investment fund units other than those named in article 25, no. 1, of the Special Terms and Conditions of Investment, and other investment instruments according to articles 5, 6, 8 and 10 of the General Terms and Conditions of Investment may not be acquired for the feeder fund.

4. In addition to the investment limits defined in paragraphs 1 through 3 above and in the General Terms and Conditions of Investment, it applies for the purposes of bringing about a partial exemption as defined in the German Investment Tax Act (InvStG) that at least 85% of the feeder fund's gross assets (determined as being the value of the investment fund's assets without taking into account liabilities) will be invested in shares of the master fund ("equity funds"). The actual equity capital investment rates of the master fund can be taken into consideration for the rate of the feeder fund's equity capital investments as defined by article 2 (8) InvStG.

Unit classes

§ 28 Unit classes

1. Unit classes as defined by article 16 (3) of the General Terms and Conditions of Investment that differ with respect to the investors that are permitted to acquire and hold units, the distribution policy, the initial sales charge, the redemption fee, the currency of the net asset value per unit including the use of currency hedging transactions, the all-in fee, the minimum investment or a combination of these features may be formed for the feeder fund. Unit classes may be formed at any time at the discretion of the Company.

2. The conclusion of currency hedging transactions exclusively in favor of each currency unit class is permitted. For currency unit classes hedged in favor of the currency of that unit class (the "reference currency"), the Company may also, irrespective of article 9 of the General Terms and Conditions of Investment, employ derivatives as defined by article 197 (1) KAGB on exchange rates or currencies in order to prevent losses of net asset

value through exchange rate losses on assets held by the feeder fund that are not denominated in the reference currency of the unit class.

3. The net asset value per unit is calculated separately for each unit class by fully allocating to each specific unit class the launch costs for new unit classes, the distribution (including any taxes payable out of the assets), the all-in fee and the results of currency hedging transactions, including any income adjustments, that are attributable to that unit class.

4. The existing unit classes are enumerated individually in the Sales Prospectus, as well as in the annual and semiannual reports. The configuration characteristics of the unit classes (distribution policy, initial sales charge, currency of the net asset value per unit, all-in fee, minimum investment or a combination of these features) are described in detail in the Sales Prospectus and in the annual and semiannual reports.

Units, issue and redemption prices, fees and expenses

§ 29 Units

1. The investors are joint owners of a fraction of each asset of the feeder fund in accordance with the number of units they hold.

2. Units of the F unit class are available to investors who:

- (i) acquire the units through distributors not established in Spain,
- (ii) who acquire the units through distributors established in Spain and are professional investors as defined by article 1 (19), no. 32, KAGB

Professional investors as defined by article 1 (19), no. 32, KAGB who acquire units of the F unit class in their own name for a third party must confirm to the Company that the units are being acquired for a professional investor as defined by article 1 (19), no. 32, KAGB. The Company may, at its discretion, request documentation proving compliance with these requirements.

§ 30 Issue and redemption prices, order acceptance deadline

1. The net asset value, the net asset value per unit and the issue and redemption prices are determined in accordance with article 18 of the General Terms and Conditions of Investment for each valuation date that is also a bank business day in Luxembourg.

2. The initial sales charge for the NC, ND, FC and IC unit classes is 0% of the net asset value per unit.

3. A redemption fee is not charged. Redemption takes place at the net asset value per unit.

4. Orders for the issue and redemption of units received by the Company or the custodian at or before 13:30 PM CET ("the order acceptance deadline") on a valuation date are processed on the basis of the net asset value per unit on the next valuation date. Orders received by the Company or the custodian after 13:30 PM CET are processed on the basis of the net asset value per unit on the valuation date immediately following that next valuation date.

§ 31 Suspension of redemption of shares of the master fund

If the master fund in which the feeder fund invests temporarily suspends the redemption of its shares, the Company in turn has the right to suspend the redemption of units of the feeder fund during the same period of time. Article 17 (4) of the General Terms and Conditions of Investment remains unaffected.

§ 32 Fees and expenses

1. The Company shall be paid a fee from the feeder fund for each day of the fiscal year in the amount of 1/365 (1/366 in a leap year) of:

- 1.7% for the NC unit class,
- 1.7% for the ND unit class,
- 0.85% for the FC unit class and
- 0.55% for the IC unit class

of the respective net asset value (cf. article 18 (1) of the General Terms and Conditions of Investment) as the all-in fee.

On each day that is a valuation date, the all-in fee will be calculated based on the net asset value determined on the last valuation date and taken into account as a liability in the net asset value of the current valuation date.

On each day that is not a valuation date, the all-in fee will be calculated based on the net asset value determined on the last valuation date and taken into account as a liability in the net asset value of the next valuation date.

The all-in fee for all calendar days in a month shall be paid by the tenth calendar day of the next month.

This all-in fee covers the following services provided by and expenses incurred by the Company which shall therefore not be additionally charged to the feeder fund:

- a) the Company's activities related to the management of the feeder fund (collective asset management, which particularly includes fund management, administration, cost of distribution and a service fee for reporting and analysis);
- b) custodian fees;
- c) cash and custody account fees in line with normal banking practice (including, where applicable, normal costs for holding foreign assets in custody abroad);

- d) the costs incurred for printing and mailing the sales documentation intended for investors as required by law (annual and semiannual reports, Sales Prospectuses, Key Information Document);
- e) the cost of announcing the annual and semiannual reports, the issue and redemption prices and (where applicable) distributions or reinvestments and the liquidation report;
- f) the cost of having the feeder fund audited by the external auditor of the feeder fund;
- g) the cost of publishing the information required for taxation and the certificate confirming that the tax information was prepared in compliance with German tax law.

2. In addition to the all-in fee payable to the Company according to paragraph 1 hereof, the following additional expenses incurred by the Company may also be charged to the feeder fund:

- a) the costs incurred by the Company for asserting and enforcing legal claims for the account of the feeder fund, and for defending any claims asserted against the Company to the detriment of the feeder fund;
- b) the costs of creating and using a durable medium (statutory, required in particular by the KAGB), except in the case of providing information on mergers of investment undertakings and except in the case of providing information about measures in connection with investment limit violations or computational errors in the determination of the net asset value per unit;
- c) taxes imposed in connection with the fees payable to the Company, the custodian and third parties, as well as with the aforementioned expenses, including taxes arising in connection with administration and custody.

3. Transaction costs

In addition to the aforementioned fees and expenses, the costs incurred in connection with the purchase and sale of fund assets will also be charged to the feeder fund.

4. The Company shall disclose in the annual report and in the semiannual report the amount of the initial sales charges and redemption fees that have been charged to the feeder fund, over the period covered by the report, for the acquisition and redemption of units as defined by article 196 KAGB. When acquiring units that are managed directly or indirectly by the Company itself or by another company with which the Company is affiliated through a material direct or indirect equity interest, the Company itself or the other company may not charge initial sales charges and redemption fees for acquisitions and redemptions. The Company shall disclose in the annual report and in the semiannual report the fee charged to the feeder fund as a management fee for the units held in the feeder fund by the Company itself, by another (asset) management company, or by another company with which the Company is

affiliated through a material direct or indirect equity interest.

Distribution policy and fiscal year

§ 33

Reinvesting unit classes

For the reinvesting unit classes, the Company reinvests in the feeder fund – subject to the requisite adjustment of income – the prorated interest, dividends and other income that have accrued for the account of the feeder fund during the fiscal year and have not been applied to cover costs, as well as the realized capital gains.

§ 34

Distributing unit classes

1. In distributing unit classes, the Company generally distributes – subject to the requisite adjustment of income – the prorated interest, dividends and other income that have accrued for the account of the feeder fund during the fiscal year and have not been applied to cover costs. Realized capital gains may also be included in the distribution – subject to the requisite adjustment of income.

2. Distributable prorated income pursuant to paragraph 1 hereof may be carried forward for distribution in future fiscal years, provided that the aggregate amount of the income carried forward does not exceed 15% of the feeder fund's assets as of the end of the fiscal year. Income from shortened fiscal years can be fully carried forward.

3. In the interest of preserving the capital of the feeder fund, income may be partially, and in exceptional cases fully, retained in the feeder fund for reinvestment.

4. Distributions shall be made on an annual basis within three months of the close of the fiscal year.

§ 35

Fiscal year

The current fiscal year is a shortened fiscal year which commences on October 1, 2023, and ends on June 12, 2024. The period from June 13, 2024, through December 31, 2024, will be another shortened fiscal year. Thereafter, the new fiscal year of the feeder fund commences on January 1 and ends on December 31.

§ 36

Restriction of redemption

The Company may restrict redemption if the investors' redemption requests reach at least 10% of the net asset value of the feeder fund ("threshold").

Summary of tax regulations of importance to investors (subject, without limitation, to taxation in Germany)¹ (as of: April 25, 2025)

Funds organized under German law

General information

The statements on tax regulations only apply to investors who are subject, without limitation, to taxation in Germany. Investors subject, without limitation, to taxation in Germany are hereinafter also referred to as "German tax residents." We recommend that, prior to acquiring units of the fund described in this Sales Prospectus, the foreign investor individually discuss with their tax advisor any possible tax consequences in their country of residence arising from the acquisition of units. Foreign investors are investors not subject, without limitation, to taxation in Germany. They are hereinafter also referred to as "non-resident taxpayers."

The statements contained herein relate to the legal situation since January 1, 2018. Where fund units were acquired prior to January 1, 2018, additional circumstances particular to such fund investment may arise that are not described here in further detail.

As a special-purpose asset, this fund is generally exempt from corporate income tax and trade tax. It is, however, partially subject to corporate income tax on its (from the perspective of German taxation) domestic income from real property, domestic income from equity investments and on other domestic income, in the sense of the limited income tax liability, not including gains on the sale of units in corporations; gains on the sale of units in domestic or foreign corporations whose net asset value is directly or indirectly based on more than 50% of the domestic immovable property may be subject to corporate income tax at the fund level under certain circumstances. The tax rate is 15%. To the extent that tax is imposed on the taxable income through withholding of investment income tax, the tax rate of 15% already includes the solidarity surcharge.

However, the investment income is taxable for the individual investor as income from capital assets, which is subject to income tax, provided that it exceeds the saver's flat allowance of EUR 1,000 p. a. (for single persons or spouses assessed separately) or EUR 2,000 p.a. (for spouses assessed jointly) when added to any other investment income.

Income from capital assets is generally subject to a 25% withholding tax (plus solidarity surcharge and, where applicable, church tax). Income from capital assets also includes the income from investment funds (investment fund income), i.e.,

the fund's distributions, the advance income estimates and the gains on the sale of the units. Under certain conditions, investors can receive a lump-sum portion of this investment income tax-free ("partial exemption").

In general, for the individual investor, the withholding of tax acts as a final payment ("final withholding tax"), so that, as a rule, income from capital assets is not declared in the income tax return. The institution maintaining the custody account usually offsets income subject to withholding against losses and foreign withholding taxes arising from direct investment.

The withholding tax does not act as a final payment, however, if the investor's personal tax rate is lower than the final withholding rate of 25%. In this case, income from capital assets may be declared in the income tax return. The tax office then applies the lower personal tax rate and credits the tax withheld against the personal tax liability ("reduced rate test").

If income from capital assets was not subject to any withholding (because, for example, a capital gain on the sale of fund units was realized in a foreign custody account), such income must be declared in the tax return. Within the tax assessment, any income from capital assets is then also subject to the final withholding rate of 25%, or else to the lower personal tax rate.

If units are held as business assets, the income is considered taxable as operating income.

I Units held as personal assets (German tax residents)

1. Distributions

Distributions of the fund are generally taxable.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 30% of the distributions are tax exempt. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments.

If the fund meets the tax prerequisites for partial exemption of a balanced fund, 15% of the distributions are tax exempt. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the distributions.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

The taxable distributions are generally subject to the 25% withholding tax (plus solidarity surcharge and, where applicable, church tax).

Tax will not be withheld if the investor is a German tax resident and submits an exemption form, provided the taxable income components do not exceed EUR 1,000 for separate assessment or EUR 2,000 for joint assessment of spouses.

A corresponding exemption also applies if a certificate for persons who are not expected to be assessed for income tax (the "non-assessment certificate") is submitted.

If a domestic investor has units held in domestic custody, the institution maintaining the custody account, acting as the paying agent, will not withhold tax provided that, prior to the fixed distribution date, it is presented with either an exemption form conforming to the official sample document and covering an adequate amount or a non-assessment certificate issued by the tax office for a maximum of three years. In this case, the investor is credited the full amount of the distribution.

2. Advance income estimates

The advance income estimate ("Vorabpauschale") is the amount by which the fund's distributions within a calendar year fall short of the baseline return for that calendar year. The baseline return is determined by multiplying the redemption price of the unit at the beginning of a calendar year by 70% of the baseline interest rate, which in turn is derived from long-term government bond market yields. The baseline return is limited to the amount exceeding the difference between the first and last redemption prices determined in the calendar year plus the distributions paid during the calendar year. For the year in which the units were acquired, the advance income estimate is reduced by one-twelfth for each full month preceding the month of acquisition. The advance income estimate is deemed to have accrued on the first workday of the following calendar year.

Advance income estimates are generally taxable.

¹ Article 165 (2), no. 15, KAGB: Summary of tax regulations of importance to investors and statement of whether income distributed by the investment undertaking is subject to withholding tax.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 30% of the advance income estimates are tax exempt. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments.

If the fund meets the tax prerequisites for partial exemption of a balanced fund, 15% of the advance income estimates are tax exempt. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the advance income estimate.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

The taxable advance income estimates are generally subject to the 25% withholding tax (plus solidarity surcharge and, where applicable, church tax).

Tax will not be withheld if the investor is a German tax resident and submits an exemption form, provided the taxable income components do not exceed EUR 1,000 for separate assessment or EUR 2,000 for joint assessment of spouses.

A corresponding exemption also applies if a certificate for persons who are not expected to be assessed for income tax (the "non-assessment certificate") is submitted.

If a domestic investor has units held in domestic custody, the institution maintaining the custody account, acting as the paying agent, will not withhold tax provided that, prior to the aforementioned receipt date, it is presented with either an exemption form conforming to the official sample document and covering an adequate amount or a non-assessment certificate issued by the tax office for a maximum of three years. No tax is withheld in this case. Otherwise, the investor must provide the domestic institution maintaining the custody account with the amount of tax to be withheld. For this purpose, the institution maintaining the custody account may withdraw the amount of tax to be withheld from a cash account held at the institution in the name of the investor without the consent of the investor. If the investor does not object before the advance

income estimate is deemed received, the institution maintaining the custody account may also withdraw the amount of tax to be withheld from a cash account in the name of the investor to the extent that an overdraft facility agreed with the investor for this account has not been utilized. If the investor fails to comply with its obligation to provide the domestic institution maintaining the custody account with the amount of tax to be withheld, the institution maintaining the custody account must inform its competent tax office accordingly. In this case, the unreported advance income estimate must be declared in the investor's income tax return.

3. Capital gains at investor level

If units of the fund are sold, or if these are deemed to have been sold for tax purposes (for example in the case of exit taxes), a capital gain is taxable as a rule.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 30% of the capital gains are tax exempt. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments. If the fund meets the tax prerequisites for partial exemption of a balanced fund, 15% of the capital gains are tax-exempt. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

In the event of a loss on a sale, the loss amount corresponding to the respective applicable partial-exemption rate is not tax deductible at investor level.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the capital gains.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

If the units are held in a domestic custody account, the institution maintaining the custody account withholds the tax, taking into account any applicable partial exemptions. The 25% withholding tax (plus solidarity surcharge and, where applicable, church tax) can be avoided by submitting an exemption form covering an adequate amount or a non-assessment certificate. If such units are sold by an individual investor at a loss, the amount of that loss – less any reduction

based on a partial exemption – may be offset against other positive income from capital assets. If the units are held in a custody account at a domestic institution, and positive income from capital assets was generated at the same institution in the same calendar year, the institution maintaining the custody account will offset the loss.

When determining the capital gain for tax purposes, the gain must be reduced by the advance income estimates applied during the holding period.

4. Negative income for tax purposes

Negative income for tax purposes of the fund cannot be allocated to the investor.

5. Settlement taxation

During the winding-up of the fund, distributions in a calendar year are deemed to be a tax-free capital repayment if the last redemption price determined in this calendar year is less than the amortized cost. This applies for a maximum period of ten calendar years after the calendar year in which settlement begins.

6. Exit taxation

The fund units are deemed to have been sold for tax purposes if an investor's unlimited tax liability ends as a result of giving up their residence or habitual abode in the Federal Republic of Germany, if the units are transferred free of charge to a person who does not have unlimited tax liability or if the Federal Republic of Germany's right to tax the gain from the sale of the fund units is excluded or restricted for other reasons. In these cases, the increase in value accrued up to that point is taxed. Exit taxes can only be charged if the investor has directly or indirectly held at least 1% of the issued units of the respective fund in the last five years prior to the notional sale or if the investor directly or indirectly holds fund units with an acquisition cost of at least EUR 500,000 at the time of the notional sale; the holdings in different investment funds must be considered separately and the acquisition costs must not be added together, and the total taxable gains from all fund units are positive. Taxation must take place as part of the assessment.

II Units held as business assets (German tax residents)

1. Tax-exempt unit class (unit class for "tax-privileged" investors)

As explained above, the fund is partially subject to corporate income tax on certain income.

However, a unit class is tax exempt if the units in a unit class may only be acquired or held by such tax-privileged investors that are a domestic corporate entity, association of persons or estate that, according to its respective Articles of Incorporation, foundation deed of trust or other founding instrument, solely and directly serves non-profit, charitable or religious purposes, and is

actually administered accordingly, or if it is a foundation under public law that solely and directly serves non-profit or charitable purposes, or if it is a legal entity under public law that solely and directly serves religious interests; no such refunding shall take place, however, if the units are held in a for-profit business operation. The same applies to comparable foreign investors with registered offices and administrations in a foreign country that provides official legal and recovery assistance.

A unit class is also tax exempt if the units are held solely or in addition to the above-mentioned tax-privileged investors within the framework of individual retirement arrangements or basic pensions that have been certified in accordance with the German Pension Contracts Certification Act.

The prerequisites for tax exemption of a unit class are that the investors furnish proof of their tax exemption to the fund and that the investment conditions only permit the redemption of units in such a unit class to the investment fund and that the transfer of units in such unit class is excluded.

Furthermore, exemption from the corporate income tax paid at fund level on German dividends and on income from German dividend rights similar to equities also essentially requires that German equities and German dividend rights similar to equities were held by the fund as beneficial owner for 45 days without interruption within a period of 45 days before and after the investment income was payable, and that the minimum risk of changes in value was 70% throughout that entire 45-day period.

The tax exemption for income that is generally taxable at fund level does not apply if the investor has granted a usufruct to the investment income or has entered into any other obligation to pay the investment income in full or in part, directly or indirectly, to other persons. In such cases, the investor has an obligation to make a subsequent tax payment. This means that the investor must notify the responsible tax office of the loss of their tax exemption and pay capital gains tax of 15% of the domestic income from equity investments, domestic income from real property and other domestic income and investment income attributable to the investor's investment fund units.

Tax exemption amounts that the Company receives in connection with the administration of the fund and that are attributable to income from the unit classes described above must generally be paid out to investors in those unit classes. Notwithstanding the preceding, the Company shall be entitled to transfer exemption amounts directly to the fund for the benefit of the investors in this unit class; new units will not be issued on the basis of this transfer.

Information about tax-exempt unit classes, if any, is provided in the special section of this Sales Prospectus and in the Special Terms and Conditions of Investment.

2. Refund of corporate income tax imposed on the fund

The corporate income tax incurred at fund level may be reimbursed to the fund for forwarding to an investor if the investor is a domestic corporate entity, association of persons or estate that, according to its respective Articles of Incorporation, foundation deed of trust or other founding instrument, solely and directly serves non-profit, charitable or religious purposes, and is actually administered accordingly, or if it is a foundation under public law that solely and directly serves non-profit or charitable purposes, or if it is a legal entity under public law that solely and directly serves religious interests; no such refunding shall take place, however, if the units are held in a for-profit business operation. The same applies to comparable foreign investors with registered offices and administrations in a foreign country that provides official legal and recovery assistance.

The prerequisite for this is that such an investor submits a corresponding application and that the corporate income tax is prorated over the investor's holding period. In addition, the investor must be the legal and beneficial owner of the units for a period of at least three months before receiving the income of the fund subject to corporate income tax, and there must be no obligation to transfer the units to another person. Furthermore, a usufruct to the investment income may not have been granted and no other obligation may have existed to pay the investment income in full or in part, directly or indirectly, to other persons. Furthermore, with regard to the corporate income tax paid at fund level on German dividends and on income from German dividend rights similar to equities, such refunding also essentially requires that German equities and German dividend rights similar to equities were held by the fund as beneficial owner for 45 days without interruption within a period of 45 days before and after the investment income was payable, and that the minimum risk of changes in value was 70% throughout that entire 45-day period ("45-day rule").

The refund application must be accompanied by documentation of tax-exempt status and by a statement of investment fund unit holdings issued by the institution maintaining the custody account. The statement of investment fund unit holdings is a certificate conforming to the official sample document documenting the extent to which units were held by the investor during the entire calendar year, as well as the timing and extent of any purchases and sales of units during the calendar year.

The corporate income tax incurred at the fund level may also be refunded to the fund for forwarding to an investor if the units in the fund

are held within the framework of individual retirement arrangements or basic pensions that have been certified in accordance with the German Pension Contracts Certification Act. This requires the provider of an individual retirement arrangement or basic pension contract to inform the fund within one month of the fund's fiscal year-end at which points in time and in what amounts units were acquired or sold. The aforementioned 45-day rule must additionally be taken into account.

There is no obligation on the part of the fund or the Company to have the corresponding corporate income tax refunded for forwarding to the investor. In particular, the fund or the Company can make the application for such a refund dependent on a minimum expected refund amount and/or on an agreement for reimbursement of expenses by the investor.

Given the elevated complexity of this rule, it may be beneficial to consult with a tax advisor.

3. Distributions

Distributions of the fund are generally subject to individual or corporate income tax and to trade tax.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 60% of the distributions are tax exempt for income tax purposes, and 30% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 80% of the distributions are generally tax exempt for corporate income tax purposes, and 40% for trade tax purposes. For corporate entities that are life or health insurers or pension funds and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 30% of the distributions are tax exempt for corporate income tax purposes, and 15% for trade tax purposes. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments.

If the fund meets the tax prerequisites for partial exemption of a balanced fund, 30% of the distributions are tax exempt for income tax purposes, and 15% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 40% of the distributions are generally tax exempt for corporate income tax purposes, and 20% for trade tax purposes. For corporate entities that are life or health insurers or pension funds and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 15% of the distributions are tax

exempt for corporate income tax purposes, and 7.5% for trade tax purposes. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the distributions.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

The distributions are generally subject to the 25% withholding tax (plus solidarity surcharge).

If the tax prerequisites for an equity or balanced fund are met, the partial-exemption rate applicable for individual investors, i.e., 30% in the case of an equity fund and 15% in the case of a balanced fund, is applied consistently for withholding purposes.

4. Advance income estimates

The advance income estimate ("Vorabpauschale") is the amount by which the fund's distributions within a calendar year fall short of the baseline return for that calendar year. The baseline return is determined by multiplying the redemption price of the unit at the beginning of a calendar year by 70% of the baseline interest rate, which in turn is derived from long-term government bond market yields. The baseline return is limited to the amount exceeding the difference between the first and last redemption prices determined in the calendar year plus the distributions paid during the calendar year. For the year in which the units were acquired, the advance income estimate is reduced by one-twelfth for each full month preceding the month of acquisition. The advance income estimate is deemed to have accrued on the first workday of the following calendar year.

Advance income estimates are generally subject to individual or corporate income tax and to trade tax.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 60% of the advance income estimates are tax exempt for income tax purposes, and 30% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 80% of the advance income estimates are generally tax exempt for corporate income tax purposes, and 40% for trade tax purposes. For corporate entities that are life or health insurers or pension funds

and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 30% of the advance income estimates are tax exempt for corporate income tax purposes, and 15% for trade tax purposes. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments.

If the fund meets the tax prerequisites for partial exemption of a balanced fund, 30% of the advance income estimates are tax exempt for income tax purposes, and 15% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 40% of the advance income estimates are generally tax exempt for corporate income tax purposes, and 20% for trade tax purposes. For corporate entities that are life or health insurers or pension funds and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 15% of the advance income estimates are tax exempt for corporate income tax purposes, and 7.5% for trade tax purposes. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the advance income estimate.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

The advance income estimates are generally subject to the 25% withholding tax (plus solidarity surcharge).

If the tax prerequisites for an equity or balanced fund are met, the partial-exemption rate applicable for individual investors, i.e., 30% in the case of an equity fund and 15% in the case of a balanced fund, is applied consistently for withholding purposes.

5. Capital gains at investor level

Gains on the sale of the units, or if these are deemed to have been sold for tax purposes, are generally subject to individual or corporate income tax and to trade tax. When determining the capital gain for tax purposes, the gain must be reduced by the advance income estimates applied during the holding period.

If the fund meets the tax prerequisites for partial exemption of an equity fund, 60% of the capital gains are tax exempt for income tax purposes, and 30% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 80% of the capital gains are generally tax exempt for corporate income tax purposes, and 40% for trade tax purposes. For corporate entities that are life or health insurers or pension funds and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 30% of the capital gains are tax exempt for corporate income tax purposes, and 15% for trade tax purposes. Equity funds are investment funds that, according to their terms and conditions of investment, continuously invest more than 50% of their value or of their gross assets in equity capital investments.

If the fund meets the tax prerequisites for partial exemption of a balanced fund, 30% of the capital gains are tax exempt for income tax purposes, and 15% for trade tax purposes, if the units are held by natural persons as business assets. For taxable corporate entities, 40% of the capital gains are generally tax exempt for corporate income tax purposes, and 20% for trade tax purposes. For corporate entities that are life or health insurers or pension funds and in which the units are attributable to investments, and for those that are credit institutions and in which the units are allocable to the trading book as defined by article 340e (3) HGB or that at the time of addition to the business assets are to be carried as current assets, 15% of the capital gains are tax exempt for corporate income tax purposes, and 7.5% for trade tax purposes. Balanced funds are investment funds that, according to their terms and conditions of investment, continuously invest at least 25% of their value or of their gross assets in equity capital investments.

In the event of a loss on a sale, the loss amount corresponding to the respective applicable partial-exemption rate is not tax deductible at investor level.

If the fund does not meet the tax prerequisites for either an equity fund or a balanced fund, no partial exemption is applicable to the capital gains.

A tax classification for partial exemption purposes of the fund or funds or sub-funds can be found in the Annex to this summary of tax regulations of importance to German investors. The

classification may change for the future. In such a case, the fund unit is treated as sold and subsequently acquired on the following day with a new tax classification for partial exemption purposes; any resulting notional capital gain, however, is only taken into account once the units are actually sold or, in certain cases, are deemed to have been sold for tax purposes.

The gains on the sale of the units are generally not subject to withholding of investment income tax.

6. Negative income for tax purposes

Negative income for tax purposes of the fund cannot be allocated to the investor.

7. Settlement taxation

During the winding-up of the fund, distributions in a calendar year are deemed to be a tax-free capital repayment if the last redemption price determined in this calendar year is less than the amortized

cost. This applies for a maximum period of ten calendar years after the calendar year in which settlement begins.

8. Simplified overview for the taxation of regular business investor groups

	Distributions	Advance income estimates	Capital gains
German investors			
Sole proprietorships	<u>Investment income tax:</u> 25% (the partial exemption for equity funds of 30%, or 15% for balanced funds, is taken into account) <u>Substantive taxation:</u> Individual income tax and trade tax, taking into account partial exemptions where applicable (equity funds: 60% for individual income tax / 30% for trade tax; balanced funds: 30% for individual income tax / 15% for trade tax)	<u>Investment income tax:</u> No withholding	
Regularly taxed corporations (typically industrial companies; banks, unless units are held in their trading portfolio; property insurers)	<u>Investment income tax:</u> No withholding for banks, otherwise 25% (the partial exemption for equity funds of 30%, or 15% for balanced funds, is taken into account) <u>Substantive taxation:</u> Corporate income tax and trade tax, taking into account partial exemptions where applicable (equity funds: 80% for corporate income tax / 40% for trade tax; balanced funds: 40% for corporate income tax / 20% for trade tax)	<u>Investment income tax:</u> No withholding	
Life and health insurance companies and pension funds with which the fund units are attributable to investments	<u>Investment income tax:</u> No withholding <u>Substantive taxation:</u> Corporate income tax and trade tax, unless the commercial accounts contain a provision for premium refunds that is also recognized for tax purposes, taking into account partial exemptions where applicable (equity funds: 30% for corporate income tax / 15% for trade tax; balanced funds: 15% for corporate income tax / 7.5% for trade tax)		
Banks that hold the fund units for trading	<u>Investment income tax:</u> No withholding <u>Substantive taxation:</u> Corporate income tax and trade tax, taking into account partial exemptions where applicable (equity funds: 30% for corporate income tax / 15% for trade tax; balanced funds: 15% for corporate income tax / 7.5% for trade tax)		
Tax-exempt charitable, benevolent or religious investors (in particular, churches and charitable foundations)	<u>Investment income tax:</u> No withholding <u>Substantive taxation:</u> Tax-exempt – in addition, the corporate income tax paid at fund level can be refunded on request under certain conditions.		
Other tax-exempt investors (in particular, pension funds, burial funds and provident funds, provided that the requirements provided for in the Corporate Tax Act are met)	<u>Investment income tax:</u> No withholding <u>Substantive taxation:</u> Tax-exempt		

It is assumed that units are held in custody in Germany. A surtax called the “solidarity surcharge” is levied on investment income tax, individual income tax and corporate income tax. To obtain exemption from withholding of investment income tax, it may be necessary to submit certificates to the institution maintaining the custody account in sufficient time.

III Non-resident taxpayers

If a non-resident taxpayer has the fund units held in custody by a domestic institution, no tax will be withheld on distributions, advance income estimates and the from the sale of the units,

provided that the taxpayer submits proof of non-resident status. If the institution maintaining the custody account is not aware of the investor’s non-resident status, or if such status is not verified in time, the foreign investor has no option but to

apply for a refund of the tax withheld as provided for by the German Fiscal Code². The tax office of the institution maintaining the custody account

² Article 37 (2) of the German Fiscal Code

will be responsible for processing such a refund application. Where a non-resident taxpayer is comparable to a domestic investor who can be refunded the corporate income tax paid at fund level, a refund is also possible in principle. Please refer to the above statements about German tax residents. Another prerequisite is that the foreign investor has its registered offices and administrations in a foreign country that provides official legal and recovery assistance.

IV Solidarity surcharge

A solidarity surcharge of 5.5% is levied on the amount of tax to be withheld from distributions, advance income estimates and gains on the sale of units.

V Church tax

Provided that income tax is already being withheld by a domestic institution maintaining the custody account (withholding agent), the attributable church tax is regularly levied as a surcharge on the tax withheld at the church tax rate of the religious group to which the church tax payer belongs. The deductibility of the church tax as a special expense is taken into account and used to reduce withholding.

VI Foreign withholding tax

Local withholding tax is in some cases retained at source on fund income generated abroad. Such withholding tax cannot be taken into account to reduce the tax liability of investors.

VII Consequences of merging investment funds

In cases where a domestic investment fund is merged into another domestic investment fund to which the same partial-exemption rate is applicable, unrealized gains will not be disclosed either at the level of the investors or at the level of investment funds involved, i.e., such a transaction is tax neutral. If the investors in the transferring investment fund receive a cash payment³ as provided for in the merger plan, such payment shall be treated like a distribution.

If the applicable partial-exemption rate of the transferring investment fund is different from that of the receiving investment fund, the unit of the transferring investment fund is treated as sold, and the unit of the receiving investment fund is treated as acquired. The gain on the notional sale is only deemed to have accrued once the unit of the receiving investment fund is actually sold or, in certain cases, deemed to have been sold for tax purposes. Once the notional acquisition has taken place, the partial-exemption rate of the receiving investment fund shall be applied.

VIII Special notice for German tax residents using foreign custody accounts

Particular circumstances must be taken into account by German investors holding units of the fund in a foreign custody account. In particular, the foreign institution maintaining the custody account will not withhold tax, which means that German tax residents must declare in their tax returns all distributions, advance income estimates and gains realized on the sale of units (regarding the calculation of capital gains, see points I. 3 and II. 5 above, respectively). It must be noted here that distributions and advance income estimates must be declared in the tax return every year.

Given the transitional provisions to the legal situation applicable since January 1, 2018, a large number of particular circumstances must be considered (e.g., any inflow of taxable capital gains on the sale of units applicable as of December 31, 2017, in the context of the actual unit sale).

If foreign custody accounts are to be used, we recommend that, prior to acquiring units of the fund described in this Sales Prospectus, investors consult their tax advisor and individually clarify any possible tax consequences arising from the acquisition of units.

IX Tax effects of an investment in a master fund at the level of the feeder fund

At the level of a domestic fund serving as a feeder fund that acquires units of a Luxembourg fund serving as the master fund, the following applies:

No withholding tax is levied on investment income as defined by article 16 InvStG (distributions, advance income estimates and gains realized on the redemption/sale of units to the master fund) transferred to the feeder fund from the master fund or on investment income attributable to the feeder fund.

A refund of any corporate income tax incurred at the level of the master fund on domestic income from real property, domestic income from equity investments and on other domestic income in the sense of the limited income tax liability, not including gains on the sale of units in corporations (a reverse exception, see "General information" above), is not possible for investors in the feeder fund.

X Automatic exchange of information in tax matters

The importance of automatic exchange of information as a means to combat cross-border tax fraud and tax evasion has greatly increased in recent years at international level. In response, the OECD published its Common Reporting Standard (hereinafter "CRS"), a global standard for

automatic exchange of financial account information in tax matters. The CRS was integrated into EU law at the end of 2014 by way of Council Directive 2014/107/EU of December 9, 2014, amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation. The participating jurisdictions (all EU member states and a number of third countries) are now applying the CRS. Germany has transposed the CRS into German law with the Financial Account Information Exchange Act of December 21, 2015.

Under the CRS, reporting financial institutions (primarily custodian institutions, depository institutions, investment undertakings, and specified insurance companies) are required to collect specific information about their clients. If these clients (natural persons or legal entities) are reportable persons (not including, for example, corporations or financial institutions listed on a stock exchange) resident in other participating jurisdictions, their cash and custody accounts are classified as reportable accounts. Reporting financial institutions will then communicate certain information to their home tax authorities for each reportable account. These then communicate the information to the home tax authority of the client.

The information to be communicated is essentially the personal data of the reportable client (name; address; tax identification number or tax number; date and place of birth (for natural persons); jurisdiction of residence), as well as information about the cash and custody accounts (e.g., account number; account balance or value; total gross amount of interest, dividend or investment fund distribution income; total gross proceeds from the sale or redemption of financial assets (including fund units)).

Specifically affected, therefore, are reportable investors holding a cash and/or custody account with a financial institution established in a participating jurisdiction. German financial institutions will therefore report information about investors resident in other participating jurisdictions to the Federal Tax Office, which in turn will forward the information to the respective tax authorities of the investors' jurisdictions of residence. Conversely, financial institutions in other participating jurisdictions will report information about investors resident in Germany to their respective home tax authority, which in turn will forward the information to the Federal Tax Office. It is ultimately conceivable that financial institutions established in other participating jurisdictions will report information about investors that are resident in still other participating jurisdictions to their respective home tax authority, which in turn will forward the information to the respective tax authorities of the investors' jurisdictions of residence.

³ Article 190 (2), no. 2, KAGB

General note

The information provided here is based on our understanding of current tax laws. It is addressed to persons subject, without

limitation, to individual or corporate income tax in Germany. However, no responsibility can be assumed for potential changes in the tax

structure through legislation, court decisions or the orders of the tax authorities.

ANNEX – Tax classification overview of all German funds for partial exemption purposes (as of: May 21, 2025)

Fund	Classification for partial exemption purposes
AL GlobalDynamik	Balanced funds
